☞ The Lateral Trust 6 per cent bonds of the Union Pacific Railway Company, maturing July 1, 1908, are payable, principal and interest in gold, and are a direct obligation of the Union Pacific, secured by the deposit in trust with the Union Trust Company, New York, of the first mortgage 7 per cent bonds of the Colorado Central Railroad Company, the Omaha and Republican Valley Railroad Company, and the Utah and Northern Railway Company, all branches of the Union Pacific Railway Company. The net earnings of these several roads are more than enough to cover all fixed charges, and the business is rapidly increasing.

Commerce of New York.

The foreign imports at New York for the month of May, 1880, are officially stated as follows:

	1879.	1880.
Entered for consump'n.	$10,902,264	$17,796 044
Do. for warehousing	6,185,153	14,278 907
Free goods	6 752,501	11,115,579
Specie and bullion	849,026	547,797
Total entered at port..	$24,688,944	$43,738,327
Withdrawn fr.wareh'use	4,963,111	5,325,501

The foreign imports at New York for five months from January 1, were:

	1879.	1880.
Entered for consump'n	$61,923,984	$105,985,402
Do. for warehousing	80,392,794	53,639,273
Free goods	37,752,866	54,878,852
Specie and bullion	4,419,000	3,600,330
Total entered at port..	$134,488,644	$218,103,857
Withdrawn fr. wareh'se	25,877,489	32,879,645

Theforeign imports at New York for eleven months of the fiscal year, were:

	1879.	1880.
Six months ending January 1	$148,784,274	$266,228,601
January	25,657,546	40,897,154
February	26,968,987	40.165,384
March	28,238,007	45,598,729
April	28,935,160	47.704.263
May	24,688,144	43 738,327
Total 10 months	$283,272,918	$484 332 458
Deduct specie	10,524,268	82,343,501
Total	$272,748,650	$401,988,957

The duties received at New York for eleven months ending with May, were:

	1879.	1880.
July	$8,103,513 74	$9,329,895 17
August	10,149,191 69	10,562,138 82
September	9,080,986 88	11,790,902 26
October	8,849,904 94	10,952 554 48
November	6,713,339 94	3,460,050 08
December	6,175,359 43	8,175,540 13
January	7,655,552 67	11,960,677 78
February	8,229,362 06	12,254,602 24
March	9,320,695 68	14,469,557 65
April	8,184,797 88	11,901.071 43
May	7,577,233 93	9,752,773 54
Total	$89,550,388 84	$119,609,768 58

The exports from New York to foreign ports in the month of May, were:

	1879.	1880.
Domestic produce	$26,123,074	$34,681,661
Foreign free goods	195,499	106,308
Do. dutiable	503,681	522,034
Specie and bullion	1,942,420	473,769
Total exports	$28,769,674	$35,783 772
Do. exclusive of specie..	26,827,254	35,310,003

The exports from New York to foreign ports for five months from January 1, were:

	1879.	1880.
Domestic produce	$128,868,191	$149,954,039
Foreign free goods	1 273,118	1,060,133
Do. dutiable	2,076,498	1,899,522
Specie and bullion	8,906,547	3,706,056
Total exports	$141,124,349	$156,619,780
Do. exclusive of specie	182,217,802	152,913,724

The exports (exclusive of specie) from New York to foreign ports for eleven months ending with May, were:

	1879.	1880.
Six months ending January 1	$177,556,058	$197,760,586
January	22.559,556	25,416,566
February	27,132,313	23,891,148
March	28,782.849	33,626.459
April	26,915,800	34 669,548
May	26,827,254	35,310,003
Total produce	$309.773,860	$350,674,310
Add specie	12,717,142	7,039,122
Total exports	$322,491,002	$357,713,432

West Jersey and Atlantic City Railroad.

A correspondent, writing from Atlantic City, N. J., under date June 18th says that the completion of the new road, or branch, 34 miles long, from Newfield, on the West Jersey Railroad, to Cape May, gives an additional first class broad gauge route from Philadelphia to Atlantic City, and then adds:

The new line, which has separate trains for Atlantic City and Cape May from Camden, N. J., and ferry depots at the foot of Market street, Philadelphia, is under the management of the Pennsylvania Railroad Company. Its construction, equipment and service are fully in keeping with that perfection of detail and attention to public wants and individual comfort which so eminently characterize that great corporation in all the fields of its extensive operations.

The new part of the road commences at Newfield, 30 miles from Camden, to which point the trains run on the West Jersey Railroad tracks. From Newfield to Atlantic City the distance is 34 miles, making the total distance from Camden to Atlantic City 64 miles. The cost of constructing the new road was $500,000. Steel rails have been laid on white oak ties, 16 to the rail, and the space between the ties has been filled in with gravel below the surface, thus preventing any dust from flying. Wharton switches have been used and the road equipped with all modern appliances and brought up to the standard of the Pennsylvania railroad. Water tanks will be laid between the tracks, so that the engine can take water without stopping. The road is a remarkably smooth one, and passes through some thriving towns and villages, among them Forest Grove, which is a large fruit growing district and May's Landing, where considerable manufacturing is done. It is almost a perfect air line, there being but two curves, near May's Landing, which were necessary to carry the line into that town, and the road also crosses Egg Harbor river right at the head of navigation.

From Pleasantville to Atlantic City the rails are laid on piles, a distance of about four miles. This covers a stretch over marsh meadows, and it is the intention of the company to erect a board fence about three feet high at a distance of about eight feet on either side of the tracks, and fill in the space between the two with sand, thus preventing the tide from submerging the tracks or interfering with the road bed. From Pleasantville the track of the three roads, West Jersey, Camden and Atlantic, and the Narrow Gauge, begin to converge, and a short distance beyond are within a stone's throw of each other, the tracks of the West Jersey road lying south of the other two.

☞ At the recent annual election, the State Line and Sullivan Railroad, which has hitherto been controlled by Boston capitalists, passed into the hands of a Philadelphia board of managers, composed of gentlemen largely interested id the Long Valley and Barclay Coal companies. Superintendent Blight and Secretary Baldwin were re-elected. The roads runs from Monroe-

ton to Berenice, Pa., 24 miles, and has a capital of a million, with a funded debt of $112,400. Its earnings, as reported, for 1878 were $40,866 gross and $29,672 net.

The Warwick Valley and Sussex Railroads.

The extension of the Warwick Valley Railroad to the terminus of the Sussex Railroad at McAfee Valley, Sussex County, N. J., has been completed, and a new line between Pennsylvania and the Hudson River, avoiding the great Metropolis, is in full running order. Last year the Warwick Valley Company, with a view to controlling the large milk trade and iron interest of Vernon Township, Sussex County, decided to extend its line to McAfee Valley. The work was commenced and pushed forward with vigor, and the new line was thrown open to the public on the 24th of May. The Sussex Railroad Company, owning valuable iron mines throughout northern Sussex, had already extended its road to McAfee. E. C. Case, Superintendent of the Sussex, with John I. Blair, its President, with a view of uniting the roads, made a thorough inspection of the route through to Newburg last week. The result of their tour was most satisfactory, and arrangements were perfected for the running of through trains from the Waterloo Junction of the Delaware, Lackawanna and Western Railroad to Greycourt Junction, on the New York, Lake Erie and Western Railroad, thus making a complete route from the line of the Delaware, Lackawanna and Western to Newburg, on the Hudson River, through Sussex County, N. J., and Orange County, N. Y.

From Waterloo Junction the run to Newburg will be made in about two hours, which is as quick as the run from Waterloo to New York City by way of the Delaware, Lackawanna and Western through Morris and Essex Counties. The new connection affords a continuous line, with easy transfers at the Waterloo and Greycourt Junctions, from Pennsylvania and the South through to Newburg, the Catskills, Poughkeepsie, Albany, and other parts of the North and East, avoiding the transfers at New York City. The new line will be open to the public about the 10th of July.

☞ Mr. Wharton Barker and Wayne MacVeigh of Pennsylvania, accompanied by several prominent engineers and coal men, sailed from New York for Russia recently, at the desire of the Czar's Government, who have accorded to Mr. Barker the sole right of opening the Donetz coal fields north of the Sea of Azof, with the privilege of building a railway 200 miles north to the immense grain district which needs an outlet through that sea. The magnitude of the undertaking is indicated by the fact that Mr. Barker expects to employ a capital of $8,000,000 in prosecuting the work. Should his mission of exploration prove successful, other American capitalists will be invited to participate in the undertaking. The Russian coal fields are declared to be immense in extent and superior in quality to the Pennsylvania anthracite.

☞ At a meeting of the Baltimore and Chicago Railroad Company, held at Wooster, Ohio, on the 20th inst., it was decided to elect officers on July 27. About $400,000 has been subscribed, and the right of way secured with few exceptions. Only $200,000 remains to be subscribed.

☞ The Yonkers Rapid Transit Commissioners have completed their labors, and handed to the newly-elected Directors of the Yonkers and West Side Rapid Transit Railway Company the certificates of the articles of association, duly verified before Judge J. O. Dykman. The following officers have been elected: President, Robert M. Gallaway; Secretary and Treasurer, Calvin Goddard; Directors, Robert M. Gallaway, Jose F. De Navarro, Grosvenor P. Lowrey, Egisto P. Fabbri, Adolfo Hegewisch, Thomas R. Sharpe, George A. Saxer, A. Schierenberg, and William Allen Butler, Jr. The Commissioners have secured the consent of the Yonkers Common Council to a right of way over and through certain streets in Yonkers.

☞ The railroad from Du Pont's Station on the Wilmington and Northern Railroad to Jessup & Moore's paper mills on the opposite side of the Brandywine, a distance of about one mile, is nearly completed. The track crosses the Brandywine on a large wooden truss bridge, and, on reaching the upper side branches off into two tracks, each on stone piers at an average height of 10 feet; one branch running around the boiler house and the other between the boiler house and paper mill. The bridge is supported by two large brown stone piers, 82 by 6 feet on top and 18 feet high, above low water. The total cost of the work will be over $20,000. The work is being done by the railroad company in order to accommodate the heavy freight trade to and from the mills. Mr. G. H. Zerr, of Reading, is the contractor for the grading, track laying and masonry.

☞ The certificate and articles of association of the Yonkers and West Side Rapid Transit Railway Company, with the affidavits of three of the directors of the company, stating that the entire amount of stock had been subscribed in good faith and that they int nd to complete the road, were filed on the 21st in the office of the County Clerk of Westchester county,

G. & N. C. Narrow-gauge R. R.

CONTRACTORS FOR CONSTRUCTING AND equipping railroads are invited to make proposals for constructing and equipping a narrow gauge road from the Town of Georgetown, S. C., to the North Eastern Railroad at a point 41 or 42 miles from Georgetown. The roadbed has once been graded the entire way with the exception of about four miles.

Contractors desiring to engage in such a work are invited to confer with Col. J. D. Blanding, the President of the road, who resides at Sumter, on the Wilmington, Columbia and Augusta R. R., from whom all particulars may be learned. Early work is desired.

By order of the Board of Directors.

R. E. FRASER, Acting Secretary.

LITTLE CHIEF MINING COMPANY.

ROOM No. 54 BOREEL BUILDING, 115 BROADWAY, NEW YORK, June 15, 1880.

THE BOARD OF TRUSTEES HAVE THIS DAY declared a MONTHLY DIVIDEND (No. 5) of ONE PER CENT. on the TEN MILLION DOLLARS ($10,000,000) capital stock of this company, amounting to ONE HUNDRED THOUSAND DOLLARS ($100,000,) or FIFTY CENTS Per Share, out of the fifth month's net earnings, payable at the Mining Trust Company, on the 23d inst.

Transfer-books will close June 19, and re-open June 24.

D. F. VERDENAL, Secretary.

SECRETARY AND TREASURER'S OFFICE, METROPOLITAN ELEVATED RAILWAY COMPANY, No. 71 BROADWAY, NEW YORK, June 11, 1880.

THE QUARTERLY DIVIDEND OF (2½) TWO and a Half per Cent. upon the capital stock of this company will be paid on and after the 1st day of July next at the Central Trust Company, No. 15 Nassau-st., New York, to the Stockholders of record on the 18th inst.

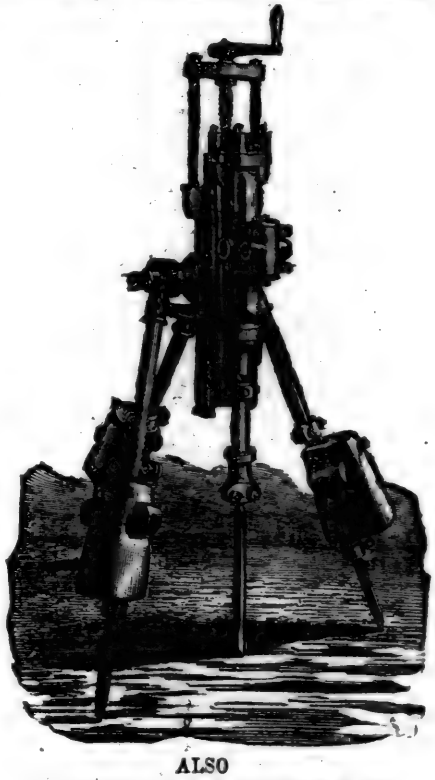
The transfer books will be closed on the 18th inst., at 3 o'clock P. M., and reopened on the 2d July next.

JOHN E. BODY, Treasurer.

SECRETARY AND TREASURER'S OFFICE, METROPOLITAN ELEVATED RAILWAY COMPANY, No. 71 BROADWAY, NEW YORK, June 11, 1880.

THE COUPONS OF THE HALF-YEARLY INTEREST on the First Mortgage Bonds of this company will be paid on and after the 1st July next at the Central Trust Company, No. 15 Nassau-st., New York.

JOHN E. BODY, Treasurer.



OFFICE OF THE HOMESTAKE MINING COMPANY, 18 WALL-ST., NEW YORK, June 14, 1880.

DIVIDEND NO. 18.

THE REGULAR MONTHLY DIVIDEND OF Thirty Cents per share has been declared for May, payable at the office of Wells, Fargo & Co., No. 65 Broadway, on the 25th inst. Transfer-books close on the 19th inst.

H. B. PARSONS, Assistant Secretary.

The Coal Trade.

The total tonnage of anthracite coal from all the regions for the week ending June 12, as reported by the several carrying companies, amounted to 411,998 tons, against 593,123 tons in the corresponding week last year, a decrease of 181,125 tons. The total amount of anthracite mined for the year is 9,187,070 tons, against 10,588,599 tons for the same period last year, a decrease of 1,371,529 tons. The quantity of bituminous coal sent to market for the week amounted to 45,647 tons, against 41,291 tons in corresponding week last year, an increase of 3,356 tons. The total amount of bituminous mined for the year is 1,662,408 tons against 1,408,073 tons for the corresponding period last year, an increase of 254,335 tons. The total tonnage all kinds of coal for the week is 457,645 tons, against 634,414 tons in corresponding week last year, a decrease of 177,769 tons, and the total tonnage for the coal year is 10,849,478 tons against 11,966,672 tons to same date last year, a decrease of 1,117,194 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the first week of June was 129,151 tons, of which 100,759 tons were coal and 28,392 tons coke. The total tonnage for the year thus far has been 2,989,676 tons of which 2,230,709 tons were coal and 762,967 tons coke. These figures embrace all the coal and coke carried over the road east and west.—Phil. Ledger, June 19.

Manhattan Beach Railway

TIME TABLE.

Double Track, Steel Rails over the Entire Road.

NEW YORK TRAINS, VIA 23D ST., EAST RIVER.

The steamer "Sylvan Grove," from Pier foot TWENTY-THIRD STREET, E. R., running to the Company's Depot, Greenpoint, connects with all trains for Manhattan Beach as follows:

LEAVE NEW YORK—8.45, 9.45, 10.45, 11.15, 11.45 A M.; 12.15, 12 45, 1.15, 1.45, 2.15, 2.45, 3.15, 3.45, 4.15, 4.45, 5.15, 5.45, 6.15, 6.45, 7.15, 7.45, 8.15, 8.45 P. M.

Trains leave Manhattan Beach for New York, Via 23d St., East River.

7.35, 10.00, 11.05 A. M.; 12.05, 12.30, 1.10, 1.30, 2.15, 2.30, 3.15, 3.30, 4.15, 4.30, 5.15, 5.30, 6.15, 6.30, 7.15, 7.30, 8.15, 8.30, 9.05, 9.30, 10.00, 10.35 P. M.

NEW YORK TRAINS, VIA BAY RIDGE.

The steamers "Thomas Collyer" and "Matteawan" leave New York (N. R.), connecting at Bay Ridge with trains for Manhattan Beach as follows:

TWENTY-SECOND STREET.—9.10, 10.25, 11.25 A. M.; 12.25, 1.25, 2.25, 3.25, 4.25, 5.25, 6.25, 7.25, 8.25 P. M.

LEROY STREET.—9 35, 10.35, 11.35 A. M.; 12.35, 1.35, 2.35, 3.35, 4.35, 5.35, 6.35 P. M.

PIER 6.—9.55, 10.55, 11.55 A. M.; 12.55, 1.55, 2.55, 3.55, 4.55, 5.55, 6.55 P. M.

The steamer "D. R. Martin," running in connection with Elevated Railroads at Whitehall Street, connects with trains at Bay Ridge for Manhattan Beach as follows:

LEAVE WHITEHALL STREET 9.25, 10.25, 11.25 A. M.; 12.25, 1.25, 2.25, 3.25, 4.25, 5.25, 6.25, 7.25, 8.25 P. M.

Trains leave Manhattan Beach via Bay Ridge for New York as follows:

8.20, 9.20, 10.20. 11, 11.20 A. M.; 12 M.; 12.20, 1.00, 1.25, 2.10, 2.25, 3.10, 3.25, 4.10, 4.35, 5.10, 5.25, 6.10, 6.25, 7.00, 7.20, 8.00, 8.20, 8.55, 9.20, 9.55, and 10 40 P. M.

CONCERTS EVERY AFTERNOON AND EVENING BY GILMORE'S BAND AND LEVY.

FIREWORKS EVERY SATURDAY EVENING by the ALEXANDRA COMPANY OF LONDON.

Kerite Insulated Telegraph Wire and Cables

Of all kinds made to order, for Ocean, River, Aerial and Subterranean Lines.

The Kerite covering of these Conductors unlike any other, resists effectually the destructive action of Heat and Moisture, and the corrosive agents either in Earth, Air or Water.

☞ Special orders should state whether the Cable is to be exposed to Earth, Air or Water.

FACTORY—SEYMOUR, CONN. **Office, 120 Broadway, New York.**

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN, General Superintendent.

JNO. N. ABBOTT, General Passenger Agent.

TO MINE OWNERS.

The New York Stock Exchange has at last opened its doors to the mining interest of our country, and now allows its members to deal in mining shares. Parties who have first class mining properties, and wish to organize companies, under the laws of the State of New York, which are liberal, and find a market, would do well to communicate with

Mexican Railroad Projects.

Mexico has but one important line of railroad, and that not a very long one. It extends from Vera Cruz to the capital, a distance of about ~~150~~ 250 miles, and was built by English skill and capital, and is owned and operated by the English. Its function is to make of Vera Cruz the chief seaport, as it is the only one connected by rail with the interior, and there are no large navigable rivers. The Mexicans themselves have entertained absurd or extreme prejudices against the Yankees ever since the war which resulted in the conquest of large provinces. British, German and French trade and intercourse have been encouraged. This, together with the papal religion, and the consequent dense ignorance, with the inbred tendency to revolt, have made Mexico one of the most backward of countries, and a most unpromising theater for the employment of capital.

Mexico has very rich mines in Chibmaba, Sonora and Coahuila, but life and property are not safe, and they lie comparatively neglected. Beside this, Vera Cruz, as an entrance, is seldom free from yellow fever, and all other routes involve long journeys, over dry country, by animal power. Quite recently the railroad system of the United States has been approaching the Mexican frontier, and very soon it will be reached from three or four directions. The Galveston, Houston and San Antonio line, connecting with New Orleans, is now within 150 miles of the Rio Grande at Eagle Pass; the Texas and Pacific it is understood is to be pushed rapidly to Paso del Norte; the Atchison, Topeka and Santa Fe is heading to the same point, and the Southern Pacific of California very nearly touches the outlying parts of Mexico at San Diego, Fort Yuma, and again at Tucson, and is now within about two hundred miles of the same point, El Paso del Norte, on the Rio Grande.

The recent visit of General Grant to Mexico has done much to open that country to American enterprise; and it will be lucky for Mexico if she does not, at the first attempt, fall into the hands of adventurers. Rumor has it that two or three parties are soliciting charters and subsidies from the Mexican Government to build roads to connect her Capital with the United States' system. Such a charter was granted some years ago to a native company; but the work not being performed it was declared forfeited last year. Meanwhile a "Boston party" has organized in Massachusetts who bought the expiring franchise, and by gaining over the Executive, have undertaken to build the first 45 miles of the Mexican Central Railway, within 18 months. This is without the sanction of the Congress, and is at any time liable to be set aside by the courts upon the application of adverse interests. A recent issue of the Mexico *Cosmopolitan* sent us, indicates that proceedings have been begun by another company claiming rights over the same ground.

The Central Company's pretended authority extends as far north as Leon, with the executive permission to extend the road to Laredo and El Paso. It is not probable that any more road will be built under this faulty franchise than just enough to appeal to Congress to ratify the permission. As it is 750 miles from the capital to the nearest of these frontier points, it is not likely the whole road will be built soon on this precarious footing, but sooner or later a road on that line will be completed, and thus complete the all rail route from New York or San Francisco to Vera Cruz. It will benefit greatly the commerce of both countries.

Crops and Railroad Traffic of 1880-'81.

It was a little less than a year ago that we published an article based on harvest returns in Europe and America, showing that the result would greatly increase the traffic of our railroads for 1879-'80 and increase their dividend earning power immensely, beside enabling them to pay for an unusual amount of renewal and repairs, necessitated by the past seven years of depreciation of the entire property of most of our roads. Our predictions of that date have been fully verified by the results, for never have the railroads of the United States had a more prosperous year than the past. As we are now near another harvest, it is not too early to take in the general prospects of the harvests and hence of our railroads for the year to come.

It is well known that the two great factors of last year's prosperity for our country were, first, unusually good crops at home, and second, unusually poor ones abroad. The latter was scarcely secondary to the former, as we shall see by the following figures. The deficit in the crops of Europe last year that had to be largely made up by America was 40,000,000 to 50,000,000 bushels in the United Kingdom, and on the entire Continent about 100,000,000 more, making 150,000,000 bushels above their average imports. These countries this year show prospects fully up to the average in Great Britain, France and other Continental countries, excepting portions of Russia and Eastern France. However, with their harvests two to four weeks earlier than last year, to the lateness of which much of the damage was then due, the prospects now are that the whole of this 150,000,000 bushels will be supplied at home. As the great bulk of this was drawn the past year from this country, it follows that our roads will have that much less to carry as compared with last year. Our usual or average exports of wheat are not over 80,000,000

bushels per annum although in 1878-'79 they were 160,000,000 for the same reason, they are unusually large the present crop year, the returns of which will not be made for some months in official form.

Our exports in 1877-'78 were 111,000,000; in 1876-'77, 54,000,000; in 1875-'76, 70,000,000; in 1874-'75, 76,000,000; 1873-'74, 91,000,000 bushels. Hence it will be seen that our above estimate of 80,000,000 for this crop is fair. It is too early to speak of corn, yet as the price of wheat was so high the past year as to stimulate the exports of corn very largely as a substitute for wheat, it will be seen that there must be naturally a large falling off in shipment of corn also. As to other crops it may be said that with few exceptions the crop prospects the world over were never so flattering as to-day. While this will cheapen prices of all and stimulate consumption, which will also be stimulated in some countries by the better condition of the masses, their supplies of other articles will also be drawn more largely from home than last year as well as wheat.

Hence we cannot see how the exports of wheat from this country can be more than about half those of last year. We will be required to make good to a great extent the depleted reserves of stock in European countries, however, which are greater or less according to price. Authorities give 10,000,000 quarters or 80,000,000 as a fair average. Assuming that this has been drawn down, we would have to make this good, were it not that the American wheat syndicate hold here, afloat and abroad many millions of bushels of old crop in excess of former years, by reason of their holding back policy for some four months of this year and until less than two months since, when they began shipping freely on their own account, to fill up foreign markets ahead of new crop. It will therefore follow that these depleted reserves will be partially made up from the old crop to the extent of the excess of this Syndicate wheat, carried over into next crop, beyond what is usual. By so much therefore will these 80,000,000 bushels reserve be made good, probably 30,000,000 bushels. This will leave but 50,000,000 to be exported by the United States above our assumed average of 80,000,000 bushels, or 130,000,000 for 1880-'81, against 160,000,000 in 1878-'79 and a still much larger amount in 1879-'80, yet to be officially returned.

Our trunk lines will therefore have, after making good our share of this reserve of 30,000,000 and Europe's average wants of 80,000,000 bushels from us, 100,000,000 bushels less to bring to the seaboard for shipment this year than last; although at low freights it may be drawn to the seaboard or to Europe for investment until Europe shall want it. The same is true of flour, corn and oats unless the price of corn shall go so low that farmers feed it instead of shipping it and thus still further reduce the grain traffic of the roads which could not be made up by increased live stock or provisions traffic, as in this concentrate form of meat, corn does not begin to pay the freight it does as grain, which difference the increased traffic in provisions even would not likely make good, as the same influences would prevent Europe taking the excess of our grain crop in the shape of meat that would in the shape of grain. There is no doubt that with lower prices of all and better employment of the masses in Europe, the consumption there will be greater of the better classes of food this year, but it will be correspondingly less of the poorer articles which, to find market must go to such low prices as to stop their shipment, at the same time drag down better articles to a point at which shipment of them also will become unprofitable. As to consumption here, this year it cannot be increased except by immigration and the natural increase of population. One month's earlier harvest in Europe this year will enable her to commence restoring her reserves that much earlier and deprive us of her markets one month earlier also; which will delay the movement of the new crop that much as well as its volume. Added to this about 3,000,000 bushels in excess of last year, are now afloat from the Pacific Coast, which will diminish the amount to be drawn from here on the opening of the new crop still further.

These conditions with the collapse of speculation in all commodities can not give the railroads as much to do in east or west bound freight as last year, although we have still larger crops. Undoubtedly these crops will all be moved in some shape at some time; but to secure it during 1880-'81 the railroads will as undoubtedly have to offer low enough freight rates for an inducement and the dividend earning power of the roads will thus become less than for 1879-'80.

Lake Shore and Michigan Southern Railway.

The Lake Shore and Michigan Southern Railway Company has declared a dividend of four per cent, payable August 2, out of earnings for the six months ended June 30 as reported to the board of directors by the auditor of the company. The estimated result for the six months compared with the reported estimates for the same six months of 1879, are as follows:

	1879.	1880.
Gross earnings	$6,938,482	$8,988,000
Operating expenses & taxes	4,217,921	4,994,000
Net earnings	$2,720,561	$3,989,000
Interest, rentals and dividends on guaranteed stock	1,350,060	1,380,000
Balance	$1,370,561	$2,600,000

The balance of the 6 months of 1880 is appropriated as follows:

Sinking fund contribution	$125.000	
Dividend 4 per cent on stock	1,978,660	
		2,103,660
Surplus		$505,840

It will be seen that the increase in the gross earnings of the past six months over the corresponding six months of the previous year has been $2,044,518, with an increase in the expenses, etc., of only $776 079, making the increase in net earnings $1,268,439; and that the balance after payment of interest, rentals, and dividend on guaranteed stock, show an increase of $1,238,439.

The statement says that "included in the operating expenses for 1880, in addition to full maintenance of road and repairs and the substitution of steel rails for iron rails, and various improvements in bridges and buildings, is the cost of 750 new freight cars amounting to $306,500." This being the case it reduces the increase of ordinary expenditures to $476,000 against an increase in the gross earnings of $2,044,518, and presents an economy in the operation of railways before unparalleled.

Philadelphia and Reading Companies.

The English papers and London bankers, speaking for the creditors of the Philadelphia and Reading Railroad and Coal and Iron Companies, show much concern as to the character of the settlement which may be determined upon by the receivers and the courts. The circular of Messrs. Douglas & Son, London, of June 8th, is largely devoted to this matter, and in justification of the interest they show says that the depreciation on the securities of the Reading Railroad held in that country must exceed two millions sterling, equal to ten millions of dollars. Messrs. Douglas seem to be anxious mainly to protect the bondholders of the companies, at least to see to it that the stockholders shall bear an equitable proportion of the loss sustained. They assert that the net profits of the railroad have been every year since 1877 more than enough to pay the full interest on all the company's mortgages. They present the facts thus:

	Net earnings Railroad.	Losses Coal & Iron.
1877	$4,373,021	$755,478
1878	3,186,783	752,049
1879	4,045,164	699,450

These net profits were enough to pay the full interest on all the railroad mortgages in even bad years. The mortgages outstanding at November, 1879, are stated in last report as follows:

Small mortgages prior to consolidated	$5,573,500
Consolidated mortgage, 1871	18 616,000
Improvement mortgage, 1873	9,364,000
General mortgage, 1874: issued $19,686,000; pledged $5.000,000; total	24,686,000
Income mortgage loan, 1876	2,218,000
	$60 457,500
Bonds and mortgages on real estate	1,846,377
Total mortgage loans	$62,303,877

The funded half of six coupons on the general mortgage remains secured by the mortgage, and Messrs. Douglas say, the trustees are bound to hold them for that purpose. This adds about $1,800,000 to the above mortgage loans. But the surplus net railroad revenue was enough to pay interest on all in full, even in 1879, the worst of the above three bad years. And the profits of the current year are greatly better.

The following are the suggestions of Messrs. Douglas as to a settlement. They may prove of use to the receivers and other parties in interest here in reaching an equitable conclusion. With that view we publish such extracts as bear most directly on the leading points:

"There has never been any serious doubt as to the safety of the consolidated and improvement in-

terests, but that of the general mortgage 1874 cannot be punctually paid in the present confused state of the company's finances. Still its holders have only to foreclose.

"Below these mortgages come more that 12 millions of debenture loans, not secured by mortgages, and some comparatively small loans on navigations and canals controlled by the company.

"The shareholders under foreclosure would pay a large assessment, and could profitably do so

"A gentleman who is influential and exceptionally well informed as to American railroads proposes to assess the shares $15 each, which would produce ten millions of dollars, clear off the floating debt, and open a good prospect for the shares. In exchange for the assessment he would give the shareholders a marketable security over the mass of bonds and shares held by the company. This is a sensible proposal. If needful the unsecured bondholders could also be assessed, and would pay rather than be cut off. They need not pay much. And their payment would greatly and quickly improve their own securities. In the reconstruction they would, as is usual in such cases, be received according to their priorities, but not as creditors. Meanwhile all these parties have interests opposed to those of the mortgagees and of each other.

"Foreclosure might confer a great incidental benefit on the shareholders. There are grave doubts, very frequently expressed, whether the shareholders are not at present liable personally for all debts. But under foreclosure the present company disappears, and the reorganized shareholders of the new company might be freed from such risks.

"The coal lands were bought at most excessive prices, and, as the parties managing were not thought weak, there is great curiosity as to the reasons for paying so much and as to the persons who profited. If foreclosure were obtained by a committee not mixed up with the past management these matters and some others would of course be inquired into, and there might be discoveries highly important to the shareholders and unsecured bondholders, and even beneficial to the mortgagees.

"The conditions are much more favorable now than in 1877 for reconstructing the company and putting it into a good state. Distrust and disaster were then the rule in America in business and railways; they are now the exception. The condition of the country is immeasurably better. Firmness on the part of the bondholders is the only thing needed. The powerful shareholders will necessarily have to accept their terms.

"Messrs. McCalmont, the great shareholders of this company, announce that they have arranged a committee to protect the bondholders' interests. But are the shareholders—that is the debtors—the proper persons to care for the creditors' interests? It is usual for mortgagees to appoint their own committees and agents. They should no so in this case."

In this connection McCalmont Brothers & Co., give notice in London that they will purchase at par and accrued interest the outstanding Philadelphia and Reading Railroad bonds of the issues of 1848 to 1849, inclusive, which mature July 1. The London Railway News states it is understood in London that "the committee of the bond and shareholders of the Reading Railway Company have requested the receivers to supply certain figures and rates respecting the railway. This arrangement is now being prepared, and will be sent forward as soon as completed. Until official information has been obtained holders will do well to exercise a little patience, and, above all, not be induced to throw away their securities, of the value of which evidence is afforded by the announcement made that Messrs. McCalmont are about to purchase at par, 'prior to maturity, the 6 per cent mortgage bonds due July 1 next.' Bond and shareholders may rest assured that all their interests will be protected, as far as it is possible to do so, by a committee which will have the benefit of the advice and experience of Lord Cairns."

Michigan Central Railroad.

The gross earnings, operating expenses, net earnings, etc., of the Michigan Central Railroad for the six months ending June 30, 1880, compared with the corresponding six months of the previous year were as follows:

	1879.	1880.
Gross earnings	$3,341,000	$4,463 000
Operating expenses & taxes	2,235,000	2,890,000
Net earnings	$1,106,000	$1,573 000
Interest, rentals, etc	811,200	798,000
Balance	$294,800	$775,000
The balance for the 6 months of 1880 is appropriated as follows:		
Dividend on the stock four per cent...		749,528
Surplus		$25,472

It will be seen from the above that there has been an increase in gross earnings of $1,122,000, with an increase in expenses of $655,000, making the increase in net earnings $467,000; and that after deducting interest, rentals, etc., the balance shows an increase of $480,200. Of the $655,000 increase in the estimate for operating expenses $290,000 is due to the payment of $180,000 for new freight cars, $50,000 to the substitution of iron for wooden bridges, and $60,000 to the Jackson accident. So that the increase in ordinary expenditures was only $365,000.

☞ The Secretary of State of West Virginia has issued a certificate of incorporation to a company to be known as the "New Martinsville, Middlebourne and Pennsboro' Railroad Company." The company is formed for the purpose of constructing and operating a narrow gauge road from Martinsville, via Point Pleasant Valley and Middle Creek, to Middlebourne, in Tyler county, and thence by the most practicable route to Pennsboro, in Ritchie county.

☞ The Attorney General of the State of New York has rendered an opinion in regard to the taxation of telegraph poles and wires. It is in the form of a communication to the assessors of Montgomery county, who had asked for his opinion on the subject. He holds that telegraph poles and wires are taxable as real estate in the towns in which they are situated, and to be assessed in the name of and to the company owning the line, and not as "non-resident."

☞ The aggregate cost of the several bridges that span the Mississippi river, from St. Louis to St. Paul, has been $20,573,000, ranging from $120,000 for the bridge at Prairie de Chien to $11,573,000 for that at St. Louis. The annual tolls upon the merchandise crossing the river upon these bridges is officially stated to amount to $2,803,725, or nearly 10½ per cent upon the original cost.

☞ The common council of Norfolk, Va., has unanimously passed a resolution expressing the opinion that the Atlantic, Mississippi and Ohio railroad is not now in a bankrupt condition, and protesting against any sale at this time of the road. The fact that the receivers have a large accrued fund at their disposal is cited to show that they are in a condition to resume payment of interest to the foreign bondholders.

Ohio River Railway.

At a meeting of the directors held at Ironton on the 24th ult., Mr. W. W. Franklin, of Columbus, made a proposition for building the road. He proposes to put the road in first class order and equipment, and have the cars running through from Columbus to Ironton by January 1, 1881, and that work shall begin along the whole line in ten days. The consideration he shall receive is $400,000 in bonds and $500,000 stock in the road. This contract was accepted, on condition that certain absent members of the Board acquiesce. As the Franklin company intimated a desire to have two directors of their own selection on the Board, George Willard and John Means promptly resigned, and General Enochs and Captain McGrath were chosen in their stead.

☞ John J. Pinkerton of West Chester, Penn., has been elected Secretary, and H. C. Stewart of Philadelphia Treasurer, of the West Chester and Philadelphia Railroad Company. Extensive improvements are being made along the line of the road. The platforms at all the stations are to be lowered to suit the cars of the Philadelphia, Wilmington and Baltimore style; the double track between the city and Angora, and between Kelleyville and Sworthmore, will be rapidly pushed, 8,000 new ties having already been delivered and 10,000 more contracted for.

☞ The Toledo, Delphos and Burlington Railroad Company and the Dayton, Covington and Toledo Railroad Company have been consolidated. The new corporation preserves the name Toledo, Delphos and Burlington Railroad Company. The officers are: John M. Corse, President; James Irvine, Vice President and General Manager; Louis Curth, jr., Secretary and Treasurer. The construction is being vigorously pushed and the road will be in readiness for the fall trade.

☞ A special despatch to Kiernan's News Agency, dated San Francisco, June 25th, says: "The new station on the Southern Pacific Railroad 1,025 miles east of this city and 56 east of Tucson, named Benson was opened for traffic on the 20th. Stages connect there for Tombstone. The track is across the San Pedro and progressing eastward to Shakespeare on the new Mexican boundary, which will be reached in a few weeks.

☞ The grading on the Ohio Central road is finished to Bucyrus. Brown, Howard & Co., the contractors, have advertised for 300 men to go to work on the grade between Fostoria and Toledo. Messrs. O. A. Loomis and A. A. Decreet have taken the contract to grade the Lake Erie and Western extension from Fremont to Sandusky, and will commence operations July 1.

☞ In recognition of his services in the construction of the Baturite railway, the Emperor of Brazil has conferred the distinction of an official in the Order of the Rose upon Carlos Alberto Morsing, chief engineer of the line. Orders were also conferred upon six members of Mr. Morsing's engineer corps at the same time.

The Steamer Anthracite.

The little steamship Anthracite, arrived at St. John's from England last week. Great interest attaches to the Anthracite as being the smallest vessel that has yet steamed across the Atlantic, her gross tonnage being 70.26 and her registered tonnage 27.91 tons. But a more important interest relates to her trial of the Perkins system of boilers, and the success of the Anthracite trip points to great if gradual changes in the methods of steam navigation. The promise of this lies in the wonderful economy effected by the Perkins system in the consumption of both coal and water. The Anthracite met very heavy weather, behaved remarkably well, and took just eighteen days for her passage from Falmouth to St John's, consuming on the trip only 20 tons of coal and 400 gallons of water.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, May 31, 1880.

JOHN SHERMAN,
Secretary of the Treasury.

Gainesville, Jefferson and Southern Railroad.

Yesterday Mr. Claude Estes, of Gainesville, came to Atlanta for the purpose of having printed the bonds of the Gainesville, Jeffersonville and Southern Railroad, the new line which is prospected from Gainesville to Jefferson, in Jackson county, and ultimately on to Social Circle, to connect there with the Georgia Railroad. Gainesville takes a liberal view of such questions and has subscribed $30,000, to be given in 7 per cent bonds, to run twenty years. The total cost of the road from Gainesville to Jefferson, a distance of 21 miles, will be about $51,000. As soon as the Gainesville bonds and the Jackson County subscriptions are arranged, work will be begun. The road will be pushed through without any delay. —[Atlanta Constitution.

☞ Operations have commenced preparatory to constructing a narrow gauge railroad from Pleasantville to Somers' Point, a distance of about seven miles. Although the enterprize is in the hands of another organization, it is understood that the Philadelphia and Atlantic City Narrow Gauge Company will operate it. It is believed that the road will be completed during the present season.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, July 1, 1880.

The Stock market since our last has been on the upward incline under a continued demand from the shorts and some buying for the July dividends, induced by the heavy earnings shown for June by the Trunk lines, particularly the northwestern lines, by reason of the heavy movement of the clique wheat, as explained elsewhere. This upward tendency continued until the early part of the calendar week when realizing sales began and some short sellers appeared who had been bulls, and since then the tide has set in the downward direction with everything on Wall St. of a speculative nature. There has been no break however, and temporary reactions have followed each decline, yet in each drop lower prices have been touched each time. The advance has now been large since the bottom prices were reached and after the payment of July dividends and the stocking of the grain movement alluded to, it will be strange if there is not more or less of an undoing of the late bull campaign, for it looks as if the controlling spirits of the market had squeezed out the short interest they held so tightly, and meantime had put out another line of shorts themselves which they are about ready to take in at lower prices, yet this reaction may be be delayed sometime yet, as the let up in the grain movement will not be visible in reported earnings for some time after it has occurred, which will not be much before the end of July, after which the movement

of the new crop will begin, but reported earnings will not show the falling off that is sure to come as compared not only with May, June, and July, but also with August of last year, when the wheat movement was enormous, for reasons that do not exist this year. For a fuller explanation of the prospects of the railroads for 1880-'81 based upon the crops see an editorial article on first page, which not only shows the changed conditions under which the stock market but all the produce markets must come with the new crop year.

There is no especial feature in Wall Street outside of those incident to the general situation explained above. As we then said the trunk lines stocks were most effected by the grain movement and hence the greatest strength and activity have been in those, led by Erie, which also led the decline as well as the advance, partially on the revival of the old rumors and their subsequent contradiction, that it was to be made a part of the Transcontinental system. The extent of the grain movement spoken of above is shown by the following:

The receipts of flour, wheat and corn at the seven Atlantic ports—New York, Baltimore, Philadelphia, Boston, New Orleans, Montreal and Portland—for the week ending June 26, are: of wheat 4,045,572 bushels; corn, 6,009,530 bushels; flour, 183,893 barrels. The exports from the same ports for the week are: 3 084,999 bushels of wheat, 4,038,502 bushels of corn, and 71,868 barrels of flour, and for the past eight weeks, 19,678,555 bushels of wheat; 20,240,992 bushels of corn; 643,933 barrels of flour.

Of course the Sterling Exchange market has been controlled chiefly by this movement, as we predicted in this article it would be several weeks ago, when money writers were ominously discussing the probable exports of gold in July or August in total ignorance or disregard of the operations of the Wheat Syndicate. Exchange has been plenty, dull, and lower therefore. Money has of course been easy at 3@4 per cent and has ceased to be a factor in the stock market of any importance. The Treasury purchase of bonds was bbt $1 000,000 Wednesday out of offerings of little over double that at higher prices.

Government bonds have been dull without material change or new features.

Railroad bonds have kept sympathy with stocks on the speculative list, and but little has been done in investments as they are not offered freely.

State bonds have been firm but dull without material change.

The bank statement was about the same.

The numbers and amounts of dividends declared this year for July show a material increase over last year same time and will no doubt when disbursed tell on the stock and bond market of all kinds and may put prices of same up still further this month and delay the reaction indicated above.

In view of the glut of wheat bills and decline in sterling exchange we now find some money writers predicting that we shall import gold in August as they did two months ago, that we should export gold instead. They are as wide of the situation now as they were then; for this extraordinary movement of grain for May, June and July cannot continue when the abnormal causes that produced it, cease to exist. Only another general disaster to European harvests can continue such exports.

Mining stocks have been weak for the most part with little change and almost featureless.

Other markets are in the condition noted in all our recent articles, the tendency still being downward on good crops, and especially wheat.

The closing quotations on Thursday were: Atlantic and Pacific Telegraph, 41@41¾; Burlington, Cedar Rapids and Northern, 62@63; Canada Southern, 56¾@57; Central of New Jersey, 66⅜@66½; Central Pacific, 71@72; Chicago and Northwestern, 91@91¾; do. pref., 108½@109; Chesapeake and Ohio, 17@18½; do. 1st pref., 24@27; do. 2d pref., 18@21; Chicago, Milwaukee and St. Paul, 79½@79⅜; do. pref., 105¼@105½; Chicago, Rock Island and Pacific, 107@107¼; Chicago, St. Louis and New Orleans, 28½@29; Cleveland, Columbus, Cincinnati and Indianapolis, 68⅞@69½; Columbus, Chicago and Indiana Central, 15½@15⅞; Delaware and Hudson Canal, 75½@76; Delaware, Lackawanna and Western, 77⅞@79; Hannibal and St. Joseph, 32¼@32¾; do., pref., 72¼@72¾; Houston and Texas Central, —@65⅞; Illinois Central, 104¾@105; Lake Erie and Western, 27½@28; Lake Shore and Michigan Southern, 107⅜@108½; Louisville and Nashville, 123@124; Morris and Essex, 105@106; Metropolitan Elevated, 93@93½; New York Central and Hudson River 127½@128½; New York, Lake Erie and Western, 40⅞@—; do. pref., 67¼@67½; New York, Ontario and Western, 27⅞@28¼; Northern Pacific, 25⅞@26¼; do. pref., 48½@48¾; Ohio Central, 20@21; Ohio and Miss. 32⅞@33; do. pref., 73@74; Pacific Mail, 39⅝@39¾; Philadelphia and Reading, 16¼@—; St. Louis and San Francisco, 33½@34; do. pref., 45½@46; do. 1st pref., 70@—; St. Louis, Iron Mountain and Southern, 45@45½; St. Paul and Sioux City, 41@42; do. pref., 75@76; Union Pacific, 86¾@87; Western Union Telegraph, 103½@103¾; Wabash, St. Louis and Pacific, 36⅝@37; do. pref., 64⅝@64⅞.

New York, Boston, Albany and Schenectady Railroad.

Articles of agreement and consolidation of the New York, Boston and Albany, the Boston, Hoosac Tunnel and Albany, and the Boston, Albany and Schenectady Railroads, under the title of the New York, Boston, Albany and Schenectady Railroad Co., have been filed with the Secretary of State. The consolidated company is to be managed by a Board of thirteen Directors, to be in office one year or until their successors are elected. The officers are: Erastus P. Carpenter, President; John W. Van Valkenburg, Vice President; Andrew V. Stout Treasurer; William S. Carman, Secretary, and Edward Appleton, Chief Engineer. The number of shares of capital stock is 92,600 of the par value of $100 each. The maximum capital stock of the New York, Boston and Albany Company is $7,000,000, that of the Boston, Hoosac Tunnel and Albany, $260,000, and that of the Albany and Schenectady $2,000,000. The first regular annual meeting is fixed for January 12th, 1881.

☞ The St. Louis, Arkansas and Texas Railroad Company has let the contracts for grading, masonry and tying of the road from Pierce City to Washburne, in Barry county, Mo., a distance of thirty miles. It will carry the new road to within seven miles of the Arkansas line. The road is headed for Fayetteville, in Arkansas. It is said the road will open up a most valuable, rich, and fertile section of country, which will become almost exclusively tributary to St. Louis.

☞ The track of the Shenandoah Valley railroad is now completed and construction trains running to the College of St. James, six miles south of Hagerstown. The bridge over the Potomac, at Shepherdstown, will be completed by the middle of July, and by the middle of August trains will be running regularly 100 miles south of Hagerstown.

☞ No less than thirteen cargoes of iron arrived in Philadelphia during last week, aggregating 5,374 tons of old rails, 5,157 tons pig iron, 505 of scrap and 77,797 bars. The imports of ore footed up 5,859 tons in five vessels.

☞ The Vicksburg (Miss.) Herald says that arrangements have been consummated in New York which will insure the speedy completion of the Vicksburg, Shreveport and Pacific railroad and its thorough equipment. Among the gentlemen composing the building committee are H. B. Plant, President of the Southern Express Company, Col. Wadley, President of the Central Railroad of Georgia, and Edward Hooper of Philadelphia.

☞ The very large increase in the receipts of the Grand Trunk Railway of Canada, exceeding since January 1 to date those of 1879 by more than $800,000, is accounted for principally by the connection at Port Huron, which insures an independent line to Chicago. The raising of the embargo on cattle passing through Canada has also enormously helped the revenue. The immigration and emigration to Manitoba and the Western States have swollen the general result to the tune of $200,000. The great development of trade in Canadian live stock exportation has also contributed much to the prosperity that has at last rewarded the company.

☞ Of the entire North Carolina debt to be funded, amounting to $14,166,045, the treasurer of the State announces that he has succeeded in retiring $6,461,445, for which, under the arrangement with creditors, he has issued 4 per cent bonds to the amount of $1,901,495 25. When the process of funding shall have been completed the outstanding 4 per cents will represent a sum of $1,000,000 and an interest charge of $160,000.

☞ The receivers of the Philadelphia and Reading Coal and Iron Company give notice that they will postpone until September 15, 1880, any announcement of their conclusion as to the question of payment of interest due July 1 upon the divisional coal land mortgage bonds of the company.

☞ The Denver and Rio Grande Railroad reached Malta, in the suburbs of Leadville, on the 29th inst., and will probably be in the city on the 3d inst. Ground was broken for the Leadville, Ten Mile and Breckenridge road on the 29th, which will be built this summer.

☞ The coupons of the first mortgage bonds of the Central Pacific Railroad Company, the Western Pacific Railroad Company and the California and Oregon Railway Company, due July 1, 1880, will be paid at the office of Fisk & Hatch.

☞ The rolling stock of the Vermont division of the Portland and Ogdensburg railroad was sold at auction on the 28th ult., by order of Court, and purchased by the St. Johnsbury and Lake Champlain Railroad Co. for $57,450.

☞ The checks for the July interest on the Government 4 per cent funded loan were mailed from the Department on the 28th ult. There are 56,896 checks, representing in the aggregate $5,281,009 05.

☞ The Hannibal and St. Joseph Railroad Company has declared a dividend of three per cent upon its preferred stock ($5,183,024), payable on the 2d of August.

☞ The President of Mexico has sanctioned the law allowing railroad companies to augment the width of the gauge to 4 feet 8½ inches if this is necessary for connecting with international or interoceanic lines.

Business of the Adams Express Co.

The Adams Express Company has the daily use and occupation of 21,216 miles of railroad, operated by 4,279 employes, who make 911 daily trips, amounting to 64,560 miles daily, and 19,884,420 miles annually, for a compensation amounting to $1,568,412 annually, and at an expense for transportation paid the railroad companies of $2,098,412 annually. The routes are divided among 155 different railroads, 11 steamboat lines and 9 stage companies. In 1878 the company carried for the Government and safely delivered $1,200,000,000, and in the year 1879 $661,000,000, and during the same year carried for the general public the sum of $11,050,000,000. It has received daily and transmitted from the New York office alone 14,000 packages.

Chicago, Rock Island and Pacific Railroad.

The gross earnings of the Chicago, Rock Island and Pacific Railroad for the years ending March 31, 1879 and 1880, were as follows:

	1879.	1880.
From passengers	$1 868,027 71	$2,318,462 20
" freight	6,929,925 99	8,035,165 29
" mail	151 298 29	198,519 03
" express	115,790 00	122,562 75
" rents, interest, etc	247,918 83	295,672 78
" mileage of cars	88,800 82	81 721 19
" telegraph	8,076 77	9,569 27
	$9,409,833 41	$11,061,662 46
Salaries of agents and clerks	$355,976 52	$342 570 72
General office exp		115,311 68
Books, printing and stationery	42 511 16	58,299 40

Repairs of telegraph	8,357 11	9,071 85
Missouri River Bridge tolls	77,949 31	88,166 45
Dining car expenses	34,671 10	39,681 80
Car service account	112,098 43	145,854 44
Exchange, interest and discount		1,511 67
	$4,961,716 79	$5,500 704 49
Taxes on real estate	218,155 70	295,841 62
	$5,079,872 49	$5,796,546 11
Net earnings	$4,329,960 92	$5,265,116 35

From this sum there has been paid:

For rentals of leased roads	$272,537 37
Interest on bonded debt	940,610 00
Dividends	2,097,990 00
Improvements, new equipment, construction of second track and branches	1,128,672 12
Leaving a surplus of	825,306 86
Total, as above	$5,265,116 35

Compared with the previous year the gross earnings of 1880 show an increase of $1,651,829 05, with an increase in expenses (including taxes) of $716,673 62, making the increase in net earnings $935,155 43. The percentage of operating expenses to gross earnings in 1880 was 49.73; in 1879, 51.67. Including taxes in each of those years, the percentages were 52.40 and 53.99 respectively. The average number of miles operated during the year 1880 was 1,257; average number operated during the previous year, 1,125—increase, 132 miles or 11.7 per cent.

	Miles.
The railroads owned or controlled under lease by this company at date of last annual report amounted to	1,231
Since acquired:	
Newton and Monroe Railroad (purchased)	17
Atlantic to Lewis, branch (constructed)	9
One-half interest in Hannibal and St. Joseph Railroad between Cameron and Kansas City (leased)	54
Total operated at date	1,311
Classified by States, as follows:	
In Illinois	235
In Iowa	851
In Missouri	223
In Kansas	2
Total, as above	1,311

The equipment of the road consists of 276 locomotives; 17 sleeping and 90 day coaches, all classes; 24 baggage, mail and express, 6 railway post office, 4 dining, 1 officers', 1 paymaster's, 3,611 box freight, 987 stock freight, 155 caboose and drovers', 1,408 platform and coal, and 631 gravel, hand and other cars used in repair of roadway, track and bridges.

The number of miles run by locomotives with passenger trains was 1,834,556; with freight trains, 6,436,743; with wood, gravel and construction trains, 676,737—total miles run by locomotives, 8,948,036, against 7,546,090 for the previous year, an increase of 1,409,946.

The total number of passengers carried was 1,905,418, of which 1,875,094 were first class, 7,471 second class, and 22,852 emigrant; 23,873 were through, and 1,851,544 way passengers; 940,011 were carried east, and 965,406 west. Total number of passengers carried one mile, 82,610,900, equivalent to carrying each passenger 44 miles. The number carried one mile in 1879 was 62,811,574, which was equivalent to carrying each passenger 42 miles. The average rate per passenger per mile was 2.806 cents, against 2.974 in 1879. The average for each passenger carried was: in 1880, $1 21½; in 1879, $1 24. Increase in number of passengers carried, 404 458, or 26.94 per cent; increase in movement of passengers one mile, 19,799,326, or 31.5 per cent, and the rate of increase in passenger earnings was 24.11 per cent.

A comparison of freight movement and earnings shows that there were transported during the past year 5,933,529,463 lbs. against 4,472,539,370 lbs. in the previous year, an increase of 1,460,990,093 lbs., equal to 32.66 per cent. The total paying freight carried one mile amounted to 664,861,579 tons, against 484,610,209 tons in the previous year, an increase of 180,251,370 tons, equal to 37.19 per cent. The average rate per ton per mile was 1.21 cents; last year it was 1.43 cents. The number of loaded cars moved East was 160,064; do. West, 134,351, a total of 294,418. The average car load was 10.154 tons. The increase in receipts was 15.94 per cent. The number of tons carried one mile for company's use was 21,597,375, which at the average rate received would have amounted to $261,828 28, but for which no charge was made.

The amount expended in improvements, etc., and charged to construction and equipment account, was $1,128,672 12; of this $213,865 48 were for construction of 23.633 miles of second track; $110,637 85 was for construction of branch railroads; and $424,526 84 for construction and purchase of equipment. Referring to the last two items, the report says:

The additions made to equipment consist of 4 heavy passenger engines; 1 standard freight engine; 6 Mogul freight engines; 6 pony switching engines, all except 2 constructed in this company's shops; 1 sleeping car; 6 first class passenger coaches; 3 baggage, mail and express cars; 426 box freight cars; 134 stock cars; 18 caboose or drovers' cars; 27 flat and coal cars; 8 cars for construction purposes. Of the above 102 box cars and 27 flats were purchased, the balance were built in this company's shop.

To protect the traffic and occupy territory contiguous to your main line in Western Iowa, your board deemed it advisable to authorize the construction of their branch roads, each averaging about 15 miles in length; two in a southerly direction, one from Avoca and the other from Atlantic, and one in a northwesterly direction from Guthrie Station to the county seat of Guthrie County. These lines are located mostly in valleys, are not expensive to build and can be cheaply maintained and operated. That branching from Atlantic is in use to Lewis, nine miles, and work is well advanced on all, insuring their completion during the summer.

In the month of December an arrangement was made with the Hannibal and St. Joseph Railroad Co., whereby this company obtain the right, for a term of 25 years, to run its passenger and freight trains from Cameron to Kansas City, together with the right to use jointly the freight depot, tracks and other facilities of the said Hannibal and St. Joseph Railroad Co. in Kansas City. The terms are briefly, interest at 7 per cent on one half the valuation of road used, one half the taxes, and a portion of the cost of maintenance proportioned to the train mileage of the parties using it. Bridge tolls over Missouri river substantially the same as at Atchison or Leavenworth.

An agreement was also made with the Union Passenger Depot Co., by which our trains and passengers are allowed to participate in the privileges and benefits of the Union Passenger Depot at Kansas City upon the same terms accorded to eight other railroad companies whose trains run to that point.

Under these arrangements through passenger and freight trains commenced to run between Chicago and Kansas City on the 5th of January with decided advantage to the traffic and earnings of this line.

A traffic contract has been made by which the Hannibal and St. Joseph Railroad take passengers and freight of the company between Cameron and the City of St. Joseph on fair and equitable terms.

Your company are now enabled to compete more successfully than before for a share of the through Southwestern business. This traffic is increasing largely in both passengers and freight. Kansas City being the most prominent business point in the Southwest.

Connections are made and through cars are run to Atchison and Leavenworth as heretofore.

On the 1st of January a contract was concluded with the Pullman Palace Car Co. whereby this company sell one half interest, and transfer to the Pullman Co. the control and management of their line of sleeping and parlor cars. The Pullman Co. pay this company one half the appraised valuation of the sleeping car equipment; and one half the net receipts, withdrawing all claims for infringement of sleeping car patents used heretofore by this company.

In view of the extensive ownership and control of sleeping cars exercised by the Pullman Co. on connecting and competing lines of railway, your board deemed it inexpedient to continue the independent operation of the sleeping car line by this company.

Should additional sleeping cars be required, under the terms of this contract the Pullman Co. are to furnish them—charging this company with half the cost, or if only occasionally required an agreed mileage rate.

The condition of the roadway, track and buildings has been materially improved during the past year, and was never in so good condition for doing business as now.

The steel rails in use have increased 17,090 gross tons. 2 283 tons were used in new second track, and 14,807 tons in renewals, the entire cost of this last item being charged in operating expenses. The steel rails purchased and laid by this company to date of this report amount to 74 852 gross tons, equal to 796 miles of track.

In the renewal of bridges, and the increase of capacity of water stations and other buildings, large expenditures have been made and a very marked improvement is manifest. In addition to the iron bridges and culverts of masonry previously referred to, 14,383 lineal feet of pile and trestle bridging, and 2,280 lineal feet of truss and girder bridges have been wholly or in part renewed, and cost charged to operating expenses.

In reviewing the detailed operations of the past year, showing that the volume of freight moved is more than doubled within three years, your board are convinced of the necessity of speedily completing a continuous second track from Chicag to the Mississippi River, and the importance of providing increased facilities and storage room for grain at Chicago and other terminal and junction points, and the board confidently appeal to the stockholders to ratify and approve a continuance of the policy herstofore pursued of applying a reasonable percentage of the net earnings to perfecting, extending and increasing the value of their property.

In conclusion the President, in his report says that the operations of the road for the past year have been conducted without serious accident or disastrous losses from fire or flood.

BALANCE SHEET, March 31, 1880.

Capital stock fixed, $25,000,000; amount issued		$20,979,900 00
Fractional scrip, convertible into stock		100 00

Auditor and Assistant Secretary.—C. F. JILSON.

The Coal Trade.

The total tonnage of anthracite coal from all the regions for the week ending June 19, as reported by the several carrying companies, amounted to 400,301 tons, against 575,082 tons in the corresponding week last year, a decrease of 174,781 tons. The total amount of anthracite mined for the year is 9,596,871 tons, against 11,133,699 tons for the same period last year, a decrease of 1,537,328 tons. The quantity of bituminous coal sent to market for the week amounted to 104,127 tons, against 88,714 tons in corresponding week last year, an increase of 20,413 tons. The total amount of bituminous mined for the year is 2 120 535 tons against 1,548,173 tons for the corresponding period last year, an increase of 572,362 tons The total tonnage all kinds of coal for the week is 504,428 tons, against 658,796 tons in corresponding week last year, a decrease of 154,368 tons, and the total tonnage for the coal year is 11,716,906 tons against 12,681,872 tons to same date last year, a decrease of 964,966 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the second week of June was 130,711 tons, of which 94,510 tons were coal and 36,201 tons coke. The total tonnage for the year thus far has been 3,124,387 tons of which 2,325,219 tons were coal and 762,967 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended June 19 were 42,044 tons, and for the year to that date 936,982 tons—265 489 tons over the corresponding period of 1879. The shipments to the Baltimore and Ohio Railroad for the week were 21,399 tons, and for the year 626,613 tons, an increase of 216,238 tons over 1879. The shipments to the Chesapeake and Ohio Canal for the week aggregate 16,901 tons, and for the year 201 135 tons, an increase of 17,202 tons as compared with last year. Shipments to the Pennsylvania Railroad for the week were 3,744 tons, and for the year 109,234 tons, an increase of 32,049 tons as compared with 1879.—Phil. Ledger, June 28.

☞ E. W. Cole has been elected Vice President of the Memphis and Charleston Railroad Company vice C. McGhee resigned, and will at once assume control of the entire consolidated line from Memphis to Bristol.

Payments by Installment.

In a case growing out of the sale of a sewing machine on the installment plan, recently decided by the Supreme Court of New Jersey, Judge Depew, in delivering the opinion of the court, held that, while the courts in some States had maintained the doctrine that upon a sale of chattels possession inconsistent with the actual title is, *per se*, fraudulent and void as against creditors and bona fide purchasers, that doctrine is not in force in New Jersey; that where the contract is for payment of the contract price on delivery, an unconditional delivery, without exacting payment, would be regarded as a waver of the condition, and in the absence of fraud the property would vest in the purchaser; but where the delivery was conditional, as in the case under consideration, where the parties had stipulated that the article should not become the property of the buyer until it was paid for, the seller retained the title until the money was paid; the property was not subject to execution at the suit of creditors of the buyer, and the title of the seller is preferred to that of purchasers from the buyer. The judgment of the court below was reversed.

☞ The first ambulance steamer ever built for marine hospital service is nearing completion at Dialogue's shipyard, Gloucester, N. J. In three weeks it is expected she will be plying in New York harbor, between the Battery and the Marine Hospital. She will be named John M. Woodworth in honor of the late Surgeon General of the Marine Hospital service.

☞ The Illinois Supreme Court has approved the judgment in the case of the people vs. the Illinois Central Railroad, holding that the State statute of May 2, 1873, to prevent extortion and unjust discrimination, is constitutional. Judge Dickey dissented.

☞ The bond of Wm. H. Crennel, the newly appointed Receiver of the Rochester and State Line Railroad, for $100,000, has been accepted by Justice Westbrook. The bond is signed by John W. Martin of Rochester and A. T. Soule, of Wayne county.

☞ The State Treasurer of Alabama has deposited in the Importers and Traders' Bank of New York, and in the Bank of Mobile, funds with which to pay the State interest due 1st July. About one-third of the State debt is held by Alabamians.

☞ A new side wheel steamer has been bought to run from Tom's River to Island Heights, 2½ miles, in connection with the Pennsylvania Railroad, and will run three times daily.

☞ The Governor of New York has signed the act amending the act in relation to reports by railroad corporations to the State Engineer and Surveyor.

☞ W. Scott Lasher has been appointed Division Engineer of the Eastern division of the New York State Canals, in place of E. Sweet, Jr., resigned.

☞ The Fall River, (Mass.) Board of Aldermen on the 21st inst, concurred with the Common Council in the order for the purchase of a portable stone crusher and engine at a cost of $2,500.

☞ Lord Cairns, London, has accepted the chairmanship of the Provisional Committee of the Reading Railway bondholders.

OFFICE OF THE CENTRAL PACIFIC RAILROAD CO., No. 9 NASSAU-ST., NEW YORK, June 26, 1880.

THE COUPONS OF THE FIRST MORTGAGE BONDS of the CENTRAL PACIFIC RAILROAD COMPANY, the WESTERN PACIFIC RAILROAD COMPANY and the CALIFORNIA AND OREGON RAILWAY COMPANY, due July 1, 1880, will be paid at the office of FISK & HATCH, No. 5 Nassau-st.

Holders presenting ten or more coupons will leave them for examination, in which case a receipt will be given and payment made on the following day.

C. P. HUNTINGTON, Vice-President.

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY, TREASURER'S OFFICE, GRAND CENTRAL DEPOT, NEW YORK June 26, 1880.

THE DIRECTORS OF THIS COMPANY HAVE this day declared a DIVIDEND of 4 PER CENT upon its capital stock, payable on the SECOND DAY of AUGUST next at this office. The Transfer Books will be closed at 3 o'clock p. m. on SATURDAY, the 3d day of July next, and will be reopened on the morning of FRIDAY, the 6th day of August next.

E. D. WORCESTER, Treasurer.

G. & N. C. Narrow-gauge R. R.

CONTRACTORS FOR CONSTRUCTING AND equipping railroads are invited to make proposals for constructing and equipping a narrow gauge road from the Town of Georgetown, S. C., to the North Eastern Railroad at a point 41 or 42 miles from Georgetown. The roadbed has once been graded the entire way with the exception of about four miles.

Contractors desiring to engage in such a work are invited to confer with Col. J. D. Blanding, the President of the road, who resides at Sumter, on the Wilmington, Columbia and Augusta R. R., from whom all particulars may be learned. Early work is desired.

By order of the Board of Directors.

R. E. FRASER, Acting Secretary.

MANUFACTURERS of Engineering and Telegraphic Instruments, 716 Chestnut St., Phila. (Two medals awarded by Franklin Institute, and one by Centennial.)

CARS FOR TWO HORSES COMBINING ALL Valuable Inventions, ELEGANT STYLE Light & Durable, Full Size AND REDUCED

CARS FOR ONE HORSE WITH or WITHOUT Platforms OR TO Swing on Trucks EVERY STYLE AND VARIETY

47 EAST 27TH STREET.

This Establishment commenced building STREET CARS in 1832, and is famed for superior ELEGANCE of workmanship and SUBSTANTIAL practical results.

Its location, in the PORT of NEW YORK, is most favorable for shipments, and its CARS, CONSTRUCTED in SECTIONS, may be ENTIRELY COMPLETED before being packed for transportation.

VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.

All know it is easy to make a Varnish that has the single quality of DURABILITY but Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined, and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts—shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted

Rubber Belting and Hose and Packing at lowest prices.

MANUFACTURER OF

Kerite Insulated Telegraph Wire and Cables

Of all kinds made to order, for Ocean, River, Aerial and Subterranean Lines.

The Kerite covering of these Conductors unlike any other, resists effectually the destructive action of Heat and Moisture, and the corrosive agents either in Earth, Air or Water.

☞ Special orders should state whether the Cable is to be exposed to Earth, Air or Water.

FACTORY—SEYMOUR, CONN. **Office, 120 Broadway, New York.**

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almost 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN, General Superintendent.
JNO. N. ABBOTT, General Passenger Agent.

PASSENGER CARS.

Of the Finest Finish, as well as every description of CAR WORK, furnished at Short Notice and at Reasonable Prices by the

HARLAN & HOLLINGSWORTH COMPANY, Wilmington, Del.

J. CURLEY,

New York, Friday, July 9, 1880.

Mr. Jewett and the New Erie.

President H. J. Jewett, of the New York, Lake Erie and Western Railroad Company, has but recently taken leave of absence from his arduous duties in order to recuperate his health by a trip to Europe. Mr. Jewett, though still in the prime of life, and ripeness of his judgment, has carried a responsibility and performed a task in railroad organization and management quite without an equal in this country. The duties of supervision and direction will devolve upon Mr. George R Blanchard, the Assistant President, and Mr. Robert Harris, General Manager. Mr. Jewett has made many friends both with the transporters who use the road, and among the officers of other roads with whom he must have dealings, sometimes of amity, and at other times of commercial rivalry, all of whom will wish him a safe journey and return in improved health and spirits. It is a significant sign of the enormous complexity of our modern trunk railway system that to whoever has the talent and endurance to reach the supreme management, there is the inevitable recompense of hard work and jaded powers. The past five years furnish several illustrations of the penalty which this distinction of "Railway King" carries with it. Nor is this confined merely to the official head; for the heads of departments are also over burdened with cares and anxieties and prematurely wear out.

The present is not an unfavorable moment to cast a glance at the great property which Mr. Jewett has had in trust. The old Erie road was for twenty or thirty years, in fact, a very useful medium for the conveyance of the local produce and the travel of New York State between the metropolis and the country it drains; but as a through route it was noticeable chiefly by its mischief. This was in part due to its wider gauge, and in part to the councils of its managers. During all that time its junior securities were little more than footballs of speculation. All the time, too, shrewd men recognized that it ought to be a great stem-end of a tributary system, and a magnificent, useful property. To bring it up to that standard was an Herculean task, the magnitude of which only those familiar with its management can appreciate. There were rings to be broken and obstacles to be thrust aside, in order to make the real earnings available; then the gauge of the road must be changed to conform with that of the national system, and for this a better basis of credit must be established. The gauge has been at last changed, so far as its main line division are concerned, and there remain now only a few of the less important branches, without through connections, to be narrowed. Upon these latter it is presumed, part, at least, of the old equipment will be worn out. The main line, including the Dunkirk and Buffalo forks, is now ready to interchange business with the two roads across Canada, with the Lake Shore at two points, and with the old Atlantic and Great Western (now New York, Pennsylvania and Ohio) at Salamanca, thus obtaining efficient connections to the west and southwest. It is safe to presume that it can reach the Chicago business by one or another of these connecting roads; but the time is ripe for a consolidation or unity of interests with at least two links of an independent Chicago line crossing Ohio.

There remain some improvements to be made to bring it up to the standard of its rivals on the north and on the south—the New York Central and Hudson River and the Pennsylvania. One of these is an efficient Boston connection, the rudiments of which are in existence; another is adequate terminal facilities for freight and passengers on both sides of the Hudson; perhaps, also, it would be found advantageous to reduce its maximum grades at two or three points, notably on the Western Division, so as to do away with supplementary power. These, with a gradual heightening of the tone and respectability of its salaried *personnel*, would leave the Erie conspicuous among the trunk lines of this country. It has still many part owners in England, whose faith in American institutions and men will be greatly strengthened when the burden of these alterations and improvements is passed and the road begins to earn, as well as pay, dividends for its stockholders.

The Erie has in times past, while conducting most of its transportation at a disadvantage, and much of it with fierce competition, earned over $20,000,000 per annum, in paper. Now that its relations with its neighbors are satisfactory (much more so than ever), and it is nearly or quite abreast of them in point of economical handling, there is no good reason visible why its earnings should not soon reach $25,000,000 per annum, the equivalent of gold, with a decreased ratio of operating expenses. There is business for all the existing trunk lines, and under the present astute management no doubt Erie will have its proportion.

☞ The first month's business of the receivers of the Philadelphia and Reading Companies has been audited by the masters. The audit is for the period between May 25 and June 22, inclusive. The account shows that the railroad had but $1,849 and the Coal and Iron Company $3,465 cash when the suspension occurred. The receivers during the month received in the railroad account $2,719,014 74, including $1,000,000 borrowed money, and they paid it all out for current expenses and interest excepting a balance of $151,803 47. In the Coal and Iron Company's account they received $417,043 35, and paid it all out for current expenses and interest but $10,848 65. The payments for wages, salaries and

contingent expenses on account of Railroad Company were $862,602 20, and for interest, &c., $1,856,412 53. The account of the Coal and Iron Company shows the payments for wages, interest, &c., $406,194 70. The interest payments made were $756,887 on account of the railroad and $39,654 on account of the Coal and Iron Company.

The Nicaraguan Ship Canal Co.

The full text of the interoceanic canal concession granted by Nicaragua to the American Provisional Society has been received at Washington. It is signed by Don Adam Cardenas, Minister of Foreign Affairs, and Mr. A. G. Menocal, member and Commissioner of the Provisional Society. The concession has been duly ratified by the Nicaragua Senate, and published as a law by the Republic. The Provisional Society, under the terms of this concession, secures the exclusive privilege to construct a ship canal across the territory of Nicaragua.

The canal is to be of sufficient dimensions to accommodate steamers of the largest class used between Europe and America, and the locks are to be not less than 500 feet long and 28 feet deep. The concession is for 99 years from the date of the opening of the canal for general traffic, and at the expiration of that period the Nicaragua Government is to take possession of the canal in perpetuity, with the right reserved to the company to lease it for another 99 years.

During the period of the concession the company is to have the privilege of constructing a railway along the whole or any part of the canal; also, such telegraph lines as it deems necessary for the construction and working of the canal, and these lines shall transmit public messages free of charge. The Government of Nicaragua will declare the terminal ports and the canal itself, throughout its length, to be neutral, and that the transit in case of war between other powers and Nicaragua shall be uninterrupted. In general, the canal shall be open to free navigation of all vessels, provided they pay the dues and observe the regulations of the company. Troops of foreign nations and vessels of war will be allowed to pass through the canal under regulations of existing treaties. Vessels of war belonging to other nations engaged in hostilities with Nicaragua or any other Republic of Central America will be vigorously excluded. An effort will be made to secure a guarantee from all powers of the neutrality of the canal, and of a zone along it, and of the sea in the vicinity of the terminal ports where dimensions will be defined.

This concession, with all its advantages and privileges, will appertain to a construction company, and is transferable only to the company which is to be organized by the Provisional Society, and in no case can it be tranferred to a foreign Government or power. It is to be organized in the usual manner of such enterprises, with its principal office in New York or elsewhere, as it may deem most convenient. Its designation will be, "The Nicaragua Ship-canal Company."

The company is to be allowed to bring immigrants to Nicaragua freely from all parts of the world, but it is required to bind itself not to interfere in questions which, directly or indirectly, may affect the public peace of Nicaragua, and not to give protection to criminals or disturbers of the peace. It is exempt from every form of taxation during the period of this concession. The remainder of the document refers to routine matters.

Capt. Phelps, the President of the Provisional Society, is now in Europe for the purpose of arranging for an early commencement of the work.

Philadelphia and Reading Companies.

A bill in equity was filed in the United States Circuit Court Philadelphia, on the 1st inst., for a foreclosure of the $60,000,000 general mortgage loan issued by the Philadelphia and Reading Railroad Company in 1874, in which the Farmers' and Mechanics' National Bank is the complainant as the holder of $15,000 of the said mortgage loan. The bill prays:

First—That the said mortgage of the Philadelphia and Reading Railroad Company of July 1, 1874, to secure the general mortgage loan of 1874 for $60,000,000, be decreed to be a lien upon the railroads, branches, leasehold interests, franchises, and all other property, real and personal, in the said mortgage described.

Second—That the amount due upon the bond, principal and interest, intended to be secured by the said mortgage of July 1, 1874, be, at such time and in such manner as the court shall direct, ascertained and determined.

Third—That a decree be entered directing the defendants, the Philadelphia and Reading Railroad Company, to pay what shall appear to be due upon taking such account by a certain day, to be named by the court.

Fourth—That in default of such payment it be decreed that the Philadelphia and Reading Railroad Company, Edwin M. Lewis, Trustee, and all persons claiming them to be absolutely barred, and foreclosure of and from all right and equity of redemption in and to the said premises, and that a decree of this court—in connection with such auxiliary decrees to be obtained in other courts, if such decrees should be necessary, in order to vest a valid title to the whole mortgaged premises in the purchases thereof—be entered, directing the sale of the whole mortgaged premises as one property, and in such manner, by such Master, or other officer or person, and the purchase money to be paid and adjusted or settled as the court may direct, appoint, or deem proper.

Fifth—That a Receiver or Receivers be appointed to take custody of the property of the Philadelphia and Reading Railroad Company and the Philadelphia and Reading Coal and Iron Company, with such power and authority for the preservation and use of the same as to the court shall seem best adapted to protect the interests of all persons having any interest therein; or that the Receivers heretofore appointed may be ordered and directed to take, receive, and hold the said property, and to continue the same business of the said corporation for the benefit and account of the bondholders secured by the said general mortgage.

Sixth—Such other and further relief as the court may deem proper.

Seventh—That the said Philadelphia and Reading Railroad Company, the Philadelphia and Reading Coal and Iron Company, the Fidelity Insurance, Trust, and Safe Deposit Company, each under its respective corporate seal, and the said Edwin M. Lewis, may be required to answer all and singular the matters hereinbefore stated.

This proceeding is, in all probability, the beginning of the legal processes necessary to the reorganization of the companies, and the bill indicates that it is in the interest of the company and all its creditors, and that the step is taken at the suggestion of the present management. The bill does not seem to antagonize any purpose of the receivers, and it also asks that the entire property be kept intact and sold as one property.

Mr. John C. Bullitt is the counsel for complainant, and also counsel for the committee of English bondholders. The President of the Farmers' and Mechanics' Bank is Mr. Edwin M. Lewis, who is also one of the receivers.

Continuous Brakes on British Railways.

Figures which have lately been laid before Parliament show that up to the first of the current year not more than 23 per cent of the whole number of engines and 28 per cent of the whole number of passenger cars were fitted with continuous brakes. Some of the brakes returned as continuous are not properly so classed; they are only sectional, or cannot be applied by the engineer, or are not automatic when a train becomes divided. Such an entire lack of uniformity prevails that cars are sometimes seen fitted with two different forms of continuous brakes for use on the different lines on which they are destined to travel; and quite as often both forms of brake are rendered useless by the fact that the car in question is attached to other cars which contain neither brake. The Railway Department of the Board of Trade has lately addressed a circular letter to the several railway companies, in which the defects and dangers of their present policy are pointed out, and the companies are admonished to take immediate measures for supplying their engines and cars with continuous brakes of uniform action. The letter concludes thus:

The Board of Trade are now, as heretofore, most desirous that action should be taken in this matter by the companies themselves, and that the interposition of Parliament should be thus rendered unnecessary. But it is obvious that such a state of things cannot be allowed to continue indefinitely, and that, if the companies fail or decline to act in the matter, steps no doubt will be taken to compel them.

Under these circumstances, the Board of Trade desire again to press this subject on the earnest attention of your company, and at the same time to request that they will, on or before the 31st day of July next, inform the board, not only what steps they are taking to adopt continuous brakes, but whether they will give an undertaking that the passenger trains on their line shall, within a period to be named in their reply, be fitted with brakes of the description which is contained in the schedule to the act of 1878, viz., (1) Brakes instantaneous in action and capable of being applied by engine driver and guards; (2) self-acting; (3) capable of being appliedto every vehicle of a train; (4) in regular use in daily working; (5) materials employed of a durable character, easily maintained and kept in order.

Wear of Rails on an Incline.

On a down grade 1 in 38 on the Aachen railroad in Germany, the amount of real wear per 1,000,000 kilometric tons (of 2,205 lbs.) gross weight was 3,059 in., so that a rail was completely worn out in five years. On August 10, 1878, as an experiment, cast-steel brake blocks were substituted for the wrought iron ones on the left side. On taking measurements May 6, 1879, it was found that the left rail was worn down 0.287 in., the right rail 0.35 in., while formerly the rail on the right side was least worn. For the sake of obtaining a certain result, the brake-blocks were exchanged right with left, on the 6th of June, and the height of the rail (twenty lengths on each side of the track) carefully measured. According to the measurements made Sept. 13 and Nov. 24,

1879, the wear on the steel-brake block side amounted to 0.05 in.; on the side where the wrought iron blocks were used, 0.086 in., per million tons gross load. On a down grade of one in seventy-five between Heissen and Mulheim, the real wear, with a gross load of 24 million tons, amounted to 0.507 in., in the eight years. The chief engineer of the road can only attribute the enormous amount of wear to the fact that the soft wrought iron blocks hold the wheels perfectly tight, while the hard steel has not such a grip on them, they occasionally slip round, and less friction results to the track.

Pennsylvania Railroad.

From the report of Mr. Frank Thomson, General Manager of the Pennsylvania Railroad, we learn that the entire number of locomotives in daily use on the main line and on the Philadelphia and Erie and United Railroads of New Jersey division is 1001. Of the 925 passenger cars 587 are first class. The freight equipment consists of 18,311 cars, and the maintenance of way equipment 2,100 cars—showing a total of 21,336 freight and passenger cars. There are also 18,730 cars running over the various lines, owned by individuals and companies, including 1000 Railway Equipment Trust cars, 2500 Car Trust, 500 Railway Car Trust, 3406 Empire Car Trust, 1308 Tank Car Trust cars, and 4153 Union and National Line cars. On the Pennsylvania Railroad division the total gross earnings of 1879 showed an increase over 1878 of $1,426,488 45, or 7 per cent. The earnings from passengers increased 6.1 per cent; the earnings from freight increased 7 per cent, and the net earnings increased $536,951 53 or 6.1 per cent. The expenses showed an increase of 7.61 per cent. Two general reasons are given for this increase in the expenses: first, the increase of 23.37 per cent in the tons moved one mile; and second, the advance in the price of supplies of all kinds in the latter part of the year. Mr. Thomson says:

It is gratifying to again call attention to the large increase in tonnage and the comparatively small increase in expenses, which result clearly vindicates the policy of placing and maintaining the tracks and rolling stock in superior condition. The cost of moving freight per ton mile was reduced to 427-1000 of one cent, the lowest figure ever reached on this division.

There were moved in 1879 13,684,041 tons of freight over the Pennsylvania Division, 5,052,995 tons over the New Jersey Division, and 4,130,126 tons over the Philadelphia and Erie Division. In the movement of this unprecedentedly large amount of tonnage during the year, it is particularly gratifying to us to learn that there was no serious accident resulting in loss or damage to freight in transit, and no loss of life from any cause which could be controlled by the company.

☞ The Sacramento Record-Union says concerning the rolling mills projected some seven or eight months since for erection by the Central Pacific Railroad Company on its grounds in that city, that it is now certain that the construction of the works will be carried forward and completed before the next rainy season sets in. The plans have all been drawn, and most of the patterns for the heavy castings are finished. It is probable that the casting for the machinery will be begun in a few days. The new works will be located between the railroad tracks at the northeast end of the foundry and the shops.

Chicago, Rock Island and Pacific Railroad.

LAND OFFICE, DAVENPORT, April 1, 1880.

HUGH RIDDLE, ESQ., President:

SIR:—The following report of the business of this office for the fiscal year ending March 31, 1880, is respectfully submitted.

The conveyances and contracts to convey lands certified to this company by the United States, have, during the year, amounted to 86,860.46 acres, for a total consideration of $747,691.28.

Of the above, however, 201.10 acres were of lands to which there were opposing claims, and which we conveyed by quitclaim; the consideration received being $212.94.

This leaves the regular sales of land 86,656.36 acres for $747 478.34, the average price received being about $8 62½ per acre.

Lots in the town of Audubon have been sold during the year to the amount of $13,891. The county seat was removed to this town at the election in last October, and the removal has already enabled the company to dispose of large quantities of land to actual settlers in the northern part of Audubon county. As an inducement this company has built and leased to the county, for five years, free of charge, a commodious brick building for a Court House. The cost of this, about $9,000, has been charged to the town account with the other expenses attending the town property, but the amount is an asset of this company, and the building will undoubtedly be worth its cost at the expiration of the lease to the county.

The amount of interest and premiums received during the year was $75,060.11.

The bills receivable, after deducting those canceled, have increased until they stand, on March 31, 1880, at $1 203 625.81, an increase during the year of $377,885.30.

There has been remitted to the Treasurer of the company at New York, from the sales and collections, a total sum of $350,000.

The taxes paid during the year on lands unsold, Nov. 1, 1879, were $39,554.48; the number of acres being 267,840.68, the average tax per acre for the year 1879 being thus 14⅔ cents, nearly.

The favorable result of last year's harvest in Western Iowa, being the first after the opening of the Audubon and Harlan Branches, and the efforts that have been made by advertising, employment of agents, etc., have enabled this office to report a large increase in its business over any previous year; and with very few exceptions, all its sales have been to actual settlers for immediate occupation. The number of acres unsold is now about 185,000, and should another good crop be the result of this year's husbandry, the great bulk of the more desirable lands now remaining will undoubtedly be disposed of this season.

Very respectfully,
J. L. DREW,
Land Commissioner.

☞ Judge McKennan, of the United States Court, sitting at Pittsburg, Pa., on the 2d inst. extended the original order by which the receivers of the Philadelphia and Reading Companies were appointed, so as to cover the bill filed on the 1st instant on behalf of the general mortgage bondholders. Judge McKennan made the original order at Pittsburg on the 24th of May.

☞ The Paterson (N. J.) Press of 19th ult. says that during 17 working days of that month there were turned out from the Rogers Locomotive and Machine Works several engines for the New York, Woodhaven and Rockaway Railway, one for a Florida railroad and two for the Wabash, St. Louis and Pacific; also, several for the Cairo and Vincennes Road from Grant's, and several for the International Railway, Canada, and for the Canada Central Railway, from Danforth's. Work at the shops continues brisk and the prospect encouraging.

Delaware and Bound Brook Railroad.

From the annual report of this company to New Jersey Legislature we learn that during the past year there has been additional capital stock issued to the amount of $70,000, the floating debt has increased to $299,600—an addition of $19,980 during the year—and the cost of the road is figured at $1,522 more. There has been an increase of $4,039 in the passenger receipts, $33,658 in the freight earnings, and a decrease of $1,438 in the miscellaneous receipts, so that the gross earnings foot up $310,469, against $270,570 for the previous year, a gain of $29,899, or a little more than 10 per cent. The cost of working the road has increased $15,665, or 9 per cent to $167,213, making the net earnings $143,276, a gain of $24,254, or 20 per cent. The Reading Company paid the interest upon the bonded debt, $105,000, and upon the floating debt, say 6 per cent, or $18,000, leaving $20,276 toward meeting the dividend of 6 per cent, which was guaranteed, and required the sum of $47,532. The deficit on the lease was, therefore, $27,256, which is a trifle less than a thousand dollars a mile. The Reading guaranteed 6, and the road earned a surplus of 1⅓ per cent.

☞ The contract for building the Baltimore and Cumberland Valley railroad has been awarded to Jacob Humbird, of Cumberland, Md. Active operations will soon be commenced, if the right of way can be obtained, and it is thought the road which will be from Waynesboro' to Shippensburg, by way of Chambersburg, a distance of 26 miles, will be completed by July 1, 1881. The company was incorporated by the State of Pennsylvania, June 25, under the name of the Baltimore and Cumberland Valley Railroad Extension Company, Hon. David Wills, of Gettysburg, president. An engineer corps commenced operations on Tuesday last between Waynesboro' and Chambersburg.

☞ The stockholders of the Pittsburg, Titusville and Buffalo Railroad Company adopted almost unanimously the joint agreement of consolidation and merger of that corporation and the Buffalo and Southwestern Railroad Company; but the stockholders of the Buffalo and Southwestern Railroad refused to ratify the scheme for a consolidation with the Pittsburg, Titusville and Buffalo Railroad.

☞ The Central Pacific Railroad Company will pay a dividend of $3 00 per share on and after August 1st on presentation of Dividend warrant No. 10 at the office of the company either in San Francisco or New York. Books closed July 15 to Aug. 1, inclusive.

☞ The Herkimer, Newport, and Poland Narrow Gauge Railroad Company was organized in Herkimer, N. Y., on the 6th inst., a capital of $88,000 being subscribed, and 10 per cent paid in. Thomas W. Spencer, of Utica, President. The road is about 10 miles long.

☞ The first section of the Guatemala Central Railway is about to be opened.

☞ In the matter of the appeal of the State of Illinois from the decision of the Commissioner of the General Land Office, rejecting her claim for indemnity for many thousand acres of alleged swamp lands patented by the United States to the Illinois Central Railroad Company, Secretary Schurz decides in effect that Sections 2 and 7 of the Revised Statutes made no change in the Act of September 28, 1850, granting swamp lands to the State of Illinois; and that the decision of Secretary McClelland that the sections in question were not included within the swamp land grant must stand as the Interior Department's construction of the original Act. He therefore affirms the decision of the General Land Office.

Statement of the Public Debt of the United States, July 1, 1880.

Interest paid by United States, $45,651,155 94; interest repaid by transportation of mails, &c., $13,615,292 55; interest repaid by cash payments: 5 per cent net earnings $555,198 87; balance of interest paid by United States $31,380,664 52.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, June 30, 1880.

JOHN SHERMAN,
Secretary of the Treasury.

☞ The Great Eastern Gold Mining Company of New York has declared a dividend of 1 per cent on the capital stock, amounting to $3,000, payable July 15. The gold product of the mine for June was $16,894. A considerable portion of this amount was devoted to improvements, besides leaving nearly $3,000 in the treasury, after paying the dividend.

☞ The ore shipments of the Little Chief for June, up to the 27th, aggregated 2,217 tons, the net yield being something over $114,000, or an average of $51 50 per ton. This is the highest average made from the mine. The shipments on Friday and Saturday were 180 tons.

☞ The Ontario Silver Mining Company has declared its fifty-seventh dividend of 50 cents per share (for June), payable at the office of Wells, Fargo & Co., on the 15th of July.

☞ The product of the Homestake (Black Hills, Dakota) for June was over $123,000 gold. This product is larger by $5,000 than last month's.

☞ Work is still being vigorously pushed on the Canada Pacific Railway in British Columbia.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, July 8, 1880.

The money market remains easy at 2@3 per cent for call loans, 2@4 per cent for time loans and 3@4½ per cent for prime mercantile paper. The posted rates of the leading drawers of sterling are 4.85@4.87½. The actual rates are 4.84@¼ and 4.86¼@½. Cable transfers are 4.86¾@4.87. Prime commercial bills are 4.82½@¾.

The public debt statement, issued on the 1st inst., shows a decrease for the month of June of $10,214,424, which includes $8,375,934 fractional currency, estimated to be lost or destroyed, and applied to the payment of arrears of pensions, per act of June 21, 1879. Cash in Treasury, $201,088,622; gold certificates, $8,004,600; silver certificates, $12,374,270; certificates of deposit outstanding, $14,465,000; refunding certificates, $1,867,000; legal tenders outstanding, $346,681,016; fractional currency outstanding, $7,214,954.

The total amount of the public debt on the 30th ult. was $2,143,260,918 22, and the cash in the Treasury $201,088,622 88, leaving net $1,942,172,295 34. The debt was reduced $85,034,961 02 in the past year. Of the bonded debt $235,780,400 bears 6 per cent interest, $484,864,900 bears 5 per cent, $250,000,000 bears 4½ per cent, $739,347,800 bears 4 per cent, and $14,000,000 bears 3 per cent. Interest has ceased on $7,621,455 26, and $388,800,815 37 bears no interest. The available cash balance in the Treasury over current liabilities is $155,440,458.

The statement of the Comptroller of the Currency July 1, 1880, shows the amount of national bank notes and of legal tender notes outstanding at the dates of the passage of the acts of June 20, 1874, January 14, 1875, and May 31, 1878, together with the amount outstanding at date, and the increase and decrease. National bank notes: Amount outstanding June 20, 1874, $349,894,182; amount outstanding January 14, 1875, $351,861,450; amount outstanding May 31, 1878, $322,555,965; amount outstanding at date (circulation of national gold banks not included, $1,347,490), $348,157,957; decrease during the last month, $678,306; increase since July 1, 1879, $14,983,740. Legal tender notes: outstanding June 20, 1874, $382,000,000; do., January 14, 1875, $382,000,000; amount retired under act of January 14, 1875, to May 31, 1878, $35,318,984; amount outstanding on and since May 31, 1878, $346,681,016; amount on deposit with the Treasurer of the United States to redeem notes of insolvent and liquidating banks and banks retiring circulation under act of June 20, 1874, $19,782,387; increase in deposit during the last month, $260,664; increase in deposit since July 1, 1879, $7 646,689.

The receipts of internal revenue for the month ending June 30, were $10,292,052 62, and for the fiscal year, $123,623 251 22; customs receipts for the month, $14,699,776 76, and for the fiscal year, $185,103,611 09; an increase over last year of $10,061,640 64 from internal revenue and $47,858,563 39 from customs.

The total coinage of the United States mints during June amounted to 4,878,488 pieces, valued at $6,414,306. The total coinage for the twelve months which ended on the 30th ult., was 60,928,112 pieces, valued at $84,870,144. This includes 27,933 750 standard dollars.

The Treasurer of the United States has called in all certificates issued by the late corporation of Washington, numbered from 428 to 445, inclusive, and those issued by the District of Columbia, numbered from 1 to 21, inclusive. These bonds will be paid at the United States Treasury on the 15th instant, after which date interest on the same will cease.

The Comptroller of the Currency has, during the fiscal year ending June 30, 1880, paid forty-four dividends to the creditors of thirty-three insolvent national banks, amounting in all to $1,680,000. The total dividends paid since the organization of the national banking system is $16,915 000 upon proved claims amounting to about $25,000,000. The dividends paid equal 67.66 per cent of the amount of the claims. Assessments in all amounting to $6,801,750 have been made upon the shareholders of insolvent national banks for the purpose of enforcing their individual liability, of which amount about $2,000,000 has been collected.

The Secretary of the Treasury has decided to suspend his purchase of bonds for the present.

The demand for investment securities continues large and, so far as railroad securities are concerned, is encouraged by the profitable business of the leading roads. State bonds are dull and steady. Railroad shares weak and lower.

The closing quotations on Thursday were: Atlantic and Pacific Telegraph, 40⅝@41⅛; Canada Southern, 57@58⅛; Central of New Jersey, 65⅛@65⅝; Central Pacific, 73@—; Chicago and Northwestern, 87⅛@87⅜; do. pref., 107⅛@108; Chicago, Burlington and Quincy, 120@120½; Chesapeake and Ohio, 15¾@18; do. 1st pref., 22@25; do. 2d pref., 16⅛@21½; Chicago, Milwaukee and St. Paul, 74⅛@74¼; do. pref., 103@104; Chicago, Rock Island and Pacific, 103¼@103½; Chicago, St. Louis and New Orleans, 27@28; Cleveland, Columbus, Cincinnati and Indianapolis, 63½@64¼; Columbus, Chicago and Indiana Central, 15¾@16; Delaware and Hudson Canal, 74@74½; Delaware, Lackawanna and Western, 76⅛@76¼; Hannibal and St. Joseph, 31½@32; do., pref., 70½@71; Houston and Texas Central, —@65½; Illinois Central, 104⅞@105⅛; Lake Erie and Western, 27¼@27½; Lake Shore and Michigan Southern, 101¾@101⅞; Louisville and Nashville, 124¼@124½; Morris and Essex, 105@105¼; Metropolitan Elevated, 90@93; Michigan Central, 87@87¼; New York Central and Hudson River 128@128¼; New York, Lake Erie and Western, 39¼@39⅜; do. pref., —@65⅜; New York, Ontario and Western, 26¾@27; Northern Pacific, 25@25¼; do. pref., 46¾@47¼; Ohio and Miss., 31½@31¾; do. pref., 70½@72; Panama, 180@180; Pacific Mail, 38⅞@39; Philadelphia and Reading, 14¾@15¼; St. Louis and San Francisco, 33@34; do. pref., 45@45½; do. 1st pref., 69@71; St. Louis, Iron Mountain and Southern, 44½@45; St. Paul and Sioux City, 35@36; do. pref., 69@71; Union Pacific, 87@87½; Western Union Telegraph, 103⅞@104; Wabash, St. Louis and Pacific, 35½@35¾; do. pref., 63⅝@64.

The following quotations of sales of Railway and other securities, for the week, are in addition to those given elsewhere in our columns:

The following securities have been placed on call at the New York Stock Exchange :

$4,040,000 Chicago and Northwestern Sinking Fund 6 per cent bonds of 1879. This is part of the $15,000,000 issue previously authorized and is secured by the first mortgage bonds, in like amount, of the following companies, whose railroads have been built or accquired or are in course of construction, viz: Dakota Central Railroad, 120 miles at $15,000 per mile, $1,800,000 ; Toledo and Northwestern Railway. 67 miles at $15,000 per mile, $1,005,000 ; Stamwood and Tipton Railway, 8 miles at $15,000 per mile, $120,000; Chatfield Railroad, 11 miles at $15,000 per mile, $165,000 ; Menominee Railway, 10 miles at $15,000 per mile, $150,000 ; Sheboygan and Western Railway, 80 miles at $10,000 per mile, $800,000— total, $4,040,000. Total railroad as above 296 miles; 516 of which are at $15,000 per mile and 80 at $10,000 per mile. None of the Chicago and North-Western Railway Company Sinking Fund 6 per cent bonds of 1879 can at any time be issued unless previously secured by first mortgage bonds on additional completed railroad actually built or acquired.

Louisville and Nashville Railroad.

The operations of the Louisville and Nashville Railroad Company for the year ending June 30 are given below :

Gross earnings	$7,299,000
Operating expenses	4,132,000
Net earnings	$3,167,000
Interest on bonded debt	2,076,000
Leaving	$1,091,000

or $11,000 more than 12 per cent on the capital stock for the year. From this was paid in February last a dividend of 3 per cent, and the board has declared a dividend of 5 per cent, payable August 2, leaving 4 per cent to credit of sinking fund and surplus accounts.

The following is a comparative statement for the years ending June 30, 1879 and 1880, of the Louisville and Nashville Railroad and branches—Nashville and Decatur and South and North Alabama railroads—and Evansville, Henderson and Nashville divisions, from Aug. 1, 1879, to June 30 1880 :

	Gross Earnings.	Operating Expenses.	Net Earnings.	Interest.
Year ending Jun. 30, '79	$5,387,600	$3,155,800	$2,231,800	$1,886,000
Year ending Jun. 30, '80.	6,249,000	3 416,000	2,833,000	1,881,000
Increase for year ending Jun. 30, 1880...	$861,400	$260,200	$601,200	*$5,000
E., H. & N. for 11 mos ...	648,000	429,000	219,000	120,000
Increase, including E., H. & N.	$1,509,400	$689,200	$820,200	$115,000

* Decrease.

The gross earnings of the Louisville and Nashville road for the month of June show an increase of $338,000 as compared with last year.

☞ During the month of June the Worthington pump at the City Mill, Wilmington, Del., ran 26 days, 500 hours, made 403,566 revolutions and raised to Cool Spring reservoir 129,141,120 gallons ; an increase of 24,162,940 gallons over last year. During the past six months this pump has raised 617,970,880 gallons, an increase of 46,484,480 gallons for the same period last year. The Worthington pump No. 2, at Cool Spring reservoir, ran 28 days, 313 hours, made 872,355 revolutions, and raised to Rodney street reservoir 12,457,229 gallons.

☞ The Baltimore and Cumberland Valley Railroad Company was recently organized at Chambersburg, Penn. This road is to extend from Waynesboro', Pa., through Chambersburg to Shippensburg, Cumberland county, a distance of 26 miles. 8,014 shares of the capital stock of the road, amounting to $150,700, have been subscribed for.

☞ The Chilian Times says that the Canal de la Merced has been completed. The canal is 75 miles long, and has been 25 years in construction. It has cost about $400,000, and may be considered as one of the most important works yet executed in that country.

Cape Cod Canal.

In compliance with that provision of the act amending the charter of the Cape Cod Ship Canal Company, passed by the Massachusetts Legislature of 1880, requiring the filing of a new location of the canal to the satisfaction of the Railroad Commissioners on or before the 1st of July, there was submitted to those gentlemen, by the directors of the company, on the 28th ult. the documents required of them, to which an approval was given ; on the succeeding day they were filed in the office of the County Commissioners of the county of Barnstable. They specify that the canal is to extend from the land of Eben Wright at Cohasset Narrows through Monument River until the centre of the neck of land has been reached. Thence there is a choice of routes, one ending at Sias-et, the other in Sandwich Harbor. Both of these avoid the village of North Sandwich, unlike those that have previously been fixed upon, so there will be no interference with the water power of that community. The dredgers are at the southern end of the surveyed route, and it seems probable that the work of excavation will be commenced almost immediately.

☞ A new railroad company was organized at Burlington, Kansas, on the 18th ult., to be known as the Ottawa, Burlingame and Council Grove Railroad and Telegraph Company. The capital stock is placed at $1,000,000. The preliminary surveys have been made. It is stated that ample aid will be voted by the people and that the road will undoubtedly be built at an early day.

☞ The gross earnings of the Augusta (Ga.) cotton factory for the year just closed were $968,182, and the net earnings $157,471, which, after paying nine per cent dividend for the year, interest, insurance, &c., left over $50,000 to be added to the surplus fund, which now aggregates $318,198.

☞ When the Nevada Central Railroad from Battle Mountain started its monthly earnings were $6,000 and its pay-roll $14,000. It is claimed now that its monthly earnings are over $14,000 and its monthly expenses about $8,000. It is expected that the road's monthly earnings will be swelled to $18,000.

☞ The contract has been let for the construction of the Valley Railroad, which is to extend from Portsmouth, Ohio, to Ashland, Ky., the work to be commenced immediately.

☞ The Vermont Division of the Portland and Ogdensburg Railroad was taken possession of on the 1st inst. by the St. Johnsbury and Lake Champlain Railroad Company.

☞ The track of the Ohio and West Virginia railroad was laid through Campbell tunnel on the 1st inst., which is twelve miles south of McArthur.

☞ The Mobile and Ohio Railroad is to be extended from Columbus, Ky., to East Cairo, by December 1, 1880.

☞ The survey of the projected branch of the London, Huron and Bruce Railway, to connect Lucan with London, has been commenced.

A Large Locomotive.

The largest locomotive ever built in any of the Lehigh valley shops was recently turned out of the shops of D. Clark & Co., of Hazleton. This engine was designed expressly to take passenger trains across the mountain, on the main road, and it is expected it will do the same work in ascending the mountain which has heretofore required the power of two engines combined. Its total weight with tank is 40 feet 2 inches, width 8 feet 6 inches, height from the rail 14 feet 2 inches. The cylinders are 20 inches in diameter with 24 inches stroke. It has four driving wheels 5 feet 8 inches in diameter. The grate surface is 73½ square feet; the total heating surface is 1220 square feet. The water capacity is 3200 gallons. It was built with a view solely to power and speed and it is confidently believed that it will pull a heavy passenger train at the rate of one mile a minute.—[Hazleton, Penn., Bulletin.

☞ A certificate of incorporation has been filed with the Secretary of State of Ohio of the Cincinnati Northern Railway Company, termini Cincinnati and Xenia, to pass through the counties of Hamilton, Butler, Warren and Greene. It is a reorganization of the Miami Valley Railroad Company, purchased at a recent master commissioner's sale by Calvin S. Brice, John Ryan, George Hofer, M. S. Forbus, Samuel Thomas, Governor Foster, O. J. Dodds and A. D. Bullock, who are also the incorporators of the new company. The capital stock is $1,000,000.

Imports of Dry Goods at New York.

The imports of foreign dry goods at New York for the month of June, were:

1878–9	79,606,048
1879–80	113,337,907

These figures represent only the foreign cost of the goods in gold, freight and duty not being included.

☞ At the annual election of the Moose Mining Company, held at Dudley, Park County, Colorado, on the 29th ult., the following were chosen trustees: H. Tracy Arnold, Francis H. Weeks, Robert Sewell, George B. Satterlee, Edwin Lord, Henry C. Bidwell and A. Hegewisch. With one exception these are new members of the board and they represent about one-fourth of the capital stock. It was decided at the meeting to dissolve the company under its Colorado charter and to reorganize it under the laws of New York. It was voted also to increase the capital stock from 200,000 to 250,000 shares. The new stock will be used partly to retire about $25,000 outstanding bonds issued by the former management, and partly for the further development of the company's mines.

☞ According to statistics recently issued by the Secretary of the Treasury, there were 81,841 miles of Railroad in the United States at the end of 1878. At the close of 1830 there were 23 miles of railroad in the country. The greatest number of miles constructed in any one year was in 1871, when 7 879 miles were added to the railroad system of the country. No year since 1865 has seen less than 1,000 miles built, and no year since 1849, with the exception of 1861, 1862 and 1864, whose contributions were respectively 651 miles, 834 miles, and 738 miles. The only years in which more than 3,000 miles have been built were 1856,

8,642 miles; 1869, 4,615 miles; 1870, 6,070 miles; 1871, 7,379 miles; 1872, 5,878 miles; 1873, 4,107 miles.

Mexican Railroad Projects.

The department of State has received a dispatch from the minister of the United States at the City of Mexico in relation to projected railroads in the republic, which states that the subject has lately seriously engaged the attention of the Mexican people and Congress, and it cannot but correspondingly interest the capitalists of the United States, for they will very probably be called upon to furnish the means for these enterprises.

The valuable concession made to Camacho and and others in 1874 to construct a broad-gauge road and telegraph line from the City of Mexico to Leon, in Guanajuato, was declared forfeited in December, 1876, by the supreme authority of that State. This contract, with enlarged concessions, was transferred by the President to Lymon & Co., April 3, 1880. Previously, however, in November, 1877, W. J. Palmer & Co. had entered into an agreement with the minister of public works to build a net work of narrow-gauge railroads from the City of Mexico to the Pacific, on the one side, and to the frontier of the United States on the other. Consequently, as the subject demanded the approval of the Mexican Congress, its session which has just closed has been agitated by the respective claims of these two companies. As a compromise, the question of which company shall enjoy the right has been referred by the Congressto the decision of the President of the republic.

The Mexican people, from being decidedly opposed a few years ago to the construction of these railroads, are now most earnestly in favor of them. Their construction will cost many millions of dollars, much of which, as before mentioned, will probably come from American sources. The following important facts and suggestions are, therefore, presented for the information of our people. Either of the companies to which the contract may be awarded will be entitled to a subsidy from the government. The subsidy to the Lymon company would be larger, better secured and more onerous upon the government than that of the Palmer company. But whether the subsidy will ever be paid; indeed whether the charter will be considered a valid one or not, are questions which are being widely discussed. Many assert that the Congress has no authority to delegate any legislative power upon the executive; that the power which it has granted to the President of deciding in favor of either company is legislation, and therefore null and void. A future administration might consequently decree any concession which the President might make null and void, and might grant a similar concession to another company, and the former would be without redress. These difficulties can be removed by an act of Congress confirmatory of whatever action the President may take. The Congress will assemble in September next.

☞ A certificate of incorporation has been filed with the Secretary of State of Ohio of the Cincinnati, Walnut Hill, Avondale and Union Village Railroad Company, termini Cincinnati and Union Village, in Warren county, Ohio, capital stock $100,000, in shares of $100 each, by Solomon Berliner and others.

☞ At a meeting of the stockholders of the Cincinnati and Northern Railroad Company, being the old Miami Valley narrow gauge and the southern end of the Miami Valley and Columbus Railroad, held in Cincinnati on the 1st inst., a board of directors was elected, with the following officers: President, Samuel Thomas; Vice President, J. L. Keck; Secretary, M. V. McCracken; Treasurer, George Hafer.

The Coal Trade.

The total tonnage of anthracite coal from all the regions for the week ending June 26, as reported by the several carrying companies, amounted to 384,479 tons, against 627,694 tons in the corresponding week last year, a decrease of 243,215 tons. The total amount of anthracite mined for the year is 9,995,655 tons, against 11,777,722 tons for the same period last year, a decrease of 1,782,067 tons. The quantity of bituminous coal sent to market for the week amounted to 70,463 tons, against 81,029 tons in corresponding week last year, a decrease of 10,566 tons. The total amount of bituminous mined for the year is 1,884,253 tons against 1,614,202 tons for the corresponding period last year, an increase of 270,251 tons The total tonnage all kinds of coal for the week is 454,942 tons, against 708,723 tons in corresponding week last year, a decrease of 253,781 tons, and the total tonnage for the coal year is 11,879 908 tons against 13,391,924 tons to same date last year, a decrease of 1,512 016 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the third week of June was 134,418 tons, of which 98,361 tons were coal and 36,057 tons coke. The total tonnage for the year thus far has been 3,222 604 tons of which 2,423,580 tons were coal and 799,024 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended June 26 were 48,098 tons, and for the year to that date 985,079 tons—276 417 tons over the corresponding period of 1879. The shipments to the Baltimore and Ohio Railroad for the week were 24,615 tons, and for the year 651,228 tons, an increase of 220,071 tons over 1879. The shipments to the Chesapeake and Ohio Canal for the week aggregate 20,599 tons, and for the year 221,644 tons, an increase of 23,990 tons as compared with last year. Shipments to the Pennsylvania Railroad for the week were 2,974 tons, and for the year 112,208 tons, an increase of 32,358 tons as compared with 1879. —Phil. Ledger, July 5.

☞ The approximate earnings of the Denver and Rio Grande Railway for the month of June, 1880, were $294,104 62; same month last year, $91,872 84. Miles now constructed, 505; miles operated last year, 337. Total miles, when lines subscribed for and now under construction are completed, will be 602. Total fixed charges for interest, payments on rolling stock, etc., will then be, per week, $25,000.

☞ The Napa Consolidated Quicksilver Mining Company, have declared a dividend of ten cents per share. The company have paid $100,000 in dividends since August 1878, and have done this during the low price of quicksilver, and also used only one furnace.

☞ The Park City and Echo extension of the Union Pacific Railroad in Utah is being built very rapidly. The grade is nearing completion, the ties are being distributed and track layers will soon begin work.

☞ The Pomeroy Railroad, recently purchased by the Pennsylvania, is being stone ballasted, the bridges are being repaired and the tracks put in first class condition.

☞ Fifteen distinct organizations will hold their elections in San Francisco on the 13th and 14th of July; and the annual meetings of most of the railroad companies operating in California will hold their annual meetings on those days.

New Brunswick Railway.

A despatch dated July 5 says it is currently reported that a sale of the New Brunswick Railway has been effected, and then adds:

It is understood that a syndicate of Montreal and New York financiers, including, also, two of the present owners of the road, have purchased the railway and all of the lands. The price in round numbers is stated to be $2,000,000, of which $500,000 will be held by the two parties referred to, and the other $1,500,000 by outside parties, the present bondholders receiving the face value of their bonds, less 4 per cent. The control of the road will remain for the present in the hands of Mr. Gibson. It is said that the road is to be pushed through at once to the St. Lawrence, that the road bed is to be widened, etc.

OFFICE OF THE ONTARIO SILVER MINING CO., No. 18 WALL ST., NEW YORK, July 6, 1880.

DIVIDEND NO. 57.

THE REGULAR MONTHLY DIVIDEND OF FIFTY CENTS per share has been declared for June, payable at the office of Wells, Fargo & Co., No. 65 Broadway, on the 15th inst. Transfer books close on the 10th inst.

C. P. HUNTINGTON, Vice-President.

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY, TREASURER'S OFFICE, GRAND CENTRAL DEPOT, NEW YORK, June 26, 1880.

THE DIRECTORS OF THIS COMPANY HAVE this day declared a DIVIDEND of 4 PER CENT upon its capital stock, payable on the SECOND DAY of AUGUST next at this office. The Transfer Books will be closed at 3 o'clock p. m. on SATURDAY, the 3d day of July next, and will be reopened on the morning of FRIDAY, the 6th day of August next.

E. D. WORCESTER, Treasurer.

Angora Goats.

The Virginia Legislature recently granted a charter for the incorporation of a company to be known as the Virginia Angora Company. The capital of the Association is placed at $2,000,000, of which amount $1,800,000 is said to have already been subscribed. According to its charter the company is permitted to hold in fee 200,000 acres of land and to issue bonds, but not without consent of nine-tenths of all the stockholders A contract has been made with California parties to transfer their stock of thoroughbred Angoras to Virginia, and to furnish also 20,000 ewe goats of original Maltese stock, to be purchased in and brought from Mexico. About $200,000 will be expended in making the transfer and improvements.

☞ The Erie Observer says that the United pipe line is building tanks large enough to hold 2,700,000 barrels of oil at an expense of $1,000,000.

G. & N. C. Narrow-gauge R. R.

CONTRACTORS FOR CONSTRUCTING AND equipping railroads are invited to make proposals for constructing and equipping a narrow gauge road from the Town of Georgetown, S. C., to the North Eastern Railroad at a point 41 or 42 miles from Georgetown. The roadbed has once been graded the entire way with the exception of about four miles.

Contractors desiring to engage in such a work are invited to confer with Col. J. D. Blanding, the President of the road, who resides at Sumter, on the Wilmington, Columbia and Augusta R. R., from whom all particulars may be learned. Early work is desired.

By order of the Board of Directors.

R. E. FRASER, Acting Secretary.

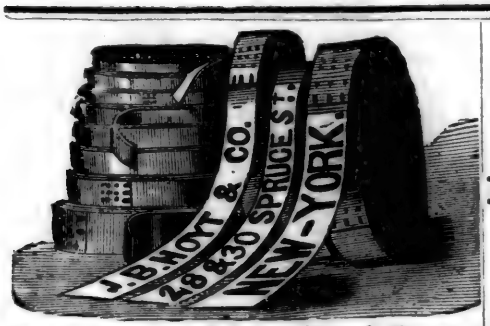
VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 2. Paleness. 3. Fluency. 4. Reliability. 5. Drying. 6. Hardening. 7. Fulness. 8. Brilliancy. 9. Durability 10. Economy.



All know it is easy to make a Varnish that has the single quality of DURABILITY; but Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined, and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

American Railroad Journal.

New York, Friday, July 16, 1880.

Railway Foreclosures.

American railroads themselves are a wonderful development of less than half a century, and reflect not inaptly the vast strides which human ingenuity has made over the laws and properties of matter and its inhering forces. Truly the American system, both in gross and in detail, is far ahead of any in Europe, and contains within itself the germs of its own improvement. No other business department of similar magnitude begins to be managed with the same skill and ability; nowhere else are to be found so many and so various forms of labor saving inventions; nowhere else so much comfort and efficiency at so light a cost. The ablest talent in the engineering, in the law, in the accounting, and in the trading branches of industry are drafted into the railroad service; and properly enough, nowhere else is signal ability so rewarded. Our railroads are great successes, perhaps the greatest and best symbols of our superior civilization. Some have complained that railroads and "Railroad Kings" were absorbing too much power, and were becoming a dangerous feature in our scheme of popular self-government. That they exert great influence in both State and national affairs need not be denied, for in one sense it is fortunate it is so. Their influence, so far as it is exerted, is in the main salutary, and acts as a check upon the agrarian tendency of the average office seeker. If it were a choice between a government inspired by a railroad board of directors, and one bidding for the favor of the mob, by all means let us have the former.

Having said so much it must be added that railroads at their best are created and controlled by men, and hence have human failings and flaws. One of these weak spots it concerns us here to notice. As is well known our railroads have been built chiefly on bonds, and that railroad stocks are regarded as risky speculations for those with a gambling propensity. Aside from the disadvantage to the outside public of having the stock of a road put up or put down in market for the benefit of its inside managers—which is morally speaking a breach of trust—there is a remote danger of having the stock interest wiped out altogether by a foreclosure of mortgages. As is well known, under British law there can be no absolute sale of railways under foreclosure, so that the capital is never sunk beyond the hope of recovery. The same rule prevails in Canada. Would not this be a wise policy for this country also? There have been since 1873 many foreclosures of roads both large and small, and one or two of importance are now pending. But the proceedings, and the manner and terms of so winding up a company vary immensely. It is not too severe to say that some of them, though technically regular, perhaps, in law, have been morally inequitable, and resemble closely a fraudulent intent. It is not worth while to single out particular instances by name, as they will be familiar to all concerned. We refer to cases where roads have been sold out which were either solvent or soon would be, but which have been sold out by collusion to the holders of junior mortgages picked up at trifling rates for the purpose.

One such case in the West we have in mind which so far technically observed the forms of law as to advertise obscurely for the three months that unless a cash assessment of something like 20 per cent of the current value of the shares was paid by a certain day the shareholders could not participate in the reorganization. As a consequence many holders found themselves shut out by this trick or device, with the poor alternative of a suit in equity to re-open the proceedings. This was done of a road which is now able to take care of its debt. The managers who thus succeeded may have made some money, but they have lost some character which no money can restore. Everything they touch or offer in market will be tainted with this act of sharp practice.

Quite in contrast with this is the conduct of the New York, Lake Erie and Western, the Chesapeake and Ohio, the Atlantic, Mississippi and Ohio, the New York and Oswego Midland, and others which might be named, where the stockholders have been invited and the door held open for them to come in on terms of substantial equity in the new organization.

The moral of these foreclosure practices is plain; men cannot cheat and win. While we are dealing with materials and natural forces Americans are easily first; but in dealing with men—with their fellow owners, and creditors—we are sometimes "too smart," too ready to take advantage. The dupes and victims of our railroad sharpers have this consolation that they cannot, men even with great names, stoop to wrong without paying the penalty.

A decision by one of the Circuit Courts on this topic will be found elsewhere in this issue, which may present a different case to that we have in mind.

Tourists' Attractions.

Year by year that department of railroad traffic known as "Tourist" or "Summer Excursion" travel grows larger, and promises to increase to such dimensions as to make it worth while to cultivate it. The Erie Railway Co. (now the New York, Lake Erie and Western) was the first to appreciate the importance of this summer pleasure travel, and has for years kept the lead, getting its full share of it. This was in part due to the fact that there are along and near its line several scenic attractions and objects of natural curios-

ity, prominent among them being, of course, Niagara Falls, the Portage Bridge and Silver Lake, Watkins Glen, the Upper Delaware, Starucca Viaduct, Passaic Falls, etc., etc.; and in part, also, to the judicious and persistent way the management has of putting the claims of the road before the public.

Notwithstanding that other and rival roads have the same or other rival attractions to offer, but little is known or heard of them; and, to the average reader at least, the Erie line is regarded as by far the most picturesque, agreeable and appropriate route for the summer's trip — simply because in poster, signboard, guide-book, and in the current literature of the day, its charms are brought to the front. Much of this is undoubtedly due to the excellent business tact of the General Passenger Agent, Mr. JOHN N. ABBOTT, and to the taste and judgment of his able assistant, Mr. JOHN W. ROMAINE, who has this branch under his especial care. Judicious advertising pays.

The New Land Law.

Commissoner Williamson, of the General Land Office, has issued a series of detailed instructions to all Registers and Receivers, which prescribe the regulations necessary for carrying into effect the law enacted at the last session of Congress for refunding all excess payments, ordinary purchase money, *fees*, and commissions on void entries of public lands. The act affects thousands of settlers throughout the Western States and Territories.

The first section authorizes repayment to "innocent parties" of the fees, commissions, &c., paid by them on entries of fraudulent "soldiers' and sailors' additional homestead scrip," of which very large quantities were forged and set afloat in the Western States some years ago. Commissioner Williamson's instructions require thorough proof of the innocence of applicants for relief under this section.

The second section provides for repayment of the purchase money and of fees, commissions, and excess payments in all cases where entries for public lands have been cancelled "for conflict, or where, from any cause, the entry has been erroneously allowed (by the local land officers) and cannot be confirmed," and also for refunding the extra $1 25 per acre paid by pre-emption settlers for lands supposed to be "double minimum lands" within railroad limits, but afterward discovered to be outside of such limits, and therefore purchasable at the ordinary minimum price of $1 25 per acre. All these repayments may be made to the party who made the original entry, or to his heirs, executors, or administrators, or to an assignee specifically authorized to receive such repayment, but a mere conveyance of the land will not be deemed to carry with it the right to repayment, unless expressly so stated in the assignment. Where there has been a conveyance of the land and the original purchaser applies for repayment, he must conclusively show that he has indemnified his assignee or perfected the title in him through another source. Assignees of the title to the land must show by affidavit or otherwise that they have not been indemnified by their grantors for the failure of such title, and that title has not been perfected in them by their grantors through another source. Where there is a specific assignment of the purchase money, evidence of non-indemnification by the grantor is not required. In the case of desert land entries, assignees of the purchase money are the only assignees recognized.

All applications for repayment are to be transmitted, together with all the papers in the case, to the Commissioner of the General Land Office, through the registers and Receivers of the proper districts, who are required to make due report upon each case transmitted, and the money finally found due will be paid out of the Treasury upon the warrant of the Secretary of the Interior.

Nantasket Beach Railroads.

The Nantasket Beach Railroad, running from Point Alderton and Strawberry Hill to the Boston and Hingham Steamboat Company's landing at the other end of the beach, was used for the first time for passenger travel on the 9th inst. The length of the road is three and one-tenth miles. It is of the regulation broad gauge and is at present equipped with one locomotive and four passenger cars. More rolling stock will be added as fast as necessary, and an extension of the road to Hull is contemplated. Patent safety switches are used, so that is impossible to derail a train by a misplaced switch. The run is made in about six minutes. Fare 10 cents.

Two more roads are being constructed, viz: the Boston, Hingham and Hull Railroad, which will commence at the southern terminus of the Nantasket Beach Railroad, in Hull, and will connect with either the Old Colony station or the Nantasket station, perhaps both, of the Old Colony Railroad in Hingham; and the Hull and Nantasket Beach Railroad, to commence at Windmill Point, known as Tudor Point, and run thence to Strawberry Hill, forming a connection with the northern terminus of the Nantasket Beach Railroad. When these two roads are built they will, no doubt, be consolidated with the Nantasket Beach Railroad, which will, in connection with the Old Colony Railroad, form a line of railroad from Boston to Hull, and also to Point Alderton. The capital stock of the two proposed new roads is fifty thousand dollars each.

Commerce of New York.

The foreign imports at New York for the month of June, 1880, are officially stated as follows:

	1879.	1880.
Entered for consump'n.	$9,787,563	$17,586,293
Do. for warehousing....	6,171,554	12,898 188
Free goods	6 528,823	9,012,693
Specie and bullion....	1,033,938	1,015,230
Total entered at port..	$23,471,878	$40,512,404
Withdrawn fr.wareh'use	4,985,788	6,877,708

The foreign imports at New York for six months from January 1, were:

	1879.	1880.
Entered for consump'n	$71,661,547	$123,571,695
Do. for warehousing..	86,564,348	66,537,461
Free goods.....	44,281,689	63,891,545
Specie and bullion	5,452,938	4,615,560
Total entered at port..	$157,960,522	$258,516,261
Withdrawn fr. wareh'se	30,863,277	39,757,348

The foreign imports at New York for the fiscal year ending June 30, were:

	1879.	1880.
Entered for consump..	$141,441,227	$214,822,744
Do. for warehousing...	67,817,409	101,835,723
Free goods.....	86,427,954	124,827,664
Specie and bullion	11,558,206	83,358,781
Total entered at port..	$306,744,796	$524,844,862
Withdrawn from warehouse..	66,639,457	76,127,636

The following is a description of imports at New York for the year ending June 30:

	1879.	1880.
Dry goods.....	$79,606,046	$113,387 907
General merchandise..	215,580,642	328 118,224
Specie and bullion	11,558,206	83,358,731
Total imports.....	$306,744,796	$524,844,862

The duties received at New York for the fiscal year ending with June, were:

	1879.	1880.
July	$8,103,513 74	$9,329,895 17
August	10,149,191 69	10,562,138 82
September	9,080,936 88	11,790,902 26
October	8,349,904 94	10,952 554 48
November	6,713,339 94	8,460,050 08
December....	6,175,359 43	8,175,540 13
January	7,655,552 67	11,960,677 78
February	8,229,362 06	12,254,602 24
March....	9,320,695 68	14,469,557 65
April....	8,184,797 88	11,901,071 43
May	7,577,233 93	9,752,773 54
June	7,198,779 44	10,699,840 52
Total	$96,749,168 28	$130,309,604 10

The exports from New York to foreign ports in the month of June, were:

	1879.	1880.
Domestic produce.....	$25,818,077	$41,325,315
Foreign free goods....	94,159	388,670
Do. dutiable,..	327,941	355,768
Specie and bullion.....	2,588,431	1,014,815
Total exports	$28,828,608	$43,084 568
Do. exclusive of specie..	26,240,177	42,069,753

The exports from New York to foreign ports for six months from January 1, were:

	1879.	1880.
Domestic produce....	$154,686,268	$191,279,384
Foreign free goods...	1.367,272	1,448,803
Do. dutiable.	2,404,439	2,255,290
Specie and bullion....	11,494,978	4,720,871
Total exports....	$169.952,957	$199,704,348
Do. exclusive of specie	158,457,979	194,983,477

The exports from New York to foreign ports for the fiscal year ending June 30, were:

	1879.	1880.
Domestic produce.	$327,929,161	$386,064,796
Foreign free goods....	2,803,258	2,161,880
Do. dutiable	5.281,618	4,517.887
Specie and bullion....	15,305,573	8,053,937
Total exports.	$351,319,610	$100,798.000
Do. exclusive of specie.	336,014,037	392,744,063

American Blast Furnaces.

The following from the Iron Age will show the condition of the furnaces July 1, 1880:

	Furnaces in blast.	Out of blast.
Charcoal....	131	136
Anthracite	167	68
Bituminous..	115	109
Total.....	413	313

This shows a decrease in the total number of stacks in blast since the last quarterly report, the total in blast at that time being 431, against 413 now. The number of charcoal furnaces in blast has increased, while the anthracite and bituminous have decreased.

The kind of furnace having the largest per centage in blast July 1 is the anthracite, 70 per cent being in blast. Of the bituminous less than 52 per cent are in blast, and of the charcoal 49 per cent. The lock-out in the Hocking Valley has reduced the total of bituminous furnaces in blast, but even considering this, we have again to record what was noticed at the time of the 1873

panic, the greater readiness with which bituminous furnaces blow out to meet the changed condition of trade. The following is a comparison between the condition of the furnaces on the 1st July for each of the four years, namely :

FURNACES IN BLAST.

	1877.	1878.	1879.	1880.
Charcoal	87	64	81	131
Anthracite	87	95	101	167
Bituminous	85	89	95	115
Total	259	248	277	413

FURNACES OUT OF BLAST.

	1877.	1878.	1879.	1880.
Charcoal	181	202	176	136
Anthracite	139,	180	125	68
Bituminous	123	128	107	109
Total	443	460	408	313

Great Western Railway of Canada.

The revenue statement of the Great Western Railway Company of Canada for the month of May, 1880 and 1879, (excluding leased lines) is as follows :

	1880.	1879.
Gross receipts	$350,700	$287,400
Working expenses	252,600	243,900
Net profit	$98,100	$43,500

—showing an increase in gross receipts of $63,300, in working expenses of $8,700, and in net profit of $54,600.

The aggregate for four months is as follows :

	1880.	1879.
Gross receipts	$1,412 100	$1,223,700
Working expenses	963 000	860 800
Net profit	$449,100	$262,900

—showing an increare in gross receipts of $188,400, in working expenses of $2,200, and in net profit of $186,200.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the year ending July 3, 1880, compared with their respective amounts carried to the same time last year :

	1880.	1879.	Decrease.
Reading Railroad	3,767,371	4,334,691	567,320
Schuylkill Canal	192,039	424 764	232,725
Lehigh Valley	2,384,215	2,346,310	*37,905
Del.,Lack. & Western	1,622,429	1,743,451	121,022
Shamokin Valley	380,132	414,398	34,261
Central New Jersey	1,617,383	1,876,452	259,069
United R. R. of New Jersey	490,864	458,767	*32,097
Pennsylvania Coal	470,275	685 101	214,826
Delaware and Hudson	1,438,788	1,539,924	101,136
Huntingdon & Broad Top Mt	237,814	162,454	*75,360
Penn. and New York	631,832	693,894	62,062
Clearfield, Pa	698,460	736,785	38,325

* Increase.

The total tonnage of anthracite coal from all the regions for the week ending July 3, as reported by the several carrying companies, amounted to 395,265 tons, against 409,574 tons in the corresponding week last year, a decrease of 14,309 tons. The total amount of anthracite mined for the year is 10,405,719 tons, against 12,215,123 tons for the same period last year, a decrease of 1,809,404 tons. The quantity of bituminous coal sent to market for the week amounted to 92,530 tons, against 25,837 tons in corresponding week last year, an increase of 66,693 tons. The total amount of bituminous mined for the year is 1,983,783 tons against 1,635,039 tons for the corresponding period last year, an increase of 348,744 tons The total tonnage all kinds of coal for the week is 487,795 tons, against 435,711 tons in corresponding week last year, an increase of 52,384 tons, and the total tonnage for the coal year is 12,389,502 tons against 13,850,162 tons to same date last year, a decrease of 1,460,660 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the last two days of June was 47,292 tons, of which 35,221 tons were coal and 12,071 tons coke. The total tonnage for the year thus far has been 3,408,599 tons of which 2,562,088 tons were coal and 846,551 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended July 3 were 43,801 tons, and for the year to that date 1,028,880 tons —286,780 tons over the corresponding period of 1879. The shipments to the Baltimore and Ohio Railroad for the week were 22,775 tons, and for the year 674,003 tons, an increase of 225,815 tons over 1879. The shipments to the Chesapeake and Ohio Canal for the week aggregate 18,467 tons, and for the year 240,111 tons, an increase of 28,121 tons as compared with last year. Shipments to the Pennsylvania Railroad for the week were 2,559 tons, and for the year 114,706 tons, an increase of 32,994 tons as compared with 1879. —Phil. Ledger, July 12.

New York, Lake Erie and Western R. R.

The gross earnings, working expenses and net earnings of the New York, Lake Erie and Western Railroad for the month of May, 1879 and 1880, were as follows :

	1879.	1880.
Gross earnings	$1,350,573 95	$1,592,544 08
Working expenses	1,064,786 70	972,435 28
Net earnings	$285,787 25	$620,108 80

—showing an increase in gross earnings of $241,970 18, with a decrease in expenses of $92,351 42, making an increase in the net earnings of $334,321 55.

From October 1, to May 31, 1879 and 1880, the earnings, expenses, etc., were :

	1878-79.	1879-80.
Gross earnings	$10,495,352 39	$12,057,029 69
Working expenses	7,487,739 54	7,697,578 00
Net earnings	$3,007,612 85	$4,359,451 69

—showing an increase in gross earnings of $1,561,677 30, with an increase in expenses of $209,838 46, making the increare in net earnings $1,351,838 84.

Reorganization of Railway Companies.

A decision recently given by Associate Justice Miller, of the U. S. Supreme Court, while sitting upon the bench of the U. S. Circuit Court in St. Paul, Minn., in a case arising from an attempt of bondholders of the St. Paul and Pacific, who neglected or refused to become parties to the plan of reorganization adopted by the main body of the holders of the securities of that company, embraces a sharp criticism upon the conduct of creditors who, after refusing to participate in plans of readjustment which prove successful, subsequently attempt to set aside the sale which formed the basis of the new organization. In the case in question Justice Miller over-ruled a petition which asked that the sale of the St. Paul and Pacific should be set aside, some months after the purchase was confirmed, the company reorganized and a new set of stockholders and bondholders added to the parties formerly interested in its affairs. The petitioners, who represented a bonded interest of about $1,500,000, were cognizant of all the important steps in the reorganization, in which they were invited to become participants ; but, having failed to either join in the plan adopted, or to take active steps to devise any other plan, the court refused to permit them to throw the new company into confusion. In a portion of the opinion by which this adverse judgment was pronounced, the following significant questions are asked :

" What right have they when these parties spent money, time, and trouble to have the road sold, to claim all the advantages which diligence and labor and money expended, and especially the money for these debentures, in the idea that they were trying to get the road out of the hands of a receiver ? or what right have they to come in and say : ' We will avail ourselves of your labor, time and money, for the simple reason that you undertook to get this road sold for the purpose of paying yourselves as well as us ? ' "

North Carolina Bonds.

The new consolidated four per cent bonds of the State of North Carolina have been admitted to dealings at the New York Stock Exchange. The following statement accompanied the application :

The State of North Carolina is now issuing its bonds, having upon their face " The Consolidated Debt of the State," in pursuance of an act entitled an act to compromise, commute and settle the State debt, ratified March 4, 1879. They are in sums of $1,000, $500, $100 and $50, each denomination numbered from 1 upwards ; dated July 1, 1880, payable July 1, 1910, bearing interest from their date at four per cent per annum ; coupons payable January and July, at the office of the Treasurer ; receivable at and after maturity for any and all State taxes. The act provides that they shall be exchanged for the principal of certain outstanding bonds of the State, with all the unpaid coupons attached, some at 40 per cent some at 25 per cent and some at 15 per cent of the principal, viz :

$5,577,400 at 40 per cent	$2 230,960
3,217,045 at 25 per cent	804,261
3,888,600 at 15 per cent	583,290
$12,683 015 total bonds to be exchanged.	
Total four per cent bonds authorized.	$3,618,511

A letter from the Treasurer, June 17, 1880, states that $6,461,445 of these old issues have been surrendered and new four per cents issued in exchange for the same, viz. : No. 1, to 1,590, $1,000 ; No. 1 to 417, $500 ; No. 1 to 887, $100 ; No. 1 to 238, $50. Numbers will be furnished from time to time as further issues are made.

Other bonds of the State, amounting to about $13,000,000, are excluded from the compromise, and no provision is made for them.

☞ Articles of incorporation of the Chicago, Burlington and Kansas City Railway Company have been filed at Burlington, Iowa. The object is to purchase the Burlington and Southwestern Railroad, soon to be sold under decree of court, and extend it to the Kansas City Road, now in operation 181 miles from Burlington, Iowa, to Laclede, Mo., where it connects with the Hannibal and St. Joseph Road.

☞ The construction of the new railroad from Pleasantville to Ocean City, in New Jersey, a distance of 7½ miles, has been commenced. William Massey, principal owner of the Philadelphia and Atlantic City Narrow Gauge Road, is president of the company.

☞ Track laying was commenced on the Richmond and Allegheny railroad at Maiden's Adventure dam, 27 miles from Richmond on the 8th inst.

RAILROAD AND CANAL DIVIDEND STATEMENT.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." *A dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

Fast Railroad Building.

The distance from Lakken, in the Indus valley, to Sibi, at the mouth of Bolan Pass, is 134 miles, and the railroad over this distance was finished in 101 consecutive days. The last 62 miles occupied exactly one month—from noon of December 14 to January 14. The last 90 miles ran through an absolute desert, and all food, water and means of shelter had to be transported by train. The consumption of water by the men and animals was 30,000 gallons a day, and in some cases the engines had to run 200 miles without stopping to take water.

Statement of the Public Debt of the United States, July 1, 1880.

DEBT BEARING INTEREST.

Decrease of debt during the month.....	$10,214,424 51
Decrease of debt since June 30, 1879.....	$85,034,961 03

BONDS ISSUED TO THE PACIFIC RAILROAD COMPANIES, INTEREST PAYABLE IN LAWFUL MONEY.

	Amount Outstanding.	Accrued Interest not paid.
Central Pacific bonds, 1862-64	$25,885,120 00	$778,553 60
Kansas Pacific bonds, 1862-64	6,303,000 00	189,090 00
Union Pacific bonds, 1862-64.	27,236,512 00	817,095 36
Central Branch Union Pacific bonds, 1862-64.....	1,600,000 00	48,000 00
Western Pacific bonds, 1862-4	1,970,560 00	59,116 80
Sioux City and Pacific bonds, 1862-64.....	1,623,320 00	48,849 60
Totals.....	$64,626,512 00	$1,938,705 36

Interest paid by United States, $45,651,155 94; interest repaid by transportation of mails, &c., $13,615,292 55; interest repaid by cash payments: 6 per cent net earnings $658,193 87; balance of interest paid by United States $31,380,664 52.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, June 30, 1880.

JOHN SHERMAN,
Secretary of the Treasury.

Illinois Central Railroad.

During the month of June, 1890, the traffic on the lines operated by this company was:

In Illinois.....	$521,277 00
In Iowa (Leased Lines).....	122,230 00
Total	$643,507 00

The traffic for the same month in 1879, on the same mileage, was:

In Illinois.....	$460,170 89
In Iowa (Leased Lines).....	120,407 01
Total.....	$580,577 90

During June, 1880, the Land Sales were 1,406 10 acres for $8,074.07, and the cash collected on land contracts was $5,711 13

New York, July 10th, 1880.

L. A. CATLIN, Secretary.

☞ The Richie Bros. of Phila. are erecting 40 ton Railroad Track Scales at Martin and Milan, Tenn., for the Chicago, St. Louis and New Orleans Railroad. This company adopted this make of scale after having tried several makes. The one in use over a year at East Cairo with "Dead Track" running through has given great satisfaction.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, July 15, 1880.

The money market continues to be extremely easy at 2@2½ per cent for call loans, 2@4 per cent for time loans, and 3½@4½ per cent for first class mercantile paper.

The market for foreign exchange continues dull. The posted rates of the leading drawers of sterling are 4.84@4.86½, and the actual rates 4.83@¼ and 4.85@¼. Cable transfers are 4.85½@¾. Prime commercial bills are 4.81½@4.82.

According to returns made to the Comptroller of the Currency the National Banks of the United States held on the 11th of June, 1880, $99,506,505 of coin, of which $83,149,094 is gold coin and $6,357,410 silver coin, including $495,400 of silver certificates. Of this amount the national banks in the city of New York held $58,829,426, of which $391,321 was silver coin and $452,700 was silver certificates. The national banks of the United States held on October 2, 1879, $42,178,731 of coin, showing an increase in eight months of $57,332,774. The amount of silver coin held on October 2 was $4,986,493. The amount of coin now held by the national banks is nearly equal to the total cash reserve required by law.

During the last fiscal year bonds of the State of New Hampshire amounting to $258,000, and notes to the amount of $58,500 have been paid. The bonds which have not matured are as follows, with their date of payment: September 1, 1884, $450,000; September 1, 1889, $150,000; municipal war loan, from January 1, 1892, to Jan-

uary, 1905, $2,206,100; prison loan, from January, 1881, to January, 1891, $140,000; and bonds of 1879, due 1889, 1890 and 1891, $300,000. The net indebtedness of the State June 1, 1880, was $3,512,466 15.

The Financial Chronicle of the 10th inst. makes a comparison of the earnings of 42 railroads in June, 1880, and June, 1879, and shows that the gross earnings of these roads, which amounted to $13,249,394 in June, 1879, rose to $18,164,772 in June, 1880, an increase of $4,915,378, or 37 per cent. In the comparison of the business of these roads for the first six months of this year and last year, in the same way, we find a net increase for 1880 over 1879 of $17,418,159 in gross earnings, which is equivalent to an increase of 26 per cent. A comparison is also made between a leading Eastern and a leading Western railroad, showing that in 1880 as compared with 1879 the monthly increase in net earnings was 30 per cent for January, 10 per cent for February, 56.42 per cent for March, 42.86 per cent for April and 49 per cent for May. "In the light of such figures," says the Chronicle, "there seems to be little basis for depreciating railroad property where it is honestly managed. Thirty-seven per cent gross earnings for June and an average since March 1 of 49.42 per cent increase in net earnings is certainly an astonishingly favorable exhibit, and there is no wonder under such circumstances that sinister rumors have had no greater effect."

United States Treasurer Gilfillan has purchased $125,000 District of Columbia 3.65 bonds, being the amount required by law to be applied to the sinking fund of that loan for the current fiscal year. These bonds will be cancelled and deducted from the loan.

The Portsmouth and Dover Railroad, besides paying a semi-annual dividend of 3 per cent, is also paying one dollar per share of the unpaid dividend withheld some time ago.

The Pennsylvania Railroad Company announces that its first mortgage bonds maturing December 31, 1880, will be paid on presentation to John D. Taylor, Treasurer of the company. This is a 6 per cent loan of $4,970,000, and is being replaced by a 5 per cent loan.

Government bonds are strong throughout; State bonds at the Board were neglected; Railroad bonds were generally higher; and Railroad shares, compared with our quotations of last week, show a considerable advance in price.

The closing quotations on Thursday were: Atlantic and Pacific Telegraph, 41¼@42; Canada Southern, 59@59½; Central of New Jersey, 69¼@69⅜; Central Pacific, 70@70⅜; Chicago and Northwestern, 91@91¼; do. pref., 109¼@109¾; Chicago, Burlington and Quincy, 121@121¼; Chicago and Alton, 109@110½; Chicago, Milwaukee and St. Paul, 78¾@78⅞; do. pref., 104½@105½; Chicago, Rock Island and Pacific, 105½@106; Chicago, St. Louis and New Orleans, 27@27½; Cleveland, Columbus, Cincinnati and Indianpolis, 67@—; Columbus, Chicago and Indiana Central, 16½@16½; Delaware and Hudson Canal, 77⅜@77⅛; Delaware, Lackawanna and Western, 80¼@80½; Hannibal and St. Joseph, 33⅜@33¾; do., pref., 69¼@69½; Houston and Texas Central, 63½@65; Illinois Central, 105⅞@106⅛; Lake Erie and Western, 29@29⅛; Lake Shore and Michigan Southern, 104⅝@104¾; Louisville and Nashville, 125½@126; Morris and Essex, 104¾@105; Metropolitan Elevated, —@92; Michigan Central, 89@89½; New York Central and Hudson River 129@129¼; New York, Lake Erie and Western, 42@42¼; do. pref., 70@70½; New York, Ontario and Western, 26@26⅛; Northern Pacific, 26¼@26⅝; do. pref., 48¼@48¾; Ohio and Miss., 32½@32⅝; do. pref., 72@73½; Panama, 180@185; Pacific Mail, 40⅝@40⅞; Philadelphia and Reading, 16@17½; St. Louis and San Francisco, 35@36; do. pref., 46@47; do. 1st pref., 70@73; St. Louis, Iron Mountain and Southern, 46¼@46½; Union Pacific, 90⅝@90¾; Western Union Telegraph, 106¼@106⅜; Wabash, St. Louis and Pacific, 36¾@37; do. pref., 65¾@66.

☞ At a meeting of the stockholders of the Wabash, St. Louis and Pacific Railroad Co. at St. Louis on the 14th inst., the action of the directors in leasing the Champaign, Havana and Western Railroad; in leasing and constructing the Detroit, Butler and St. Louis Railroad, from Butler, Ind., to Detroit, Mich.; in leasing the Missouri, Iowa and Nebraska Railroad, and in leasing 61 miles of the Pan Handle Road, from Logansport to the Indiana State line, was ratified by a three-fourths vote of the shareholders, and, therefore, the contracts are all approved.

☞ Articles of incorporation have been filed with the Secretary of State at Albany, naming Robert Webster of Poland, Thomas W. Spencer of Utica, and others as Directors of the Newport and Poland Narrow Gauge Railway Company. The line will run from the village of Herkimer to the village of Poland, along the valley of the West Canada Creek, in Herkimer county. The length of the road is about 17 miles, and the capital is placed at $88,000.

Philadelphia and Reading Railroad.

Comparative statement of gross receipts, tonnage and passengers, of the Philadelphia and Reading Railroad Company, for the month of May, 1880 and 1879:

	1880. Month.	1880. Year to date.
Gross receipts:

Gross expenses	1,046,255 43	4,773,821 34
Net profit	$286,291 99	$1,459,488 73

Comparative statement of business of the Philadelphia and Reading Coal and Iron Company for May, 1880:

	1880. Month.	1880. Year to date.
Receipts	$1,227,142 32	$5,254,329 76
Expenses	1,215,505 35	5,418,528 77
Profit	$11,685 97	
Loss		$164,199 01

	1879. Month.	1879. Year to date.
Receipts	$1,015,641 04	$4,184,700 61
Expenses	1,070,339 02	4,511,861 64
Loss	$54,697 98	$327,161 03

☞ The tracklayers on the Arizona division of the Southern Pacific have crossed the San Pedro, 48 miles east of Tucson, and are working steadily toward the New Mexico line. The town at that point is to be called Shakespeare. Regular trains are running to Benson, 46 miles east of Tucson, 294 miles east of Yuma and 1,025 miles from San Francisco.

☞ It is reported in Buffalo that the Buffalo and Southwestern railroad has been leased to the New York, Lake Erie and Western R. R. Co. for ninety-nine years. By connecting at Jamestown, with the Atlantic and Great Western, and narrowing the gauge of the latter road, trains can be run between Buffalo and Cincinnati, St. Louis and Chicago, thus forming another direct trunk line West.

☞ Railroad building is going on rapidly in Mexico. Over 800 miles of railway have been completed and are now in operation. Three important roads are now under construction; one over the Isthmus of Tehauntepec, another from Guayamas to El Paso, and a central road from the capital to the city of Leon, a distance of 262 miles.

☞ A telegram from President Billings, of the Northern Pacific Railroad Company, says that three ships loaded with material for the Pend d' Oreille division have arrived at Portland, Oregon. It is expected that the whole division (210 miles) will be completed this fall.

☞ The Wilmington (Del.) City Railroad Company has declared a semi-annual dividend of 10 cents per share, equal to 4 per cent per annum. This is the second dividend that has been declared during the 16 years' existence of the road.

☞ C. W. Rogers, formerly of Exeter, N. H., has been elected Vice President of the St. Louis, Arkansas and Texas Railroad. This is a new line to be built from Pierce City, Missouri, to Fayetteville, in Arkansas.

☞ The directors of the Pennsylvania Railroad Co. in Maryland, recently elected, are J. M. Schley, Albert J. Akin, G. P. Lloyd, Henry Loveridge, J. A. Alexander, Sidney Wintringham and Ludlow Patton.

☞ The Harlan and Hollingsworth Company, Wilmington, Del., are employing about nine hundred men, most of them in the car shops, in the manufacture of passenger cars for street and steam roads.

☞ The Homestake Mining Company has declared its regular monthly dividend of 30 cents per share for June, payable at the office of Wells, Fargo & Co. on the 26th inst.

Elegant Passenger Coaches.

The Boston Journal notices the arrival at the station of the New York and New England Railroad of four new and elegant passenger coaches of the Eastlake pattern, from the shops of the Pennsylvania Railroad Co. at Altoona. These cars were built expressly for the New York and New England Railroad, and combine in their construction every modern improvement that adds to the comfort and safety of the travelling public. The exterior finish is in dark chocolate, with the name of the road in gilt letters. The interior is finished in light ash, Eastlake pattern. The windows are double the ordinary size and of plate glass. The seats are elegantly upholstered and have the high, easy backs with which all the Pennsylvania Railroad cars are equipped. The appliances for thorough ventilation, without admitting the least dust or smoke, are perfect. The cars are fitted with the best automatic brakes, patent couplings and platforms, rendering accident next to impossible. The new coaches will for the present be used on the Eastern division of the road.

Bridge over the Monongahela.

The Pittsburg Chronicle says that the directors of the Monongahela Bridge Company awarded the contract for the new Smithfield street bridge to C. J. Schultz, of the Iron City Bridge Company, and then adds:

The price is understood to be about $265,000. The structure will be similar to the Point bridge, will be eighteen to twenty feet above the floor of the present one, and will be completed within ten months.

There will be two spans of 350 each and two half spans of 175 feet each, making the tota length of the bridge 1,050 feet, considerably less than the old one. There will be two piers and two arch ways. The roadway will be 22 feet wide, and the sidewalk outside of the towers 8 feet and 6 inches wide.

The old bridge will be kept open until the completion of the new bridge. A roadway will be built on Carson street, above the present ending of the bridge. This roadbed will lead to the river bank, and from there, on trestle work, to the bridge. On this side the same general plan will be pursued. This will give free scope in building the anchorages and approaches. The piers will be built solidly until they reach the floor of the bridge. Then the sidewalks will be cut away the two tracks thrown into one, and the pier run on up in two columns to the proper heighth. The new bridge will be placed on these columns, and when the old one is torn away the space will be filled in and the piers made solid from foundation to cap stones.

Philadelphia and Reading Railroad.

The Receivers of the Philadelphia and Reading Railroad Company submit herewith the annexed statements:

Statement A.—Lists of debts and liabilities of the company, as of May 24th, 1880, the date of the appointment of the Receivers.

Statement B.—Statement of bonded debt and the interest thereon, showing dates of maturity of the latter.

Statement C.—List of rentals of leased lines of railroads and canals, and of the guarantees of the company.

The Receivers are unable as yet to make a report as to "the state, condition and circumstances of the property," as directed by the order of the Court, but will file such statement as soon as the necessary examinations are completed, and information obtained, to enable them to do so.

Philadelphia, July 9th, 1880.

SUMMARY OF STATEMENT C.

Amount of rental		$3,822,854 75
Taxes in addition to rental (in 1879)		47,142 86
Liability for interest separate from lease	$59,261 00	
Less amount included in rental (in 1879)..	13,287 26	
		45,978 74
Total annual liability on account of leased roads and canals (in 1879)		$3,415,970 85
Annual liability on account of other railroads	$181,976 00	
Annual liability on account of Coal and Iron Co.	120,535 00	
		*302,511 00
		$3,718,481 85
Annual liability on account of P. & R. C. & I. Co.'s bonds	$1,008,130 00	
Annual liability on account of Mammoth Vein Coal and Iron Co.'s bonds	12,000 00	
		1,015,130 00
Total annual liability on account leased railroads and canals, and of guarantees		$4,733,611 85

* Of this, $143,196 have heretofore been paid by debtors.

The liabilities of the Coal and Iron Company are made up as follows: total mortgage debt due to others than the Philadelphia and Reading Railroad Company, $13,534,234 30; to which add bond and mortgage of railroad company dated July 1, 1874, $29,737,965 53, and bond and mortgage dated December 28, 1876, $10,000,000—making total mortgage debt, $53,272,199 83; debenture loan, $1,731,000; floating debt, $1,900,482 47; advanced wages, etc., $1,616,215 93; due Philadelphia and Reading Railroad Co. loan account, $6,358,519 24; capital stock, $8,000,000—total liabilities, $72,878,417 47; of which $54,221,069 37 are held by or due to the Philadelphia and Reading Railroad Co., and $18,657,348 12 by others than the Philadelphia and Reading Railroad Co. The total bonded debt is $15,265,234 30; to which add bonded debt of companies controlled, $1,800,000—making a grand total of $17,065,234 30. Total interest, $1,192,539 88.

Of the total interest $202,803 is payable in January, $65,765 in February, $70,245 in March, $114,370 47 in April, $91,560 in May, $51,158 71 in June, $202,803 in July, $65,765 in August, $70,245 in September, $118,969 88 in October, $92,693 16 in November, and $51,158 71 in December.

RECAPITULATION.

Liabilities:	
Total mortgage debt	$59,376,682 94
Total debenture debt	15,651,109 10
Schuylkill Navigation loans, 1895, 1918, 1915	2,578,250 00
East Penna. R. R. Co. bonds	495,900 00
Floating debt, taxes, debts, dividends due	13,564,282 92
Sinking Fund loan	1,185,146 48
Total	$92,851,321 44
Capital stock, common and preferred	34,278,175 28
Grand total of liabilities,	$127,129,496 72

BONDED DEBT AND INTEREST.

The total bonded debt of the companies, including unissued bonds, is $87,558 482 04, upon which the interest payment in one year aggregates $5,629,765 48.

☞ A certificate has been filed with the Secretary of State of Ohio of the Scioto Valley Railway Company, extension of the line from Portsmouth to a point on the Ohio river opposite the city of Ashland, Kentucky. The capital stock of the Scioto Valley Railway Co. has been increased from $2,000,000 to $2,500,000.

☞ The Concord, N. H., Horse Railroad Co. have elected a board of directors with Daniel Holden as President, Moses Humphrey Building Agent, and Samuel C. Eastman Secretary and Treasurer. The directors were instructed to proceed at once with the building of the road.

☞ The Southwest Pennsylvania Railway has been completed as far south as Fairchance, in Fayette county, a point six miles south of Uniontown and twenty miles north of Morgantown West Va.

OFFICE OF THE HOMESTAKE MINING COMPANY, 18 WALL-ST., NEW YORK, July 13, 1880.

DIVIDEND NO. 19.

THE REGULAR MONTHLY DIVIDEND OF Thirty Cents per share has been declared for June, payable at the office of Wells, Fargo & Co., No. 65 Broadway, on the 26th inst. Transfer-books close on the 20th inst.

H. B. PARSONS, Assistant Secretary.

NOTICE.—THE LOUISVILLE AND NASHVILLE RAILROAD COMPANY declared this day a semi-annual dividend of five (5) per cent. upon the stock of the company, payable on and after the 2d of August next.

Dividends on stock registered in New York will be paid at the office of the company, No. 52 Wall-st., Room No. 10.

The transfer-books will be closed from the 21st of July to the 5th of August, both days inclusive.

H. VICTOR NEWCOMB, President.

NEW YORK, July 7, 1880.

OFFICE OF THE CENTRAL PACIFIC RAILROAD CO., No. 9 NASSAU-ST., NEW YORK, July 3, 1880.

THREE DOLLARS PER SHARE WILL BE PAID on presentation of Dividend Warrant No. 10, on or after Aug. 1, at this office, or at the office of the company in San Francisco. Stock books closed from July 15 to Aug. 1, both inclusive, as per order of Board of Directors.

C. P. HUNTINGTON, Vice-President.

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY, TREASURER'S OFFICE, GRAND CENTRAL DEPOT, NEW YORK, June 26, 1880.

THE DIRECTORS OF THIS COMPANY HAVE this day declared a DIVIDEND of 4 PER CENT upon its capital stock, payable on the SECOND DAY of AUGUST next at this office. The Transfer Books will be closed at 3 o'clock p. m. on SATURDAY, the 3d day of July next, and will be reopened on the morning of FRIDAY, the 6th day of August next.

E. D. WORCESTER, Treasurer

G. & N. C. Narrow-gauge R. R.

CONTRACTORS FOR CONSTRUCTING AND equipping railroads are invited to make proposals for constructing and equipping a narrow gauge road from the Town of Georgetown, S. C., to the North Eastern Railroad, at a point 41 or 42 miles from Georgetown. The roadbed has once been graded the entire way with the exception of about four miles.

Contractors desiring to engage in such a work are invited to confer with Col. J. D. Blanding, the President of the road, who resides at Sumter, on the Wilmington, Columbia and Augusta R. R., from whom all particulars may be learned. Early work is desired.

By order of the Board of Directors.

R. E. FRASER, Acting Secretary.

☞ A bill was filed in the U. S. Court at Boston, on the 9th inst., asking that a receiver be appointed for the Boston, Hartford and Erie Railroad, and that the trustees under the Berdell mortgage be ordered to account for every transaction permitted by them as trustees or while they claimed to act as such. The complainant is W. F. Graham, a resident of Enniskillen, Ireland, who owns 500 shares of the stock.

☞ The Philadelphia Ledger says that large consignments of foreign iron are daily arriving at that port, and some difficulty is experienced in finding sufficient storage accommodations, the arrivals averaging 1000 tons per day. It is estimated that upwards of 225,000 tons are already in storage awaiting purchasers.

☞ The stockholders of the Dayton and Southeastern Railroad Co. have voted to issue second mortgage bonds to the amount of $400,000, to pay the floating debt. The road is now in operation to the Jackson coal field, a distance of 125 miles, and is doing a flourishing and rapidly increasing business.

VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 2. Paleness. 3. Fluency. 4. Reliability. 5. Drying. 6. Hardening. 7. Fulness. 8. Brilliancy. 9. Durability 10. Economy.

All know it is easy to make a Varnish that has the single quality of DURABILITY but Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined, and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

New York, Friday, July 23, 1880.

Philadelphia and Reading Railroad Company and its Neighbors.

A contest of capital of colossal proportions (one of several now being waged), is in progress as to the roads in eastern Pennsylvania and New Jersey, the outcome of which it is difficult to predict. It concerns all the anthracite coal roads, viz: the Philadelphia and Reading, the Central of New Jersey, the Lehigh Valley, the Delaware, Lackawanna and Western and, to a less extent, the Delaware and Hudson Canal. These are the great coal transportation companies, most of which have besides indirect proprietary interests in the coal lands. These invaluable mines, situate within five counties of Pennsylvania, are a prize worth contending for, and a *fortiori* worth preserving without contention, as they contain more concentrated net wealth than any equal area in the country. The New York, Lake Erie and Western and the Pennsylvania Railroad Companies are also to a limited extent concerned; the former as a transporter of coal, and the latter in the conquest over an annoying rival in other fields than the coal mines.

It is familiar history that the Reading Company, as a trifle the largest miner and carrier of coal, has for years undertaken to dictate a policy in rates and production to its associates. There can now be no doubt that, had its advice been taken, all of the coal companies would have been in better position to-day; but this would have been conceding perhaps too much power and influence to Mr. Gowen. Failing to agree, that gentleman undertook to teach them the folly of unrestrained production and competition, and naturally made his associate coal carriers more indignant and revengeful than before. The drop in coal and iron prices, which they had thus invited, bore heavily on all, but it seems heaviest of all on Mr. Gowen's two companies, and gave his neighbors the desired opportunity of overpowering their troublesome rival. The Reading Company, by its policy of extending aid to furnaces and mills along its lines, by steamship and dock ventures, etc., was in financial straits, and the result was to be foreseen. The Reading Railroad and Coal and Iron Companies are in the hands of Receivers, brought about in part by the over-confidence of its managers; and in part, no doubt, by the vindictiveness of its many rivals in business. Prominent among these are of course the Pennsylvania and the Lehigh Valley Railroad Companies, with help, perhaps, from the Philadelphia, Wilmington and Baltimore Railroad Company, and others of less note.

To understand the ground of this animosity we must remember that the Philadelphia and Reading Railroad Co. was lessee of several roads in the interior of the State, whereby it intersected the Pennsylvania system of roads at several points, noticeably, at Columbia, Harrisburg, Shamokin and Williamsport; add to this that it leased the North Pennsylvania Railroad, including its Bound Brook Branch, which made it an open competitor also at Easton, Trenton, Elizabeth and New York. Such a growing rival was sure to become dangerous, as beyond Harrisburg lay Pittsburg and the West, by an easy route, also the lines penetrating the Shenandoah Valley to the Southwest; beyond Williamsport lay Rochester and Buffalo, also accessible; while on the South was the Baltimore and Ohio, anxious for just such an entrance into New York as the Reading combination could afford. As it stands at this date it is a formidable competitor for the business between New York and Philadelphia, and between both cities and the coal regions.

Meanwhile the Central Railroad of New Jersey, another great coal company, had been landed in difficulties growing out of purchases and leases of coal lands and roads at apparently high prices. This road is important as being one of the best inlets into New York, and in combination with one or more of the Pennsylvania roads would be still more so. There have been envious eyes set upon it: (1) by the Pennsylvania Railroad Co., which would like to suppress its power for mischief; (2) by the Lehigh Valley, which it parallels for nearly 150 miles (and in the Lehigh Valley itself chiefly alongside); (3) by the rich Standard Oil Company which uses it to reach its docks on New York Bay; (4) by the old owners headed by the Receiver; and (5) by Mr. Keene and a following of speculators, who are disposed to take advantage of the situation. The result is a dead-lock; neither party having enough shares to control the policy, and the road will remain as it is until some new combination is made. Although the road is solvent and never did a more profitable business, the Receiver will remain. Meanwhile it is the key to the vast complication.

To an outsider the query naturally arises: why would it not be well to reorganize, on the basis of a common interest, these three companies—the Central of New Jersey, the Philadelphia and Reading, and the Lehigh Valley—with their several dependencies? This would be a happy conclusion of profitless strife, and would make a really useful and powerful company, with some 1,500 miles of busy roads having more points in common than in difference, of which New York and Philadelphia would be the ganglia. Mr. Gowen's services could be appropriately devoted to his Coal and Iron Company's operations, and some worthy representative could be found to head the consolidated interest. The developments in the cases of these two great roads, now under the

orders of courts, will be watched with interest by others besides their creditors.

[From the Fortnightly Review.]

The Railroads of the United States.

THEIR EFFECTS ON FARMING AND PRODUCTION IN THAT COUNTRY AND IN GREAT BRITAIN.

By Edward Atkinson.

In the report of one of the recent speeches of Mr. Gladstone, reference is made to information sent him by an English correspondent in this country in regard to the prices of certain farm lands in Massachusetts, by which it appears that he has been misled in his inference that Western competition has depressed Eastern farming in the United States; his correspondent having formed a general conclusion upon very insufficient data.

As a right understanding of the true effects and results of Western competition in the production of grain and meat may become of the greatest importance in the settlement of the grave questions in reference to land tenure now pending in Great Britain, it may not be unsuitable for an American to submit some considerations on the great changes that have in fact been brought about in the Eastern United States by the construction of railroads to the West, to which public attention has not been much directed even yet.

The object of this paper is to prove—

1. The vast saving of labor that has been effected in the eastern portion of the United States by the extension of the railway system to the West in procuring bread and meat at less and less cost.

2. That the art of agriculture in the Eastern States has in recent years made a great advance in respect to method of work and in variety of products; in some sections of the Eastern States there has also been a considerable increase in the value of agricultural products, such progress having been promoted and made possible by the changed relations of the two sections of the country growing out of the railway system.

3. That, under the unrestricted action of natural laws, like effects will be produced in Great Britain.

4. That, under the workings of the new force represented by the modern railway system and the steamship, the present relations of landlord and tenant peculiar to Great Britain must and will be so entirely changed as to result practically in the almost entire disappearance or abatement of the element of rent in respect to land devoted to purposes of agriculture.

5. That, in place of the present division of agricultural produce or its value among three classes—laborers, tenants and landlords—in the proportion of the minimum needed for subsistence to the first, an uncertain and at present negative quantity to the second, and a maximum to the third, a new division of an increased, varied, and more valuable product will occur between two classes, laborers and freehold farmers.

6. That in this new division, the same facts will be observed that are found in other occupations; to wit, that, as the product increases in variety and in value, a larger share and a better subsistence accrue to each of the two classes, laborers and employers, wherever distribution is unaffected by restrictive statutes.

In pursuance of this subject, in respect to the eastern part of the United States, Massachusetts on the whole one of the most sterile States, will be chosen as an example. *

* Massachusetts is a small State, only 7,800 square miles in area. Her typical natural products are commonly said to be granite and ice; Her people, about one-fourth of whom are foreign born, are mainly engaged in the manufacturing and mechanic arts of every kind; but in 1875 there were in the State 44,549 separate farms, of which only 1,054 were held under leases, 43,495 being carried on by their owners. They contained 3,402,000 acres of land, valued, with buildings, at 182,600,000, at an average of $4,100 each. Not quite one-third of the land is under cultivation. The total amount of wages paid for hired labor was $5,600,000. The value of the domestic and agricultural product of these farms in 1875 was $41,522,000.—Vide Census of Mass., 1875, Carroll D. Wright, Supt.

It is admitted that there are many deserted farms in Massachusetts; that the rural population has not increased, but has in many places decreased; and that there is much land, once under cultivation, that would not bring the cost of the stone walls with which it is inclosed.

But these farms are in the more sterile sections of the State, or are remote from railroads and have been given up because improvement in agriculture compasses larger product on less land with less labor elsewhere, even in the same State.

There is another class of farms of an intermediate kind, that have been sold by their original Yankee owners because their descendants did not find scope for their ability upon them: they needed a larger field and a greater opportunity. These farms have been taken up in very many cases by Irish, many of whom have passed from the textile factories or other occupations to the ownership of land purchased with the savings which the universal custom of depositing in savings banks (especially among the Irish in New England) has enabled them to accumulate.

Yet, despite all this giving up of farm land formerly cultivated, and this change of ownership, the more fertile lands of Massachusetts are now worth more, because more productive, than they were when we were much more dependent upon our own labor for grain and meat of home production than we now are. The aggregate value of the farm products of Massachusetts increases annually. Between 1865 and 1875 the cost of moving Western farm products to Massachusetts was reduced in greater ratio than at any previous period, yet the value of the agricultural products of the State was nearly eight million dollars more in the latter than in the former year, notwithstanding the very great reduction in prices which accompanied the appreciation of the paper dollar, from an average discount of thirty-six per cent in 1865 to only ten per cent in 1875.

Before the use of the railway, and even down to a later date,—before the great railway systems of the country were consolidated, and worked at the low rates that now prevail,—it was necessary for the people of New England to work arduously for bread alone. Brown bread made of Indian corn constituted the staple food in many farmer's families, white or wheat bread was a luxury.

There are, within twenty miles of Boston, hundreds of acres of land which, half a century since, would of necessity have been devoted to the production of grain and potatoes, of which the gross product per acre is now worth five hundred or a thousand dollars a year. Nothing strikes a New England man with more amazement, on the first approach to London, than to see the proximity of the wheat fields to the suburbs of the city, where he would expect to find very small farms under high cultivation in market gardening.

Again: it is but a few years since a wood-lot was as essential to the farm as the cornfield or the pasture. New England possesses no available beds of coal, and the whole supply of fuel came from the forest. It could not be moved long distances, and the farmer was obliged to go to the forest or to its proximity since the forest could not come to him.

The hill-sides were cleared, and great temporary injury was done; but at the present time the anthracite coal of Pennsylvania furnishes the cheapest fuel in very remote parts of the New England States. The forest is being restored on the hills; and many farms which were only occupied because the supply of fuel was ample, may now be left for pasture, or even may be covered with wood on the arable land. In many cases this "sprout land," so called, retains its value for the supply of railway sleepers and other purposes.

The same rule of increased product and value applies to most of the farm lands of Central New York in and around the Mohawk and Genesee valleys, formerly the very center of the best wheat cultivation of the United States, but where but a moderate quantity of wheat is now raised. These farms, temporarily affected in value by the competition of Western grain, are now in many places more valuable than ever before; and, as the mode of cultivation, and the character of the crops become adjusted to the new conditions, a higher degree of prosperity ensues.

There is still a considerable quantity of maize, or Indian-corn, produced in New England, because the varieties grown on our soil and in our climate are harder, sweeter, and more nutritious than the kinds raised upon the prairies of the West; but, on the whole, it may be said that maize and wheat are the pioneer crops of easiest cultivation in this country, and not—as wheat is in Great Britain—the product of high farming under a system of cultivation carefully prescribed in the lease of the land.

Thus it happens that, although these crops have passed more and more to the West, their migration does not mark decay, but rather progress, in the art of agriculture in the East. Since we can get the staple elements of subsistence from what may be called the great manufactories of grain and meat in the West, our own farmers are engaged in producing roots, hay, and fruits in great abundance, in raising poultry, or in dairy-farming. In witness of this statement, the data of the last national census (which were quite inadequate in respect to the products of agriculture of Massachusetts) disclosed the fact that Worcester County, Massachusetts, stood only third among the county divisions of the whole country in the value of the products of agriculture. The first was Lancaster County, Pennsylvania; the second, the great dairy-county of St. Lawrence, New York; the fourth was Hartford County, Connecticut; not until the fifth did we reach the corn-country, La Salle County, Illinois; sixth, the wheat-country, Oakland County, Michigan; and next we come back to Burlington County, in New Jersey.

In 1870 the value of the products of agriculture of the five counties of Lancaster, Penn., St. Lawrence, N. Y, Worcester, Mass., Hartford, Conn., and Burlington, N. J.—all situated in the far East—was $38,804,240. Yet the area of improved land on which this value was produced was only 3,058 square miles.

The value of the farms of the five Eastern counties was in 1870 $182,786,611. The value of all the improved lands in the great corn State of Illinois was only five times as great; the value of all the farms in the great wheat State of Minnesota a little more than one-half as much; and in the great cotton State of Mississippi less than one-half.

It is true that a great period of depression has occurred since 1870, which has affected the East a little more than the West; but it has passed by, and it cannot now be gainsaid that, although we have not in the East any great workers of hundreds and thousands of acres, who make corn or maize and wheat by machinery, there are yet more thrifty, prosperous farmers who own and cultivate moderate quantities of land in New England and the Middle States than there are in the Western States; the reason, of course, being that the more dense population of the towns and cities of the East, engaged in commerce or in the manufacturing and mechanic arts, affords a quicker market for the variety of products that cannot be moved over very long distances, but which constitute a far greater proportion of the cost and also of the comfort of household consumption than is represented by the mere consumption of bread. It is not intended to affirm that there are not many richer men engaged in agriculture in the West than in the East—men who have grown rich both by farming on a large scale, and by the rise in the value of their land; but in proportion to numbers it is very certain that there is a higher standard of comfort and thrift in many of the

farming counties of New York, New Jersey and Pennsylvania, and in portions of New England, than prevails at the present time in the Western States.

The same changes in variety and value of products will occur, or have doubtless occurred, in the neighborhood of the great Western towns and cities which are so rapidly becoming the centers of various manufactures; and they have also occurred in the vicinity of Southern seaboard cities — Charleston, Savannah and Norfolk — where thousands of acres of land are devoted to market-gardening for Northern supply, and are witnesses of the industry and thrift of the free colored laborers, by whom most of the work is done; even long distance being offset by the high prices obtained for early vegetables and fruits.

The same rule seems to apply to these great staple and necessary products of agriculture—corn and meat—that applies to staple textile fabrics, and to other factory work; namely, that, as they become more and more the product of machinery, employing relatively but few hands, they find their special place or district, and the work of that district is concentrated upon them. An ever-increasing proportion of the population elsewhere is thus relieved from arduous drudgery, and is enabled to spend more time and work on the comforts and luxuries of life, and in more varied occupations.

Machinery not only aggregates people in manufactories of fabrics, but also in districts devoted to wheat and to grazing; but it segregates as well, by enabling great numbers of men to do other work, requiring manual dexterity rather than machinery, for which there would otherwise be no time or opportunity, and which may be carried on wherever men choose to live in communities of moderate size.

The application of machinery to the staple products of maize and wheat is producing the same result—less human labor and more food to be consumed. In this essay maize and pork may be considered synonymous terms, the "hog-products" being the conversion of maize into meat.

The secret of these changes in the sources of our agricultural supplies is, that the railroad has eliminated distance. A barrel of flour, and a barrel of pork or its equivalent, constitute the substance of Western farm products needed by each adult in the East. The two barrels are equal to 500 lbs., or a quarter of the net ton in which our railway traffic is computed. This quantity is now brought from Chicago to Boston, one thousand miles, at an average of $1 25; sometimes for less, or at the rate of $5, or £1 sterling, per ton of 2,000 lbs.

We might therefore state an economic equation in these terms:

The movement of one year's subsistence of grain and meat for an adult working man a distance of one thousand miles is equal to a dollar and 25 cents, or 5s., which sum is equal to one day's wages of a common workman, or half the daily wages of a good carpenter or mason.

Half to one day's wages, one thousand miles, and the movement of one year's subsistence, are synonymous terms. One day's pay places the mechanic of Massachusetts next door to the Western prairies a thousand miles away.

The same terms of the equation may soon be applied to the distances beyond Chicago towards Minnesota, Dakota, Iowa, Kansas and Nebraska, because grades are easier, fuel is more abundant, and, as population and traffic increase, two days' work of a common laborer in Massachusetts will soon move a year's subsistence of corn and meat fifteen hundred or two thousand miles from far Dakota and from the plains of Nebraska; one name still designating a Territory, the other the last but one among the States admitted to the Union. At the present time the rates of freight west of Chicago are much higher than between Chicago and the seaboard.

In Dakota, on the Red River of the North, wheat is manufactured in some fields, where each single furrow of the plow is said to take a day to run without once turning; and from these fields the wheat is now brought in millions of bushels, upon which there has been no manual labor, except to direct the machinery, from the time the seed was planted in the field until the bread is cut upon the table of the factory operative in Lowell.

(To be continued.)

Eames' Duplex Automatic Vacuum Brake.

Mr. Eames has patented his brake in England as well as on the continent, and is expected to arrive shortly from America, when the result of the work done by it on the Barnsley-Dore branch of the Great Northern railway for the six months it has been in operation will be made known. In the first instance, it was not intended to test it so long, but a desire was expressed to have it in operation for the purpose of testing its durability. That period has nearly expired, and the results are said to be most satisfactory. It has been at work on the New York and Manhattan Beach railway, and the master mechanic of the company has just forwarded a communication to the patentee, in which he states that the vacuum brake has been attached to all the engines and passenger cars, and he strongly recommends it as being first class in every respect. During the last three years it had some very severe trials and had been tested to its utmost. He says it has always been ready to respond to what was required of it. The Eames brake he has found to be the most desirable in the market. The diaphragms have been running under the engines and cars for the past three years, and have not yet required replacing, and he concludes by saying that, for simplicity, durability, and its automatic couplings, with the improved ejector, it has no equal, so that he strongly recommends the brake to all railway companies. Mr. Campbell, the general foreman of the Manhattan elevated railway in New York city, gives the number of stops made by the flexible rubber diaphragms on that line, before they were replaced, as follows: Upon the engine where they were exposed to strong heat, 90,915; and upon the carriages, 171,000. These results must be considered as in every way satisfactory, but more details will be given before long, and in all probability the brake will be tested by some of our government officials, seeing how desirable it is that all railway companies should have the best brake that can be furnished to them in the interest, not only of the companies, but in that of the public as well. —[London Railway News.

Oil Statistics.

According to Stowell's Petroleum Reporter the stock on hand June 1, 1880, was 11,648,087 barrels to which add production during the month of June, 2,036,910 barrels, making a total of 13,684,997 barrels; from which deduct shipments during the month of June, 975,083 barrels, leaving total stock on hand July 1, 1880, 12,709,914 barrels. The number of producing wells at the close of the month was 13,172; number of drilling wells, 440; number of drilling wells completed during the month, 310; number of dry holes developed, 9; number of rigs up and building, 422; average daily production of the new wells, 25 barrels; average daily productions of all the wells for the month was 5.1 barrels.

The shipments of crude from the Northern field during the month were 529,558 barrels, and from the Southern field in crude and refined reduced to crude equivalent, 445,525 barrels, making the total shipments out of the producing region for the month 975,083 barrels; of this amount New York took 408,151 barrels; Pittsburgh, 44,840 barrels; Cleveland, 179,165 barrels; Philadelphia, 58,285 barrels; Boston, 28,207 barrels; Baltimore, 1,677; Ohio river refineries, 7,491 barrels; other local points, 46,267; destroyed by fire, 200,000 barrels. Total shipments, as above, 975,083. Commenting upon these figures, the Reporter says:

From the above statement of facts it is fair to presume that a decided lessening of the production may be looked for before many months shall have passed away, unless some new and as yet unknown field, as large, as prolific, and as certain, shall speedily be discovered and operated.

The present stock of 12,709,914 barrels is considered about one year's supply for the demands of the trade, and for the next six months the trade will require the whole of the production to meet its wants. If the above estimate of the supply and demand shall prove nearly correct, we may look for a stock at the commencement of 1881 of some 12,000,000 barrels, with a production decidedly less than at present, and not to exceed the amount produced at the commencement of 1880.

Starin's Transportation Lines.

Hon. John H. Starin, of Fultonville, Myndert Starin, Charles F. Starin, and James D. Sparker, of New York, and Peter Cantine, of Saugerties, are named as directors of Starin's City, River, and Harbor Transportation Company, limited. The capital is placed at $400,000. The object is to purchase steam-boats, propellers, tugs, barges, canal-boats, floats, scows, and other vessels for carrying freight and passengers; also for towing upon the Hudson River, East River, Long Island Sound, and the high seas; also to purchase grounds for wharves and pleasure parties; also to transfer freights and merchandise by carts or trucks to the city of New York, Brooklyn, Jersey City, and Hoboken, and to own or hire the necessary vehicles and horses for such purposes. The same persons are also named as directors of Starin's New Haven Transportation Line, limited. The capital is placed at $80,000. The object is to purchase vessels for transporting freight and passengers upon the waters within the States of New York, Connecticut, and New Jersey, as also the high seas.

☞ The Arizona Central Railroad Company was organized at Phœnix on the 12th inst. and the following directors elected: Joseph G. Hensey and Samuel A. Hensey, of Philadelphia; R. Barmester, John J. Gasper and E. P. Clark, of Prescott, A. T. Samuel A. Hensey, Vice President and Manager, has been personally conducting a reconnoissance of the Bradshaw mountains, and will soon place in the field a corps with T. A. Eckoff as engineer in charge. It is the intention of the company to proceed with the construction as soon as the location of the line between Maricopa and Phœnix is completed.

☞ The earnings of the New York Central and Hudson River Railroad for June, 1880, were $2,658,477 42, against $2,022,823 28 for June, 1879, an increase of $630,654 14. For the nine months of the fiscal year ending with June, 1880, the earnings were $24,289,115 40, against $20,733,755 88 for the corresponding period of the previous year, an increase of $3,555,359 52.

☞ David R. Murchison, of Wilmington, N. C., has been elected president; General Wm. McRay, general manager; and V. A. Johnson, Superintendent of the Carolina Central Railroad Company.

Paper Car Wheels.

The Paper World is authority for the statement that paper car wheels are doing excellent service. In making them the paper is pasted sheet upon sheet, to secure the required thickness, and is subjected to powerful pressure in hydraulic presses, by which masses of loose sheets are compressed into a compact body capable of withstanding great pressure. They are provided with iron hubs and steel tires. The first cost of paper wheels is said to be considerably greater than that of iron wheels, but they are said to wear from eight to ten times as long, and have other incidental advantages.

Statement of the Public Debt of the United States, July 1, 1880.

Interest paid by United States, $45,651,153 94; interest repaid by transportation of mails, &c., $13,615,292 55; interest repaid by cash payments: 5 per cent net earnings $658,198 87; balance of interest paid by United States $31,380,664 52.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, June 30, 1880.

JOHN SHERMAN,
Secretary of the Treasury.

Grand Trunk Railway of Canada.

The gross receipts, working expenses and net profit of the Grand Trunk Railway of Canada for the month of May, 1879 and 1880, was as follows:

	1880.	1879.
Gross receipts.....	£158,939	£135,434
Working expenses.....	107,240	98,354
Net profit.....	£51,699	£37,080

—showing an increase in gross receipts of £23,505, in working expenses of £8,886, and in net profit of £14,619.

Aggregate for five months from Jan. 1:

	1880.	1879.
Gross receipts.....	£822,755	£708,111
Working expenses.....	576,745	560,522
Net profit.....	£246,010	£147,589

—showing an increase in gross receipts of £114,644, with an increase in working expenses of £16,223, making the increase in net profit £98,421.

☞ The copper product of the Quincy mine for the month of June was 180 tons 35 pounds; of the Osceola, 180 tons 478 pounds; of the Pewabic, 89 tons 850 pounds; and of the Franklin, 24 tons.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, July 22, 1880.

The quotation for call loans, at the Stock Exchange on first-class collateral is 2@2½ per cent; time loans, 2@4 per cent. Prime mercantile paper, 3½@4 per cent.

The market for foreign exchange continues weak, for while the posted rates are 4.83@4.85 for prime bankers' sterling, the actual rates are 4.81¾@4.82¼ and 4.83¾@4.84¼. Cable transfers are 4.84¼@¾, and first class commercial bills 4.79¾@4.80½.

From a statement recently issued by the Treasury Department it appears that the amount of State bank notes outstanding June 30, 1880, was $299,790; national bank notes, $344,505,427; demand notes, $60 975; legal tenders, $346,681,016; one and two year notes of 1863, $82,485; compound interest notes, $342,590; silver certificates, $12,374,270; fractional paper currency, $7,214,954; fractional silver currency, $24,061,449; total currency of all kinds, $735,522,956. This total is higher than at any time since 1876, and the highest total at any time reached was $983,318,685 in 1865. In 1860 the total was $207,102,477, all State bank circulation.

A statement is also made showing that there have thus far been refunded into 5s, 4½s, and 4s, $1,395,347,800 of bonds bearing higher rates of interest, thereby reducing the interest on the debt from $99,534,864 to $79,633,981, a saving in interest of $19,900,888. The total annual interest at the present time upon the refunded bonds is

$61,738,912. When at its highest point, August 31, 1865, the annual interest charge was $150,977,697. The debt, which was then $2,756,431,571, is now reduced to $1,919,326,747. The statement shows in addition that there have been bonds sold for resumption purposes since March 1, 1877, amounting to $90,000,000, the interest upon which amounts to $3,925,000. This latter sum represents the annual cost of the coin reserve held for the security of circulation. The net annual saving through resumption and refunding operations since March 1, 1877, is $10,375,453. In addition to the bonds referred to there were issued in 1878, to replace coin used in payment of the Halifax award, 4 per cents of 1907 amounting to $5,500,000.

The chief of the Bureau of statistics reports that the total values of the exports of domestic provisions and tallow from the United States during the month of June, 1880, were $13,813,519, and for June, 1879, $8,119,115. During the twelve months ended June 30, 1880, $120,678,860, and during the same period in 1879, $110,031,058.

The following securities have been placed on call at the New York Stock Exchange:

$13,755,000 common stock, $9,755,000 preferred stock and $14,700,000 consolidated mortgage bonds of the Chicago, St. Paul, Minneapolis and Omaha Railway Company. This company is a corporation of the state of Minnesota, and now owns the Chicago, St. Paul and Minneapolis, the North Wisconsin, and the Hudson and River Falls railways, together with the large depot grounds at St. Paul and Minneapolis, and has a lease in perpetuity of the St Paul, Stillwater and Taylor's Falls railway track from the Minnesota state line to St. Paul. It is also authorized and empowered, under its articles of consolidation, to secure, whether by purchase, construction, retirement by exchange or otherwise, within or without the limit of said state, such railway extensions as may be by the board of directors hereafter ordered, subject only to the conditions that the consolidated company shall in no event issue its bonds to a greater extent than $15,000 per mile, and its preferred stock to a greater extent than $10,000 per mile, and its common stock to a greater extent than $15,000 per mile for any railway hereafter purchased or constructed. Its total authorized consolidated mortgage debt will be, of 6 per cent 50 years bonds dated June 1, 1880, $30,000,000; its total authorized preferred capital stock $20,000,000; its total authorized common stock $30,000,000; total, $80,000,000. The present company has no floating debt, and has over $1,000,000 in its treasury for the purpose of purchasing equipment and making improvements. From its $30,000,000 of bonded debt $7,700,000 only will be issued for the purpose of retiring the present mortgage debt of the companies forming this consolidation, and $7,000,000 only for the purpose of retiring an equal amount of the first mortgage bonds of the St. Paul and Sioux City Railroad Company. From its $20,000,000 of preferred stock, $3,000,000 only will be issued for the purpose of retiring the present preferred stock of said companies, and $6,755,000 only for the retirement of an equal amount of the preferred stock of the St. Paul and Sioux City Railroad Company. From its $30,000,000 of common stock, $7,000,000 only will be issued for the purpose of retiring the present common stock of said companies, and $6,755,000 only for the purpose of retiring an equal amount of the common stock of the St. Paul and Sioux City Railroad Company. The property now consists of 272 miles of finished and equipped railroad, and a leasehold right in the St. Paul, Stillwater and Taylor's Falls Railroad of 20 additional miles. Of these 292 miles, 190 are laid with steel rails. The company owns 900,000 acres of land, more than half of which are first quality pine lands, and the balance principally hard-wood and farming lands. All of these lands are exempt from taxes; those of the Chicago, St. Paul and Minneapolis Railway (being about 400,000 acres) until 1884, and those of the North Wisconsin Railway until 1800.

State Bonds at the Board were neglected. Railroad bonds were generally lower; Government bonds were strong throughout; and Railroad shares, compared with the quotations of the previous week have advanced considerably in price.

The closing quotations on Thursday were: Atlantic and Pacific Telegraph, 46⅛@46¼; Canada Southern, 62@62½; Central of New Jersey, 73¾@74; Central Pacific, 69@70; Chicago and Northwestern, 93⅞@94; do. pref., 113@113¼; Chicago, Burlington and Quincy, 124@124⅞; Chicago and Alton, 112@113; Chicago, Milwaukee and St. Paul, 82½@82⅝; do. pref., 105⅛@105¾; Chicago, Rock Island and Pacific, 108@108¼; Chicago, St. Louis and New Orleans, 30@31; Cleveland, Columbus, Cincinnati and Indianpolis, 68@69; Columbus, Chicago and Indiana Central, 17¾@18; Delaware and Hudson Canal, 81@81⅛; Delaware, Lackawanna and Western, 84⅛@84⅝; Hannibal and St. Joseph, 34⅞@35¼; do., pref., 71@71½; Houston and Texas Central, 60@65; Illinois Central, 106¾@107; Lake Erie and Western, 29¾@30; Lake Shore and Michigan Southern, 107⅝@107¾; Louisville and Nashville, 118½@120; Manhattan Railway, 24⅝@24⅞; Morris and Essex, 105¾@106¼; Metropolitan Elevated, 86@89; Michigan Central, 92⅝@92⅞; New York Elevated, 108@110; New York Central and Hudson River 131½@131¾; New York, Lake Erie and Western, 43⅜@43½; do. pref., 71⅛@71¼; New York, Ontario and Western, 27¾@28; Northern Pacific, 27½@28; do. pref., 49¾@50; Ohio and Miss., 33@33⅛; do. pref., 71½@73½; Panama, 178@181; Pacific Mail, 41⅞@42⅛; Philadelphia and Reading, 18⅛@18¼; St. Louis and San Francisco, 36½@37; do. pref., 47@48; do. 1st pref., 72@75; St. Louis, Iron Mountain and Southern, 52⅛@52⅜; Union Pacific, 91¼@91½; Western Union Telegraph, 107⅛@107¼; Wabash, St. Louis and Pacific, 40⅛@40¼; do. pref., 68⅞@69.

The following quotations of sales of Railway and other securities, for the week, are in addition to those given elsewhere in our columns:

New York.—Albany and Susq. 1st consol., 113½; Boston, Hartford and Erie 1st, 44⅛; Buffalo and Erie 7s, new, 120½; Boston and New York Air Line, 44; Central Pacific State Aid bonds, 105; Cedar Falls and Minnesota 1st, 107½; Chicago, Burlington and Quincy 5s, 104; do. 8s, 109; Central Iowa 1st, 100⅛; Col., Chi. and Ind. Cent. inc., 39⅞; do. 1st mort. Trust Co. certif. ass. sup., 89; Chicago, St. Louis and New Orleans, 31; do. 1st, 108; Cairo and Fulton 1st, 110; Chicago, St. Paul, Minn. and Omaha, 41½; do. pref., 76; Cincinnati, Indianapolis, St. Louis and Chicago, 75; Cincinnati and Springfield 1st, guar. by C., C., C. and Ind., 110; Chesapeake and Ohio 1st pref., 24; do. 2d pref., 21; do. cur. int., 38½; do 1st, Series B, 67⅛; Chicago, St. Paul and Minn. 1st, 106; do. Chicago, Burlington and Quincy Railroad.

The gross earnings, working expenses and net earnings of the Chicago, Burlington and Quincy Railroad for the month of June, 1879 and 1880, were:

	Gross earnings.	Working expenses.	Net earnings.
1880...	$1,259,528 95	$700,000 00	$559,528 95
1879...	1,160,967 87	611,927 32	549,040 55
Inc..	$98,561 08	$88,072 68	$10,488 40

And for the six months ending June 30, the earnings, expenses, etc., were:

	Gross earnings.	Working expenses.	Net earnings.
1880..	$7,973,777 50	$1,098,083 09	$3,875,694 41
1879..	6,510,238 68	3,629,366 42	2,880,872 26
Inc	$1,463,538 82	$468,716 67	$994,822 15

☞ At the recent session of the Legislature of New York an act was passed authorizing the sale of the Genesee Valley Canal to any company paying $100 per mile for it from the city of Rochester to the State line, a distance of about 114 miles, said company guaranteeing the building of a railroad along its line within two years from the organization of the same. A meeting of about twenty of the prominent citizens of Western New York met in Orlean on Wednesday of last week and organized a company for the purpose of accepting the provisions of the act. The capital stock was fixed at 11,000 shares at $100 per share, which was all subscribed and ten per cent paid in.

☞ The directors of the Morris and Essex Railroad Company, recently elected, are: Samuel Sloan, Moses Taylor, Wm. E. Dodge, Percy R. Payne, George Bliss, W. W. Phelps, A. Robertson, Beach Vanderpool, B. G. Clarke, A. Reasoner, M. Taylor Pyne, S. Griffith and W. W. Shippen. Samuel Sloan was re-elected President.

☞ The earnings of the Chesapeake and Ohio Railway for the month of June, 1880, were $211,645 44, against $148,456 97 for June, 1879, an increase of $63,188 47. For the six months ending with June, 1880, the earnings were $1,253,534 25, against $812,810 10 for the corresponding period of 1879, an increase of $440,724 15.

☞ A Quincy, Ills., dispatch says that the act of incorporation of the Chicago and Hannibal and St. Joseph Railroad Company, formed for the purpose of building a road from Quincy to Chicago, has been filed in the Circuit Clerk's Office. The incorporators are Wm. Dowd, Jay Gould, Russell Sage, Myron P. Bush, Sidney Dillon and Elihu Root, of New York; John B. Lyon, Chas. R. Farwell, Geo. C. Walker and Samuel J. Medill, of Chicago; John B. Carson and James W. Singleton, of Quincy.

☞ A mortgage dated May 1, 1880, from the New York City and Northern Railroad Company to the Central Trust Company, upon a line of railroad in New York, Westchester and Putnam Counties, upon stations, buildings, rolling stock, etc., to secure 500 bonds of $500 each, and 3,750 bonds of $1,000 each, was recorded in this city on the 21st inst. The bonds are payable in 1910, with interest at 6 per cent, and aggregate $4,000,000.

☞ At the recent annual election of directors of the Metropolitan Elevated Railway Company the following gentlemen were chosen: William R. Garrison, John Baird, Jose F. Navarro, William Foster, Jr., George M. Pullman, Horace Porter, John P. Kennedy, William Adams, Jr., George J. Forrest, Charles H. Clayton and Mortimer Ward. For Inspectors of election—George D. Davis, Jr., and Daniel Scannell.

☞ A certificate of incorporation has been filed with the Secretary of State of Ohio of the Circleville, Tarlton and Adelphi Telegraph Company, (termini, Circleville, Pickaway county, and Adelphi, Ross county,) capital $1,000, in shares of $10 each. Also of the Cincinnati, Fayetteville, Hillsboro and Huntington Railway Company, increase of capital stock $1,500,000, making a total capital of $5,250,000.

☞ At a meeting of the stockholders of the Continental Railroad Company, in this city on the 21st inst., the following officers were chosen: Hugh McCulloch, president; J. T. Snead, vice-president; A. H. Day, Treasurer; William Thorpe, secretary, and James E. Abbott, chief engineer.

☞ The Little Chief Mining Company has declared its regular monthly dividend, No. 6, of $100,000, or 50 cents per share, payable on the 24th inst., at the office of the Mining Trust Company.

☞ The first mortgage bonds of the Seaboard and Roanoke Railroad Company will be paid on maturity, 1st of August next, together with last coupon due that date, at Farmers' and Planters' Bank of Baltimore.

☞ William Bliss of Springfield, Mass., has been elected President, and James S. Russell, of Springfield, Mass., Vice President of the Boston and Albany Railroad Company.

☞ The Tehuantepec Railroad Company has contracted for 15,000 tons of steel rails in England.

Railroad Ties and Telegraph Poles.

But few people comparatively have any idea of the amount of timber used in the construction of a single railroad. We hear that our forests are rapidly disappearing, and we know that material for building and fuel causes the sacrifice of many leafy monarchs of the forest; yet only the initiated knows that it yearly takes 200,000 acres of forests to supply crossties for the rail roads of the United States. We interviewed a gentleman who has been in the business for thirty years, and concluding that his observations and experience would be of interest, we give the substance of his talk. It takes 15,000,000 ties to supply the demand on our railroads, for which on an average, the contractors get thirty-five cents apiece, making in the aggregate $5,250,000. In building a new road the contractors figure on 2,700 ties to the mile, while it takes 800 ties to the mile to keep a constructed road in repair. Contractors, of course, buy pieces of timber land as near to the proposed line of road as possible, paying for the timber an average of about $20 per acre, or giving the proprietor of the land ten cents for every tie got out. The average of a good piece of timber land is 200 ties to the acre and twelve ties to the tree. The size of a cross tie differs on different roads, but the usual size demanded is eight feet six inches long and eight inches face. White or burr oak is considered the best timber for the purpose, although cherry, maple, ash and even locust have been used. The last named were first used on the Little Miami Railroad, and after a time thrown aside as unfit for the purpose. Railroad men much prefer ties hewn out with an axe to those sawed in a mill, and many contend that the first named will considerably outlast the sawed ties. This theory is probably a mistaken fallacy, as sawed ties have been placed alongside of hewn ties, and remained sound twice as long. This business gives employment to an army of choppers, who are paid ten cents apiece for each tie. A continued practice makes the choppers expert in the use of the axe, and a single man has been known to get out 35 ties in a day; yet the average is only 10, while an expert will probably get out 20. During the war, when ties sold at from 50 to 65 cents, choppers were paid 12½ cents apiece. Although the contractor gets 35 cents apiece from the railroads for each tie, still there is a loss of from five to seven per cent on dockage and stealage. An inspector is sent by th company to inspect the ties. This is generally a clerk from some of the offices, who frequently knows but little as regards the strength or durability of timber, and, as a consequence, some of the best ties are docked and only bring twenty cents apiece. The stealage is where the section men put in new ties which have not been inspected and received, and fail to report the use of the same to the road master. Most all cross-tie men also contract for bridge timbers and trestling, as well as telegraph poles. For the latter chestnut and cedar are mostly used. They bring about $1 75 apiece, and are cut mostly in the Tamaraca swamps of Michigan and the forests of southern Kentucky and Tennessee. Large sums of money have been made by lucky contractors above described, and each only adds to increased demands. Ohio has over 4,000,000 acres wood land, yet the ever increasing demand for railroad purposes alone, if supplied entirely from our forests, would leave us without a single stick to mark the existence of our once dense forests.—[Cincinnati Commercial.

The First American Locomotive.

The first locomotive built in America for a purely experimental purpose was the "Tom Thumb," which was constructed by the now venerable Peter Cooper. This little machine was built for the purpose of testing the feasibility of a locomotive sustaining itself while running over curves, which was a mooted point among the engineers and scientists of that day. The engine weighed less than a ton, the cylinder was only three and a half inches in diameter, the boiler was about as "large as an ordinary kitchen boiler," and was vertical, with gun barrels for tubes. The first trial was made on the Baltimore and Ohio Railroad, from the depot at Baltimore to Elicott's Mills, August 28, 1830.

Coffee Production of the World.

The four great coffee producing countries of the world are Brazil, Java, Sumatra and Ceylon. The data and figures for 1879 show that Brazil itself has produced an extraordinary quantity of beans. Hitherto 250,000 tons have been considered as a good yearly figure for Brazil; last year the export alone amounted to 273,000 tons. But the consumption of coffee in the country itself now amounts to 60,000 tons, raising the total yearly products of Brazil to 333,600 tons. Fortunately for the planters in other parts of the world, coffee has grown into a necessity in the United States and hence its price has risen. Although the soil of Brazil, especially for coffee culture, is very extensive, yet the difficulty of obtaining labor daily becomes greater, and this renders it doubtful whether the above figure can be much exceeded.

The crop of Java and Sumatra was estimated at 94,000 tons for export. The consumption of the inhabitants, although the population is double that of Brazil, is not half of that of the latter country.

The production in Ceylon, though greater than that of 1878, shows a falling off when compared with former years. There were in all 41,200 tons exported from the island, the native consumption being very small.

Coffee is, besides, grown in Central America, in several of the South American Republics, in the British and other colonies of the West Indies, in Hayti, Cuba, Porto Rico, Arabia, Mauritius, Reunion and along the northeast coast of Africa, in Liberia and the African West Coast, in Manilla, Celebes and several of the islands of the Pacific, and, lastly, in British India. But the total production of all these regions does not reach half of the export of the four chief countries named above.

Iron and Steel.

The Bulletin of the Iron and Steel Association publishes an account of the total imports of iron and steel from all countries during the period embraced between July 1, 1878, when the effects of the "boom" were just beginning to be noticed in the increase of imports, and May 1, 1880. This statement shows the quantity and value of the principal articles of iron and steel (except tinplate) in the ten months ended May 1 of the fiscal years 1879 and 1880 to be:

Gross Tons		Values	
1879.	1880.	1879.	1880.
101,085	1,128,639	$2,934,516	$25,227,144

"The total quantity of the same articles exported from England to the United States in May, 1880, was 152,058 gross tons. Adding this quantity to the total imports into this country for the ten months ended May 1, 1880, we have 1,280,697 gross tons as our total imports of iron and steel (except tinplate) in the eleven months from July 1, 1879 to June 1, 1880, which is over a million tons more than similar importations during the corresponding period of the fiscal year 1879."

The articles which do not have their weight recorded in the report of the United States Bureau of Statistics, such as steel blooms, steel wire and many other very important products, have been arranged by the Bulletin in the following table, which shows the value of their imports in the ten months ended May 1 of the year 1880, compared with the same period of the fiscal year 1879. The imports for the fiscal year 1880 are thus far two and a half times as great as those for the same period of the fiscal year 1879:

	1879.	1880.
Hardware	$102,823	$146,761
Machinery	454,894	924,846
Firearms	504,931	693,830
Steel ingots, etc	954,179	3,155,999
Cutlery	1,047 114	1,427 849
Files	77,382	131,721
Saws and tools	4,642	4,725
Unenumerated	1,805,321	3,987,379
Total	$1,950,736	$10,482,610

The total value of all the imports of iron and steel and of manufactures of iron and steel mentioned above is $35,709,754 for the ten months of the fiscal year 1880, and $7,885,252 for the corresponding ten months of the fiscal year 1879. The increase in importations of iron and steel products (not including tinplate) during the ten months of the present fiscal year over the ten months of the last fiscal year was in round numbers $28,000,000.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending July 10, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1880.	1879.
Reading Railroad	112,976	3,880,348	4,504 916
Schuylkill Canal	8.700	200,739	450,567
Lehigh Valley	94,069	2,478 284	2,435,689
Del.,Lack. & Western.	53,426	1,675,855	1,818,801
Shamokin Valley	14,702	894,834	481,119
Central New Jersey	60,244	1,677,628	1,942,791
United R. R. of New Jersey	18,979	509,843	474,997
Pennsylvania Coal	20,487	490,762	717,108
Delaware and Hudson	45,516	1,484,305	1,617,101
Huntingdon & Broad Top Mt	4 299	242,114	168,320
Penn. and New York.	19,184	651,016	711,552
Clearfield, Pa.	31,840	730,300	771,693

The total tonnage of anthracite coal from all the regions for the week ending July 10, as reported by the several carrying companies, amounted to 391,144 tons, against 531,635 tons in the corresponding week last year, a decrease of 140,491 tons. The total amount of anthracite mined for the year is 10,805,811 tons, against 12,865,987 tons for the same period last year, a decrease of 2,060,176 tons. The quantity of bituminous coal sent to market for the week amounted to 86,839 tons, against 75,611 tons in corresponding week last year, an increase of 11,228 tons. The total amount of bituminous mined for the year is 2,070,621 tons against 1,745,591 tons for the corresponding period last year, an increase of 325,030 tons. The total tonnage all kinds of coal for the week is 477,983 tons, against 607,246 tons in corresponding week last year, a decrease of 129,263 tons, and the total tonnage for the coal year is 12,876,432 tons against 14,611,578 tons to same date last year, a decrease of 1,735,146 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the first week of July was 92,820 tons, of which 67,159 tons were coal and 25,661 tons coke. The total tonnage for the year thus far has been 3,501,419 tons of which 2,629,197 tons were coal and 872,212 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended July 10 were 33,546 tons, and for the year to that date 1,062,427 tons —281,101 tons over the corresponding period of 1879. The shipments to the Baltimore and Ohio Railroad for the week were 17,535 tons, and for the year 691,538 tons, an increase of 223,312 tons over 1879. The shipments to the Chesapeake and Ohio Canal for the week aggregate 13,201 tons,

and for the year 253,412 tons, an increase of 25,240 tons as compared with last year. Shipments to the Pennsylvania Railroad for the week were 2,711 tons, and for the year 117,477 tons, an increase of 32,585 tons as compared with 1879—Phil. Ledger, July 19.

Baltimore and Hanover Railroad.

The first annual report of the president and directors of the Baltimore and Hanover Railroad Company, up to March 31, 1880, has been published. The capital stock authorized under the article of association was $120,000, and the paid up subscription to the capital stock up to the expiration of the fiscal year ended March 31 last amounts to $85,848 20. The entire length of road, a fraction over twenty miles, was finished and opened for business on December 1, 1879. The gross monthly earnings have been as follows: December, $2,795 74; January, $2,467 51; February, $2,695 73; March, $3,811 72; April, $3,257 66. The results for the first five months indicate an annual net revenue equivalent to the interest on the mortgage bonds at six per cent and the same rate on the capital stock. Nearly one-third of the road has already been ballasted with broken stone and a line of telegraph has been established along the road. The officers are: President, A. W. Eichelberger, Hanover, Pa.; Vice President, W. H. Vickery, Baltimore; Secretary, L. F. Melsheimer, Hanover, Pa.; Treasurer, R. M. Wirt, Hanover, Pa.

Cleveland, Columbus, Cincinnati and Indianapolis Railroad.

The directors of the Cleveland, Columbus, Cincinnati and Indianapolis Railway Co. have voted to pay no dividend in August. The following is the comparative statement of the earnings, including the leased line—the Cincinnati and Springfield Railroad:

Gross earnings for the six months of 1880	$2,315,000
Expenses, taxes and interest	2,226,271
Net surplus June 30, 1880	$88,729
Gross earnings for the first six months of 1879	$1,809,919
Expenses, taxes and interest	1,969,440
Deficit June 30, 1879	$159,521
Showing net gain in operating for the first six months of 1880 over 1879 of	$248,250

Woodruff Parlor and Sleeping Cars.

The Pittsburg Chronicle notices the passage through that city of two Woodruff Parlor and Sleeping Cars Manufactured by the Harlan & Hollingsworth Company of Wilmington, Del., for the Wisconsin Central Railroad Company, at a cost of $11,000 each. The following description of the cars is given by the Chronicle:

They are both fitted out elegantly in walnut and mahogany and the ceilings are made of the veneer wood used in perforated seats, and are decorated with Chinese designs. The design of the car is of the latest improvements, while the sleeping accommodations are after the original Woodruff pattern. The bedding for the upper and lower berths is stowed away very ingeniously on a line with the floor and under the seats—the upper berth depending for support on the floor. In this way the upper part of the car is clear and unencumbered, and adds light and ventilation as well as a generally more cheerful appearance to the car. The weight of the car is six tons lighter than the ordinary sleeper, and is entirely free from the oscillating movement, as the weight is on the floor and directly on the trucks. The cars are fitted with electric bells by which the porter can be instantly summoned, and altogether they are the most modernized sleeping cars that we have ever seen. The Woodruff Sleeping Car Company is a Pittsburgh concern, of which Mr. Frank Rahm is President. The general office of the company is in this city, on the corner of Market and Water streets. They have now 64 of these cars running on different eastern and western roads—prominent among the former are Camden and Atlantic and the Manhattan Beach railroads.

Pennsylvania Railroad.

The stock of the Pennsylvania Railroad Company is rapidly attaining the position of an investment security. The admirable management of the company by the present officers has produced the brilliant success of this year, and is a safe guarantee that their energies in the future will insure quite as favorable results. Under the circumstances it is only reasonable to expect that the present rate of dividend will be not only maintained, but there is a strong chance of its being increased. If such expectations should be realized, and there is no good reason why they should not be, then Pennsylvania Railroad stock must be the most judicious investment that can now be found on the Philadelphia list. Its future must continually show greater profits as its feeders permeate more and more thickly settled localities, thereby securing a traffic that will always remain with it and become quite as valuable as any local trade of the main road.—[Philadelphia Record.

A New Patent Light.

The members of the Pittsburg Water Committee recently visited a car on the Pennsylvania Railroad lighted by the Westinghouse Air Brake Company, who have a patent for manufacturing gas by passing compressed air through a vessel containing sponges saturated with gasoline. They were greatly pleased with the light. It is a brilliant, pure white light, and does not blind like the electric light. It will probably be used extensively in cars, but it is stated that it cannot be applied to street purposes.

☞ It is stated that the Boston and Maine Railroad company has decided to erect an iron bridge within the coming year over the Merrimack River between Haverhill and Bradford, to take the place of the present wooden structure. The probable cost will be from $80,000 to $100,000, according as the bridge is made for a single or double track.

LITTLE CHIEF MINING COMPANY.

ROOM No. 54 BOREEL BUILDING, 115 BROADWAY,
NEW YORK, July 15, 1880.

THE BOARD OF TRUSTEES HAVE THIS DAY declared a MONTHLY DIVIDEND (No. 6) of ONE PER CENT. on the TEN MILLION DOLLARS ($10,000,000) capital stock of this company, amounting to ONE HUNDRED THOUSAND DOLLARS ($100,000,) or FIFTY CENTS Per Share, out of the sixth month's net earnings, payable at the Mining Trust Company, on the 24th inst.

Transfer-books will close July 20, and re-open July 26.

D. F. VERDENAL,
Secretary.

NOTICE.—THE LOUISVILLE AND NASHVILLE RAILROAD COMPANY declared this day a semi-annual dividend of five (5) per cent. upon the stock of the company, payable on and after the 2d of August next.

Dividends on stock registered in New York will be paid at the office of the company, No. 52 Wall-st., Room No. 10.

The transfer-books will be closed from the 21st of July to the 5th of August, both days inclusive.

H. VICTOR NEWCOMB,
NEW YORK, July 7, 1880. President.

TOTAL	$6,390,233 89

A Dividend of Five per cent. has been declared, payable on demand.

J. H. WASHBURN, Secretary. CHAS. J. MARTIN, President.

Watering Stock in Transit.

The Baltimore and Ohio Railroad Company have built at Piedmont three live stock cars under the patent of George F. Patterson, of this city, which will be sent to Parkersburg to be loaded with stock for transportation to Baltimore. All the stock will be watered at the same time from troughs suspended from a framework erected at Keyser, West Va., for that purpose If the experiment with these cars proves successful, the railroad company will adopt the patent upon all their stock cars.—[Baltimore Sun.

☞ The surveyors running the line from Reno for the northern section of the Nevada and Oregon Railroad are now in Long valley, about 35 miles from Reno. The party on the southern section are south of Washoe lake. No difficulty is being encountered by either party, and both are getting along well.

☞ The stockholders of the Boston and Albany Railroad Company have ratified the purchase of the Springfield and Northeastern Railroad, as well as the lease of the Spencer Railroad for ten years.

This Establishment commenced building STREET CARS in 1832, and is famed for superior ELEGANCE of workmanship and SUBSTANTIAL practical results.

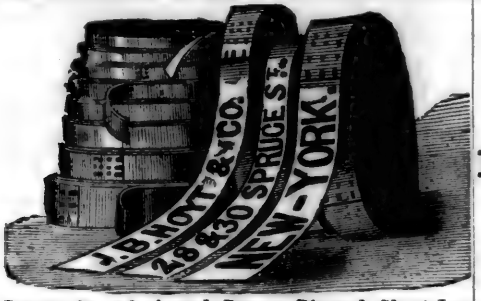
Its location, in the PORT of NEW YORK, is most favorable for shipments, and its CARS, CONSTRUCTED in SECTIONS, may be ENTIRELY COMPLETED before being packed for transportation.

VALENTINES VARNISH

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.



All know it is easy to make a Varnish that has the single quality of DURABILITY but Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts — shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

New York, Friday, July 30, 1880.

Government Faith with the Pacific Roads.

Of the general merits of *Poor's Manual of Railroads*, and the immense labor required for its compilation, nothing need now be said, as it is the most widely known and trusty collection of information on American Railroads. Its publishers, at the head of which is Mr. HENRY V. POOR, who has grown up in the closest intimacy with the American railroad system, have of late years adopted the plan of giving a prefatory essay relating to the growth, functions, and financial results of the roads. This year's edition, of which advanced sheets are now issued, contains, beside the usual statistics of mileage, earnings, tonnage, etc., a new departure for them—in the shape of a Review of the several recent decisions of the Supreme Court on the cases appealed by the two great Pacific Railroad Companies—the Union and Central—which, by their receipt of lands and credit subsidies, the politicians would have it appear, occupy a peculiar and anomalous relation to the Federal Government.

Mr. Poor's reasons for this course are too long for us to republish; but they are very cogent, and will be found excellent reading for all lawyers, capitalists and railroad men. According to his view a great and dangerous outrage has been committed upon vested rights of property in the first place by the Federal legislature, which has been in effect sustained by that judicial branch of the Government specially designed to protect such rights; and that if such doctrines are to stand as jurisprudence, we have, in this country at least, taken another long stride in the direction of mob-law, communism and anarchy.

It will be familiar to our readers that some four or five years ago, in what were known as "the Elevator cases," the Supreme Court ruled that when an individual erects an elevator alongside a railway or water-course, he so far dedicates it to public uses that the State, i. e. the people, acquire a right to say what shall be a reasonable and proper charge for the use of it. At the same term of the Court what were known as "the Granger cases" were passed upon, where it was held that certain Western States having made laws for the railroads prescribing the maximum rates for freight and fares, such statutes were competent, and were *prima facie* evidence of what was a reasonable charge which must be overcome by counter evidence. These latter laws were generally repealed afterward, because the railroad companies refused to work under them; but it was pointed out at the time that the Supreme Court seemed to be bowing to the agrarian clamor, and that such doctrines, if carried out to their logical conclusion, must destroy railroad transportation and storage property as investments for capital.

It now appears, from Mr. Poor's showing, for which he cites page and book, that the Supreme Court, after making a series of decisions to the effect that in dealing with these Pacific Railroad Companies the Government had, outside of its use of the roads, only the same status of a private person, that is to say, of a co-contractor; but in this last decision on the constitutionality of the "Thurman act" of May 7, 1878, the Court has, right in the face of its former utterances, and in defiance of sound reason, declared in effect that the Government, by its sovereignty, may break faith with these parties, and may require them to anticipate debts to it not yet due. True the Court has not said so in so many words, but while saying the contrary, has decided without allegation or evidence to that effect.

Lawyers will read his dissection of the majority opinion, sustaining this specious fallacy, with zest—especially when it is understood his Review has been submitted to eminent legal minds, who pronounce it unassailable. He charges that the Court—as if anxious to render its decision in a certain way—or rather the majority, there being three dissenting opinions (which like those of the Dred Scott case are declared to be the best law) one Judge, Hunt, being disabled—has invented and imported into the case an allegation of "waste," which nowhere appears either in the pleadings or the record. The companies have been condemned on an issue which never was tried, on allegations they had no opportunity to meet.

To those who know the managers of the Pacific Railroads a charge of mismanagement or waste will sound most strange and absurd; and Mr. Poor has taken the pains to prove by figures that the Government subsidy claim is abundantly secured, improving with the lapse of time, and could be paid off at its value any day if Congress would authorize private creditors to take the second lien now held by the Government; hence there was no urgent necessity for this Sinking Fund in the U. S. Treasury, which was the pretext for this act of doubtful power and questionable faith. We may surmise from Mr. Poor's remarks what influences have been at work to produce this unfortunate state of affairs, when we reflect that there were not less than half a dozen aspirants for the Presidency concerned in the passage of the Bill and the Court's opinions thereon. That, however, is in the past; the record stands, and as Mr. Poor points out, this decision touches in the first instance these rich companies, which are paying, under protest, into this badly-managed Sinking Fund; but behind and beyond them it reaches to all contracts with the Governments—national, State, or city. It countenances breach of faith, and may be used to justify national dishonor of all sorts. Unless speedily retracted it will be the

germ of new mischief and the decay spot of public morality.

Scalping and Ticket Forgery.

FORGING SCALPERS AND SCALPING TICKET AGENTS UNEARTHED BY LONERGAN'S SECRET SERVICE.

CLEVELAND, O., July 25, 1880.

The summary removal of five prominent Union Depot officials following close on the arrest of a number of scalpers, has created quite an excitement in this lively railroad center. Even the hubub of the Democratic State Convention which kept roads, hotels and everybody unusually busy during the week just ending, has not attracted more attention than the scalping prosecutions and the decapitation of Gen. Ticket Agent B. C. Harris, T. A. Fellows and A. L. Smith his assistants, George Meyers Depot Master and Willard Nutt Chief Baggage Master.

At first an impression prevailed that the discharge of these men—who were among the best known in the city and among the oldest railroad employees (one of 30 years' standing and none less than 10 years) was in some way connected with the arrest of the scalpers. This, however, turned out not to be the case.

The fact is that two separate and distinct rings have been broken up—one consisting of scalpers with train men as confederates and engaged in stealing tickets and forging them by "raising or stuffing;" the other ring composed of the depot officials mentioned for the purposes of scalping pure and simple. Considering their facilities for buying and selling tickets no doubt the members found it a profitable undertaking.

THE FORGERIES, RING NO. I.

The road more particularly affected by the forgeries was the C. C. C. & I., and it was under the orders of General Manager E. B. Thomas that some three months ago the services of T. E. Lonergan, the well-known railway detective of your city, were called for and the recent developments are the result of his work. For many weeks his men kept all the scalpers in the city as well as some in Columbus and Cincinnati and numerous suspected railway employees under complete and secret surveillance. Not a step was taken by them, nor hardly a ticket sale or purchase made that was not known to the company. At the same time the detectives, changing their role as "shadows" to that of commercial men anxious to obtain cheap rates, made frequent ticket purchases from all possible scalping sources and so obtained the necessary clew in the shape of forged tickets. This clew was followed up and led to the arrest of five scalpers, two train men and one commercial traveler, only two of whom however were proceeded against, a scalper named Geo. C. Mace, and T. A. Russell, a baggage master of the C. C. C. & I. Railway. The rest were quietly "run in" and as quietly let go on confessing and furnishing information against their more guilty accomplices—Mace, the wholesale dealer in forged tickets, and Russell, who supplied Mace, having stolen the tickets from his conductor's collection return packages entrusted to him for delivery at the company's offices. The tickets so stolen had been raised or stuffed or both—"raised" by cutting out the name of the selling station on any Cincinnati ticket for instance and pasting "Cleveland" in its place thus constructing a Cleveland-Cincinnati ticket; "stuffed" by filling up the conductor's punch marks so neatly as to make it difficult for anyone not an expert to discover the fraud. Stolen Columbus-Cincinnati transfer tickets were also unearthed and traced to the same parties; as regards a quantity of them much to the gratification of Conductor Daykin, of the C. C. C. & I., who had been unable to vindicate himself when the discovery was made in the course of the investigation that his tickets were missing.

After an examination lasting two days, before Judge F. H. Kelly, Mace, against whom seventeen forged tickets had been positively traced, withdrew his plea of not guilty and pleaded guilty. He was fined $25 and costs each in two cases; the maximum penalty provided by statute being $500 fine and six months' imprisonment.

T. A. Russell waived examination and was held to bail for the Grand Jury.

As a safeguard against a repetition of this kind of fraud the C. C. C. & I. road has withdrawn the old fashioned card tickets and has placed in use a new issue of engraved tickets printed by the American Bank Note Company of New York.

RING NO II.

While the forgery operation was going on a second detail of Lonergan's Secret Service agents took charge of the Union Depot—rather a "shadowy" charge, at the time unfelt and almost invisible, but no less thorough and searching than the attention bestowed on the scalpers in the city. Enough was soon discovered to justify the worst suspicions and positive evidence against the implicated employees was secured by the sale to each of them of at least one scalped ticket.

The tickets were all marked and in due time came back with other collections to the company's offices.

The subsequent plea in the Cleveland daily papers that the discharged depot officials had scalped a ticket for a poor emigrant *for charity's sake* does not seem to have prevailed before the Depot Board, Messrs. E. B. Thomas, General Manager C. C. C. & I., Gen'l Sup't Paine, L. S. & M. S., and Ass't Gen'l Manager Smith, C. & P. The board had evidence to confront them with showing that they had scalped not one but numerous tickets of the most expensive kind such as poor emigrants are not likely to travel on.

Messrs. Harris, Fellows, Smith and Depot Master Meyers finally admitted the entire correctness of the detectives' reports. Mr. Nutt denied, but had to go.

At present ticket scalping is not in favor in Cleveland. S.

Philadelphia and Reading Railroad.

Comparative statement of gross receipts, tonnage and passengers, of the Philadelphia and Reading Railroad Company, for the month of June, 1880 and 1879:

	1880. Month.	1880. Year to date.
Gross receipts:		
Railroad traffic	$1,288,167 73	$8,910,089 95
Canal traffic	69,024 11	317,177 63
Steam colliers	34,866 48	350,218 02
Richmond coal barges	6,478 40	54,569 45
Total Railroad Co.	$1,398,536 72	$9,632,055 05
Reading Coal & Iron Company	756,656 63	6,010,986 39
Total of all	$2,155,193 35	$15,643,041 44
Tonnage and passengers:		
Tons of coal on railroad	559,764 10	3,767,734 02
Tons of merchandise	476,442 15	3,456,652 07
Passengers carried	868,390	5,317,360
Coal transported by steam colliers	38,489 00	303,534 00
Tons of coal mined:		
By Coal and Iron Co.	266,599 01	1,809,818 05
By tenants	95,028 02	615,137 14
Total mined from lands owned and controlled by Co. & from leasehold estates	361,627 03	2,424,955 19

	1879. Month.	1879. Year to date.
Gross receipts:		
Railroad traffic	$1,179,140 84	$6,788,322 28

Loss.....	$145,205 87	$472,366 90

Quicksilver Mining Co.

About six years ago the Quicksilver Mining Co. decided to pay a dividend on its preferred stock, and also agreed with the holders of the common stock that if they would pay $5 per share they would be allowed to participate in the dividend. An injunction was, however, procured restraining the company from pursuing this course. It was decided that the preferred stockholders only were entitled to the dividend, and that decision was affirmed. Recently, a Referee was appointed to ascertain the indebtedness, receipts and disbursements of the company, together with the net earnings for each year ending May 1, since May 1, 1870, and report the same to the Court. The report of the Referee was submitted to Judge Barnard, at Poughkeepsie on the 3d inst., and after hearing argument upon it the Judge rendered his decision on the 23d inst., as follows:

It was the duty of the Directors to pay all debts, funded and otherwise, existing at the formation of the preferred stock. The term "net earnings" in the proceedings creating the preferred stock, means no more than such earnings of the company as are left after a wise administration of the affairs of the company The preferred stockholders have no right to prevent the payment of the company's debts, nor to exact a settlement based upon the claim that such payment of debts was made out of their moneys. When the affairs of the company would judiciously permit a dividend, then the first 7 per cent must go to the preferred stockholders. Until such a dividend can be declared, the preferred stock had no right to a yearly settlement, excluding the debts, or to a settlement on the basis that one should have been declared every year. Moreover, the course pursued by the company was acquiesced in by all the stockholders. Yearly statements were made showing these payments of debt, and no one objected. The stock, both common and preferred, was bought and sold with reference to this manner of disposing of the funds, and all parties concerned are bound by it. There is no other just way—if the view of the preferred stockholders is correct, to whom are the yearly preferred dividends to go? to the owners of the stock, when dividend ought to have been made, or to the present holders? no injustice is done to the preferred stockholders in allowing, as against them, these payments of debts. They were quite as much interested in paying the debts as the common stockholders. It made the property of the company free, and pledged the payment of the 7 per cent preferred dividend.

The debts paid for services rendered before the formation of the present company should also be allowed. The directors paid them, and the payments were acquiesced in. The money and cash assets on hand, are, therefore, the only basis of a dividend to the preferred stockholders. The rents should be allowed. It was part of the earnings of the property of the company. The Referee should have allowed the premium on gold sent to California. It was necessary to get gold there to use in California, where the works were, and the paper paid if sent would have failed by so much to pay the company debts. The report is vague as to what constituted products of the mines. If ore, it should not have been allowed as cash. The depreciations in value were properly reported. The $214,000 was not part of the capital of the company. I believe this covers all the points presented.

The report is not confirmed, but sent back to the Referee for correction in accordance with these views.

New, York, Ontario and Western Railroad.

The following communication has been sent to the New York Stock Exchange addressed to the Chairman Committee on Stock List:

DEAR SIR—Please find statement within of the capital stock account of the New York, Ontario and Western Railroad Company as per terms of the articles of reorganization of the New York and Oswego Midland Railroad Company. The amount of cash paid into the treasury of the new company is as follows:

On account twenty per cent assessment	$7,556,208
On account thirty per cent assessment	1,816,350
And a further contingent sum of....	388,000
Total	$9,760,558
Preferred stock	$2,000,000
Common stock	48,000,000
Total	$50,000,000
Additional stock procured by legislative authority	15,000,000
Total	$65,000,000
Stock issued upon old first mortgage bonds	$13,000,000
Stock issued upon twenty per cent assessment	35,000,000
Stock issued upon additional twenty per cent assessment	2,770,000
Stock issued upon thirty per cent assessment	6,054,450
Total	$56,824,450

—and the further sum of $1,295,550, which may be issued upon the payment of the further sum of $388,000, which sum was tendered and refused after the service of a notice of an injunction restraining the issue of any more stock, except upon the payment of a 30 per cent assessment and upon any stock in excess of $50,000,000. The excess of $8,824,450 will not be delivered to the parties paying the assessment until after the expiration of thirty days' notice to the Stock Exchange, as required by its rules.

Very respectfully,
C. A. JORDAN, Chairman.

NOTE.—We consider that our right to issue stock is exhausted, and that the amount stated herein is the absolute amount of the capital stock of the new company—i. e. $56,824,450 plus $1,295,550 if $388,000 is paid in.

Bessemer Steel Rails.

From a report recently issued by the American Iron and Steel Association it appears that the increase in demand for Bessemer steel rails since their introduction in 1867 has been marked, each successive year showing a larger aggregate. It is shown by the report that in 1867 the output of steel rails amounted to 2,550 net tons, which kept on increasing, until in 1872 there was produced 94,070 tons; in 1876, 412,461 tons; in 1878, 550,398 tons; and in 1879, 683,964 tons. The rapid increase in the use of steel rails is one of the best features of the history of rail production in this country. The improved methods in their manufacture and their decrease in the average price from $158 50 a ton in 1868 to $48 25 in 1879, or $42 25 a ton in 1878, has brought them into general use, enabling the trunk lines and many new roads to employ them, thus decreasing the yearly expense of repairs and the cost of frequently relaying required when iron was the only rail used. The lowest price touched by steel rails was $40 a ton, in November and December, 1877. During the late "boom" prices advanced to $85 a ton in February, 1880, since which time they have declined to $55 a ton.

Mineral Wool.

The mineral wool plant at Greenwood Iron Works, Orange county, has been worked to its full capacity without interruption for the past six months, and no stock is accumulating. The Pennsylvania Railroad Company has now over 300,000 pounds of this material in actual use, most of it for deadening floors of passenger cars, and recently ordered 126,000 pounds more for early delivery. Among other large orders recently filled we note a sale of 35,000 pounds to the St. Louis water works, for boiler and pipe covering; a car-load of 22,000 pounds each to the Barney & Smith Manufacturing Company, of Dayton, Ohio, and the Cincinnati Gaslight and Coke Company, several lots to the Edgar Thomson Steel Company and Gautier Steel Company, Limited, and two carloads for the deadening of all floors in one of the finest residences of Fifth avenue, New York, now nearly completed.—[Am. Manufacturer, Pittsburgh, July 23, 1880.

☞ The President and Secretary of the Drum Point Railroad Co. are now at Annapolis, Md., preparing to present their claim to the county commissioners for $200,000 subscription from Anne Arundel county on the 3d of August. With this subscription the company claim it will have a half million available for the construction of the road, viz., $134,000 lying in the State treasury for the use of Calvert county, $100,000 subscription from Calvert, $200,000 from Anne Arundel county, and $78,000 that could be realized for private subscriptions.

☞ The Northern Pacific Railroad Company now operates 716 miles of main track, divided as follows: Duluth to Brainerd, 115 miles; Brainerd to Fargo, 138 miles; Fargo to Bismarck, 194 miles; Bismarck to Green River, 103 miles; Brainerd to St. Paul, 186 miles; Casselton to end of track, 80 miles. It is expected that 100 miles more of main track will be added to the western end before cold weather sets in.

☞ M. F. Pleasants, master, in pursuance of a decree of the United States Court for the Eastern District of Virginia, has advertised that he will sell in Richmond, Va., on the first day of November next, all the mortgaged premises, franchises and property, both real, personal and mixed, of the Atlantic, Mississippi and Ohio Railroad Company.

☞ An idea of the importance of the Los Angeles division of the Southern Pacific Railroad can be gathered from the fact that there are now at Los Angeles fifty locomotives, sixteen of them among the largest in the United States, besides an almost countless number of cars of every description, to which additions are being made almost daily.

☞ The proposed extension of the Baltimore and Cumberland Valley Railroad, from Waynesboro to Chambersburg and Shippensburg, is being resurveyed, and the road, it is thought, will soon be constructed.

British Trade with India.

Mr. J. E. O'Connor, assistant secretary of department of finance and commerce of Great Britain, in his review of the trade of British India for the year ended March 31, 1879, directs attention to the constantly declining proportion of the trade of India carried on directly with England. Thus, in the fiscal year 1868-'69 the percentage of trade with United Kingdom to total trade with all countries was 67.18 per cent, while in 1878-'79 it had falled to 56.25 per cent. This decline in proportion, moreover, is not compensated for by an increase in volume, for the imports and exports of merchandise from and to the United Kingdom in 1868-'69 aggregated £59,789,270, while in 1878-'79 it only reached £54,815,983.

Statement of the Public Debt of the United States, July 1, 1880.

DEBT BEARING INTEREST.

	Amount Outstanding.	Accrued Interest.

Totals.....	$64,623,512 00	$1,938,705 36

Interest paid by United States, $45,651,185 94; interest repaid by transportation of mails, &c., $13,615,292 55; interest repaid by cash payments: 5 per cent net earnings $653,198 87; balance of interest paid by United States $31,380,664 52.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, June 30, 1880.

JOHN SHERMAN,
Secretary of the Treasury.

Pennsylvania Railroad.

The statement of the business of all the lines of the Pennsylvania Railroad Company east of Pittsburg and Erie, for June, 1880, as compared with the same month in 1879, shows:

An increase in gross earnings of.....	$830,666
An increase in expenses of.....	419,413
An increase in net earnings of....	$411,253

The six months of 1880, as compared with the same period in 1879, show

An increase in gross earnings of.....	$4,020,018
An increase in expenses of.....	1,771,460
An increase in net earnings of....	$2,248,558

All lines west of Pittsburg and Erie for the six months of 1880 show a surplus over liabilities of $1,311,136, being a gain over the same period in 1879 of $1,730,478.

☞ The gross earnings of the Burlington, Cedar Rapids and Northern Railway Company for the month of June were $158,877 90, and the net earnings $50,106 21, against $37,101 59 net earnings last year. Net earnings for the year ending June 30 were $678,608 08, against $437,308 35 last year.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, July 29, 1880.

In the money market the rates for call loans are 2@2½ per cent; for time loans 2@4 per cent, and for prime mercantile paper 3½@4½ per cent.

The market for demand sterling is steady to firm at about 4.84¼@¼ for prime, the posted rate being 4.85. Sixty-day sterling is weak, with business in prime at 4.82@¼, the posted rate being 4.83. Cable transfers are 4.84¾@4.85, and prime commercial bills 4.80@½.

From a statement prepared at the Treasury Department it appears that the public debt, less cash in the Treasury, on the 31st of August, 1865, was $2,756,431,571 43. Since that time the decrease has been as follows: for the 11 months ending June 30, 1866, $120,395,407 59; for the year ending June 30, 1867, $127,884,952 15; June 30, 1868, $27,297,798 46; June 30, 1869, $48,081,540 14; June 30, 1870, $101,601,916 88; June 30, 1871, $84,175,887 54; June 30, 1872, $97,213,538 32; June 30, 1873, $14,318,469 60; June 30, 1874, $1,312,907 06; June 30, 1875, $14,107,983 56; June 30, 1876, $29,115,829 68; total decrease from August 31, 1865, to July 1, 1876, $695,506,230 98. The decrease from July 1, 1876, to January 1, 1878, was $52,400,182 94; from January 1, 1878, to January 1, 1879, $14,718,839 38; from January 1, 1879, to January 1, 1880, $6,699,767 01; from January 1, 1880, to July 1, 1880, $67,779,803 37, making the total reduction of the debt from August 31, 1865, to July 1, 1880, $837,104,823 68.

The returns from the Bureau of Statistics at Washington show an excess of exports over imports of merchandise in the year ended June 30, 1880, of $167,908,359, against $264,661,666 in the previous year. The excess of imports of bullion in the past year was $75,891,391, against an excess of imports in the previous year of $4,701,441. The value of the exports of merchandise during the year ended June 30, 1880, exceeded the value of the exports of merchandise during the preceding year about $125,000,000, or 18 per cent; and the value of the imports of merchandise exceeded the value of such imports during the preceding year about $222,000,000, or 50 per cent. The value of the imports and exports of merchandise during the fiscal year just closed amounted to $1,503,679,489, being about 81 per cent greater than for 1870, and nearly 119 per cent greater than for 1860. The exports of coin and bullion during the year ended June 30, 1880, were about $7,800,000 less than during the preceding fiscal year; and the imports of coin and bullion exceeded the imports during the preceding fiscal year about $72,700,000.

The Government bought on Wednesday $2,000,000 bonds from offerings amounting to $4,590,650. The prices paid were from 102 to 102.28 for 6s of 1880, from 104.29 to 104.45 for 6s of 1881, and from 103.64 to 103.72 for 5s of 1881. This was the first purchase for the month.

Government bonds at the Board were strong throughout; State Bonds were neglected; Railroad bonds were strong and generally higher; and Railroad shares, compared with the quotations of the previous week have advanced in price.

The closing quotations on Thursday were: Atlantic and Pacific Telegraph, 45⅜@45½; Canada Southern, 63@63¾; Central of New Jersey, 76½@76¾; Central Pacific, 72@73⅜; Chicago and Northwestern, 97⅝@97¾; do. pref., 114¾@115; Chicago, Burlington and Quincy, 124½@125; Chicago and Alton, 114@115; Chicago, Milwaukee and St. Paul, 87@87⅛; do. pref., 106¾@106⅞; Chicago, Rock Island and Pacific, 110¾@111⅜; Chicago, St. Louis and New Orleans, 35@36; Cleveland, Columbus, Cincinnati and Indianapolis, 71@72; Columbus, Chicago and Indiana Central, 17⅝@17⅝; Delaware and Hudson Canal, 81½@82; Delaware, Lackawanna and Western, 85¼@85½; Hannibal and St. Joseph, 35½@35¾; do., pref., 72@72½; Houston and Texas Central, 63@65; Illinois Central, 107⅜@107⅞; Lake Erie and Western, 32⅞@33⅛; Lake Shore and Michigan Southern, 108¾@108⅞; Louisville and Nashville, 119½@120; Manhattan Railway, 27⅛@27½; Morris and Essex, 105⅛@106; Metropolitan Elevated, 91@92; Michigan Central, 94½@94¾; New York Elevated, 110⅛@112; New York Central and Hudson River 131½@131¾; New York, Lake Erie and Western, 43¾@44; do. pref., 70½@71; New York, Ontario and Western, 27@27½; Northern Pacific, 31¼@31½; do. pref., 55⅛@55⅝; Ohio and Miss., 33⅜@33⅞; do. pref., 72½@73½; Panama, 178@181; Pacific Mail, 43¼@43½; Philadelphia and Reading, 18⅛@18⅝; St. Louis and San Francisco, 38@38½; do. pref., 49½@50; do. 1st pref., 74@77; St. Louis, Iron Mountain and Southern, 53¼@53½; Union Pacific, 91⅞@92; Western Union Telegraph, 107¾@108; Wabash, St. Louis and Pacific, 41¼@41½; do. pref., 70¼@70¾.

Northern Central Railway.

The following is a comparative statement of the earnings, operating expenses and net earnings of the Northern Central Railway Company for the month of June and for the six months ending June 30, 1879 and 1880:

Month of June—	1880.	1879.
Gross earnings	$419,193	$315,307
Operating expenses	275,966	267,240
Net earnings	$143,227	$48,067
Six months ended June 30—	1880.	1879.
Gross earnings	$2,215,791	$1,834,520
Operating expenses	1 527,076	1,343,524
Net earnings	$688,715	$490,996

☞ The report of the directors of the Chesapeake and Ohio Canal shows that the revenue received for the month of June was $50,000. The coal tonnage up to the 30th June was 234,000 tons, an increase of 27,000 tons over the corresponding period of last year. Seventy-five thousand dollars of debt for material and labor on the canal for the current year has been liquidated by the board.

Pennsylvania Railroad.

The gross earnings, operating expenses and net earnings of the Pennsylvania Railroad for the month of June, 1879 and 1880, were:

	1879.	1880.
Gross earnings	$2,390,809	$3,221,475
Operating expenses	1,789,905	2,209,318
Net earnings	$900,904	$1,012,157

—showing an increase in gross earnings of $830,666, in operating expenses of $419,413, and in net earnings of $411,253.

For the six months ending June 30, 1879 and 1880, the earnings, expenses, etc., were:

	1879.	1880.
Gross earnings	$15,414 056	$19,434,060
Operating expenses	9,568,291	11,339,751
Net earnings	$5,845,465	$8,094,309

—showing an increase in gross earnings of $4,020,013, in operating expenses of $1,771,460, and in net earnings of $2,248,553.

West of Pittsburg and Erie all lines show a surplus over liabilities of $1,311,136, a gain of $1,730,473 over the same time last year.

☞ The large new locomotive constructed by the Baldwin Locomotive Works to be run on the Bound Brook branch of the Philadelphia and Reading Railroad, and which has since the suspension of that company remained in possession of its builders, was last week purchased by Mr. F. W. Eames, of Watertown, N. Y., for brake trials and tests in England. It will be immediately fitted up with the Eames Duplex Automatic Vacuum Brake and shipped to London. Mr. Eames proposes, while showing the action of the Eames brake on railway trains at the highest speed possible to attain, at the same time to settle the vexed question of the relative superiority of American and English locomotives. The locomotive will be ornamented with a fine portrait of its namesake, Lovett Eames, and also landscape views of Black River Falls, the Suspension Bridge and the lower end of Beebee's Island, showing the works of the Eames Vacuum Brake Company.

☞ The Denver and Rio Grande Railroad has now over 500 miles in operation, and it is expected that this will be increased to 900 miles before the close of the year. The trains of the Denver and Rio Grande now run from Denver to Leadville, to El Moro, and to Tres Piedras, New Mexico, 64 miles south of Alamosa, and before the end of July will run 50 miles west of San Antonio (29 miles beyond Alamosa) in the San Juan country.

☞ Articles of incorporation of the Council Bluffs and Eastern Railroad Company were filed on the 22d of July proposing to build a line of road from Council Bluffs directly east to some points on the Mississippi River. The officers are J. T. Baldwin, President; Thomas Bowman, Secretary; W. C. James, Superintendent; Jacob Williams, Treasurer, all of Council Bluffs, Iowa.

☞ Three ships loaded with material for the Pend D'Oreille Division of the Northern Pacific Railway have arrived at Portland, Oregon, and the whole division, 210 miles long, will be completed this fall. Another ship, loaded with railroad rails for this important line, is now rounding Cape Horn.

☞ The gross earnings of the Philadelphia and Erie Railroad Company for the month of June, 1880, were $331,023 50; expenses, $242,609 08; net earnings, $88,414 42; net earnings six months of 1880, $626,908 73; net earnings six months of 1879, $348,112 54; increase, $278,796 19.

☞ From Phœnix, Arizona, July 19th, we learn that the surveyors to locate the line of the Arizona Central Railroad had arrived and gone to work. They report that track laying will commence inside of two months, and the cars will be running to Phœnix inside of four months.

☞ Thomas Franklin, who has been engaged several months in the building of the Charlottesville and Rapidan railroad, Virginia, has received the contract to make a survey of the proposed route of the Annapolis and Baltimore Short Line railroad.

☞ The Pittsburg Chronicle says that the work of laying the rails on the extension of the Bell's Gap Railroad, which will run from Lloydsville for a number of miles further north, will be commenced about the 1st of August.

☞ The extension of the Central Railroad of New Jersey from Sea Girt to Point Pleasant will be open for traffic on the 1st of August. A special car will connect with all trains on the Pennsylvania Railroad at Sea Girt.

☞ The grading on the Little Rock, Mississippi River and Ouachita railroad is completed from Pine Bluff, Ark., ten miles north toward Little Rock, on which the rails will be laid by the 1st of August.

☞ The counties which have voted subscriptions to the Richmond and Southwestern Railroad are: Craig, $23,150; Cumberland, $50,000; Gloucester, $50,000; Tazewell, $18,009; Bland, $20,000; Buckingham, $60,000.

☞ The Eames Vacuum Brake has been patented in England, and will be introduced on the Great Northern Railway. Over fifty roads in this country are now using it, and it is highly recommended by them.

☞ The bonded indebtedness of Arizona is $115,000. This floating debt is $79,876, making a grand total of $194,876, bearing ten per cent interest.

☞ The Texas and New Orleans Railroad will be formally opened between Houston and New Orleans on the 15th of August.

☞ The New York Central and Hudson River Railroad is to be equipped with the Westinghouse Automatic Brake.

☞ Over thirty-five miles of the Danville, Olney and Ohio River Railroad is now laid with iron and in running order.

☞ The Georges Creek Coal and Iron Company has declared a dividend of $3 25 per share, payable 3d of August next.

☞ The sale of the Flint and Pere Marquette Railroad will take place on the 16th of August.

Baltimore and Drum Point Railroad.

At a meeting of the directors of the Baltimore and Drum Point Railroad Co., held in Baltimore on the 21st inst., an official communication was received from the commissioners of Calvert county, stating that they had accepted the propcsition of the company as to the payment of the subscription of $100,000, in county bonds, for the benefit of the railroad, as authorized by popular vote. The bonds are to be issued in accordance with the law, namely: $25,000 when one-third of the road has been graded, $25,000 when two thirds have been graded, $25,000 when the whole road has been graded, and $25,000 when the road has been completed. The bonds as issued, are to be placed in the hands of the president of the board of county commissioners, to be turned over to the company on completion of the road. The directors adopted a resolution authorizing the president to finally close the agreement with the authorities of Calvert county. The prospects of the early completion of the road are now considered to be most favorable, and the work of construction will begin as soon as a final arrangement has been made with the authorities of Anne Arundel county in regard to its subscription. Augustus Albert is President and John G. Butler Secretary of the company.

[From the Fortnightly Review.]

The Railroads of the United States.

THEIR EFFECTS ON FARMING AND PRODUCTION IN THAT COUNTRY AND IN GREAT BRITAIN.

By Edward Atkinson.

[Continued from page 815.]

As Daniel Webster once replied to the objection made to the importation of the product of pauper labor from abroad, "We cannot afford to do for ourselves what foreign paupers can do so well for us," so we may now say in the East, that we cannot afford to work with our hands on crops which Western farm machinery can produce so cheaply for us. This mechanism can only be applied with economy on a large scale, and where the soil is in a very comminuted condition, free from loose stones, boulders, ledges or stumps of trees.

Such is the character of the prairie soil,—in fact, of the arable land extending east and west from Central Ohio to Colorado, and north and south from Manitoba to Mississippi; this whole valley of the Mississippi and its tributaries now being assigned by some goelogists to the loess formation.

Such having been the changes that the railroad has worked in the East in enabling us to spare our labor from that which used to be our most arduous work, and apply it to occupations which give us more comfort, more wealth, and more prosperity; and since the railroad can be worked probably at much less than one cent or a half penny, a ton per mile, and on these bulky products of corn and meat at half a cent, or one farthing, per ton per mile,—it may now be asked, what is to be the permanent effect of the steamship in enlarging the area of cheap transportation on the English production of corn and meat? In California the rains last only four months; in that State and in Colorado, by irrigation, crops of wheat are made exceeding the English average product per acre. Elsewhere our average crop per acre may not be over one-half or three-fifths; but the area on which this production is possible is subject to no limit for many generations.

An American observer may not pronounce dogmatically upon the possible effect of the competition between those lands and the wheat fields of Great Britain. But it may be asked, can any system of high farming under restrictions compete with these conditions? Can any land, subject to any rent whatever, compete in the production of wheat and meat with these conditions of unlimited areas of land at a cost of $2 to $3, or 8s. to 12s., an acre, and rates of transportation at half a cent a ton, or one farthing per ton, per mile of rail, when the steamship continues the transportation at a less and less charge as improvements continue to be made in the construction and running of the ships?

Can any rented land, subject as it must be to special conditions in the leases as to the rotation of crops, the amount of stock to be kept, and other restrictions necessary to maintain it in condition, compete with these vast areas free from all restriction?

As time goes on, must not English farming adjust itself in the same manner that Eastern farming has adjusted itself to these new conditions? that is, to the variety of products that will not bear long carriage, and that requires more and more the individual ownership of small farms, free from onerous rents, and from the more obnoxious conditions of leases and settlements.

May not these conditions tend in the long run, and after the set lement of the temporary difficulties of land tenure now pressing upon Great Britain, as they have here, to greater general prosperity and abundance, and to far greater variety of food at less and less cost to the consumer? Such having been the results without question in the United States, especially in respect to the changes in the older sections of the East, must not the same causes inevitably work the same results across the sea? If these points are well taken, we may now be witnessing not the decadence of the agriculture of Great Britain, but the very beginning of its true progress, and the opening of an upward movement among the agricultural population to greater welfare and prosperity.

If the competition of Western grain and meat renders the present system of leasing and working land in Great Britain absolutely and permanently unprofitable, and that system cannot be applied to the greater variety of methods of cultivation and of crops that have succeeded wheat culture in the East, then the interest of both land owner and tenant will coincide in making the changes required, no matter what the sacrifice of social position may be that is involved in the change. The ownership of land without income will not give much distinction. When these changes are complete, the time may perhaps come when simple printed forms of deeds and rules of registration will enable the town clerks, justices of the peace, or other intelligent persons, to do all the work of the conveyancer as they now do in most of the country towns of New England.

In the first half century after the settlement of Plymouth Colony, the title to land passed by declaration before the governor or one of his assistants, duly recorded without the execution of any written deed whatever, and without the signature of the vender being required. Many of these deeds are in the simplest possible form of description, and are entirely free from legal technicalities. At the present time the written deed of land possesses little importance after the record is made.

It will be obvious that this adjustment to the new conditions brought into force by the railroad could not have been made without very great difficulty in the eastern parts of the United States, had there been any system of landlord and tenant as to farm lands. Had not the purchase, sale, and division of lands been free, the examination of title easy and cheap, and the registration of deeds effective in every county, and had we not been absolutely free from the incumbrances of entails and settlements, we should have been subjected to as great difficulties as are now being met in Great Britain and Ireland.

It may be broadly stated, that the adjustment of production to changing conditions, brought into action by science and invention in the United States has been made possible by the free conditions, not only in the sale, but in the use, of land throughout the country.

The modern cheese factory is an example of an invention requiring absolute freedom in the use of land. If it were made incumbent on the farmer to feed the refuse of cheese making to stock upon the land on which the stock fed, the cheese factory would not be practicable. The farmer must sell his milk, and restore his land in his own way. Absolute freedom in use is as necessary as freedom in purchase and sale.

In respect to wheat it would be very desirable to be able to treat the subject of the actual cost of production, in order to state the exact terms of the competition between this country and Great Britain. Several attempts have been made to ascertain the exact cost of production on the field, but it is as difficult as it is to ascertain the cost of raising cotton. Some of the elements may be stated with sufficient accuracy for the purpose of the present investigation. Let us consider an extreme case—the wheat produced in the territory of Dakota, from which point it is now brought in very large quantity, and where some of the furrows are said to be a day's journey in length. The soil is in the finest condition, very deep, full of phosphate, lime, and potash, and has been fertilized by myriads of buffalo roaming over it for ages. Estimates of the cost of raising wheat on these "bonanza farms," so-called, vary from 37 to 50 cents a bushel—or from 12s. 4d. to 16s. 8d. per quarter.

Within the limits of the land grant of the Northern Pacific Railroad in that section are wheat lands of the best quality far more than equal to the area of all the land under cultivation in Great Britain and Ireland. The bonds of the Northern Pacific Railroad (which road failed in 1873, but is now appearing to prosper again) are convertible into these lands, and can be purchased at such prices that the land will not cost the buyer more than $2 or $3 per acre. The great farms now under cultivation cost the owners but a trifle, as they were bought with bonds purchased immediately after the panic at a few cents on the dollar. The average product of wheat is twenty to twenty-five bushels per acre.

The intermediate sections of government land can be bought at $1 25 cents to $2 50 cents per acre, and are open to actual settlers under the homestead law without cost.

The cultivation is all done by machinery; and the grain-binder, invented and applied within two or three years, has done away with the last element of manual labor.

It does not seem probable, to say the least, that any other method of cultivation can possibly compete with this, although it is possible that even this section will be excelled in cheapness of production on the irrigated wheat-manufactories of Colorado and in California on lands that are rainless during the harvest-season.

It is perfectly safe to assume that the production of wheat in this section will increase so long as it brings half a dollar, or two shillings sterling, per bushel.

How entirely undetermined the cost of transporting wheat from the Red River of the North, in Dakota, to Liverpool, now is, will be seen by the following statement.

The distance may be divided substantially as follows in round figures:

	Miles.
From Dakota to Chicago.....	650 to 900
From Chicago to New York or Boston.....	950 to 1,000
Boston or New York to Liverpool, about	3,000

Within a year the rates of freight between Chicago and the seaboard have varied from $3 to $7 per ton of two thousand pounds.

From the seaboard to Liverpool, from 3d. to 9⅛d. per bushel, or from $2 to $5 66 cents per ton.

The rate on wheat from Dakota to New York has been from $14 to $16½ per ton. It will thus appear that the charge on the railroad beyond

Chicago for an average of about seven hundred miles has been $9 to $10 per ton: therefore, if the traffic this side of Chicago can be carried on at the price of the last year or two, there is a margin for reduction on the distance beyond Chicago to Dakota of $4 to $6 per ton whenever the railway service in that direction is consolidated and worked as effectively on that side of Chicago as it is on this side.

On the whole it may be said that the charge for moving wheat from the Red River of the North to Liverpool has varied during the past season from $17 to $22 per ton of two thousand pounds, and that there is reason to expect such improvement that the average rate will be $16 to $20 or 48 cents to 60 cents per bushel.

Whatever the wheat brings in Liverpool above this charge and the charge for commissions, insurance, and incidental expenses, constitutes the remuneration of the wheat manufacturer of Dakota.

These figures are sufficiently accurate for an approximate estimate, and the wheat-cultivation of Dakota increases rapidly under these conditions.

Land in Dakota will average three-quarters or twenty-four bushels of wheat per acre in a fair season. The product of an acre can be landed in Liverpool or London at 50 cents or 2s. per bushel now, and prospectively for less, or at £2 8s. for the cost of transportation per acre.

The average return per acre of English wheat land in Dakota for the last six years appear to have been.....	£7 4
Deduct cost of transportation from Dakota.	2 8
	£4 16
Deduct for insurance and other charges, say about 6 per cent.....	0 6
Remainder	£4 10

A trifle over 90 cents per bushel as the ample remuneration of the farmer in Dakota or elsewhere.

Although all the elements of the problem are thus undetermined, one proposition may be stated dogmatically; to wit, that there are many parts of this country where wheat will be raised in increasing quantities at and above 50 cents per bushel, and whence it can be carried to Liverpool at 50 cents per bushel, or less, and landed at £1 14s. per quarter.

In respect to maize, it may be said, that, upon the fat lands of Indiana and Illinois, a boy working a pair of horses can make one hundred tons in one hundred days in a good season. Upon corn raised at this measure of labor, Western hogs are fed, and the cattle from the plains of Texas and Colorado are fattened.

Such being the conditions, it seems very certain that we shall continue to supply Great Britain and Western Europe with ever-increasing quantities of bread and meat. There will doubtless be a temporary check to our shipments when good seasons return in Europe, which may bring on a commercial temporary revulsion of greater or less severity here, unless our vicious legal-tender paper debt currency is paid and withdrawn from circulation before the change. The change of conditions is, however, a permanent one; and it seems probable, to say the least, that this country must hereafter be the great source of the staple products of grain, meat, and cotton, for the use of the civilized world. It has been suggested, that, whenever Russia and Eastern Europe are in a normal or peaceful condition, their competition will again be felt, and that the opening of the Suez Canal will bring increasing supplies of wheat from India.

To this suggestion it may be answered, that cheap labor, measured by low wages, does not always mean—in fact, seldom means—low cost of production. In the use of complex machinery in the factory or on the farm, a few hands at high wages compass the largest product at the lowest cost.

One operative in Lowell, working machinery one year on cotton-drills for China, produces eight thousand pounds of cloth, enough to clothe sixteen hundred Chinamen for a year at five pounds each, or thirty-two hundred East Indians at two pounds and one-half each. No hand spinning or weaving can long compete under these conditions; neither can the farm-laborers of India or Eastern Europe compete with the machine-made wheat of the United States.

Our ports at present occupied may be insufficient for the work, and harbors that are now deserted or unused may be connected with our railways in order to provide sufficient room for the great commerce that is to come.

May not the cheap food and other material thus supplied to Great Britain render her mills and works again prosperous, and the export of their products not only secure recompense for her own laborers, but also pay for our own import of tea, coffee, silks, spices, and other eastern goods?

We sell England the food and the material; England works the mills and sells the product to the Far East. We buy the tea, coffee, and sugar; in the London clearing-house the balance is settled. The exchange has worked benefit to all, and has harmed none.

Already the increasing demand of our own country is absorbing the product of our own mills, mines, and iron works, and even more than their product. Already our export of manufactured cotton goods is being affected by the activity of the home demand, and hundreds of looms are being turned from the export fabrics to those used at home.

The independence of nations, and, most of all, of the English-speaking people, asserts itself in spite of all the obstacles that man and nature can interpose; and the Anglo Saxon race will assert itself and its consanguinity on the two sides of the ocean in the way that must ultimately yield the greatest good to the greatest number.

(To be continued.)

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending July 17, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1880.	1879.
Reading Railroad ...	114,353	3,994,701	4,682,567
Schuylkill Canal....	9,740	210,479	474,429
Lehigh Valley.....	88,508	2,566,793	2,539,432
Del.,Lack. & Western.	59,108	1,734,964	1,901,271
Shamokin Valley....	16,738	411 572	455,041
Central New Jersey..	64,605	1,742,234	2,024,951
United R. R. of New Jersey	24,261	534,104	490,197
Pennsylvania Coal ..	22,257	513,020	750,252
Delaware and Hudson	44,820	1,529,125	1,697,449
Huntingdon & Broad Top Mt.....	5 366	247,480	174,248
Penn. and New York.	18,359	669,376	732,072
Clearfield, Pa.....	41,653	771,953	805,539

The total tonnage of anthracite coal from all the regions for the week ending July 17, as reported by the several carrying companies, amounted to 401,069 tons, against 584,413 tons in the corresponding week last year, a decrease of 183,344 tons. The total amount of anthracite mined for the year is 11,206,880 tons, against 13,450,400 tons for the same period last year, a decrease of 2,243,520 tons. The quantity of bituminous coal sent to market for the week amounted to 94,197 tons, against 85,059 tons in corresponding week last year, an increase of 9,138 tons. The total amount of bituminous mined for the year is 2,177,688 tons against 1,877 071 tons for the corresponding period last year, an increase of 300,617 tons The total tonnage all kinds of coal for the week is 495,266 tons, against 669,472 tons in corresponding week last year, a decrease of 174,206 tons, and the total tonnage for the coal year is 13,384,568 tons against 15,327,471 tons to same date last year, a decrease of 1,942,903 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the second week of July was 134,265 tons, of which 100,323 tons were coal and 33,942 tons coke. The total tonnage for the year thus far has been 3,635,674 tons of which 2,729 520 tons were coal and 906,154 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended July 17 were 42,670 tons, and for the year to that date 1,105,097 tons —279 640 tons over the corresponding period of 1879. The shipments to the Baltimore and Ohio Railroad for the week were 25,805 tons, and for the year 717,343 tons, an increase of 227,528 tons over 1879. The shipments to the Chesapeake and Ohio Canal for the week aggregate 14,181 tons, and for the year 267,953 tons, an increase of 20,537 tons as compared with last year. Shipments to the Pennsylvania Railroad for the week were 2,684 tons, and for the year 120,161 tons, an increase of 31,574 tons as compared with 1879. —Phil. Ledger, July 26.

☞ The road now in course of construction between Haddonfield and Medford, leaving the Camden and Atlantic Railroad at the former place, will be, when completed, 11½ miles in length. It will cross numerous creeks and streams. The contractor for building the road is James J. Ryan, of Philadelphia, who is pushing the work vigorously, and expects to have the road completed by January 1st, 1881. In about three weeks four miles of the road bed at Anderson's will be completed, and the laying of the track will be begun within a month.

☞ The Galveston Brazos and Colorado Railroad is to be sold August 24 under foreclosure proceedings. The sale is under a mortgage loan of $100,000 eight per cent 25 year bonds, issued in 1877. Interest is due since January, 1878, and the fifteen miles of narrow gauge road completed north of Galveston are to be sold, with the appurtenances. The Guarantee Trust Company of Philadelphia is trustee under the mortgage.

☞ The Pennsylvania Railroad Company are about to erect at Philadelphia, Pittsburg, Altoona, Harrisburg, Columbia, Jersey City and other points along the line of their road, a number of buildings for the accommodation of their train hands. Each building will contain a waiting room, dormitories, wash and bath rooms and a large reading room, supplied with daily and weekly newspapers and periodicals.

☞ The contract for bridging the Ouachita river at Monroe, La., has been let to the Baltimore Bridge Company by the Vicksburg, Shreveport and Pacific railroad. The bridge will be an iron one, 870 feet long, with two spans each 240 feet and one 90 feet. The bridge is to be completed by the first of January, and will be the finest structure of its kind in the State. The cost will be about $140,000.

☞ The engineer corps of the Cincinnati and Northern railroad (Miami Valley Narrow gauge) is making a thorough survey of the entire line preparatory to awarding contracts for the completion of the road.

☞ The complete census of Rhode Island gives her a population of 276,710, and an increase of 59,307 since 1879. Rhode Island is the first State to report its full population to the Census Bureau.

☞ That portion of the new mill of the Phœnix Iron Company, Phœnixville, Penn., which has been put in operation recently, is working admirably. Those who have been called upon to work the iron are surprised to find so little foreign matter in it. As there is no coal in the furnace, the iron being entirely heated by gas, it could not well be otherwise. In consequence of this the iron is of a superior quality to any ever made at the works.

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY,
TREASURER'S OFFICE, GRAND CENTRAL DEPOT,
NEW YORK, June 26, 1880.

THE DIRECTORS OF THIS COMPANY HAVE this day declared a DIVIDEND of 4 PER CENT upon its capital stock, payable on the SECOND DAY of AUGUST next at this office. The Transfer Books will be closed at 3 o'clock p. m. on SATURDAY, the 3d day of July next, and will be reopened on the morning of FRIDAY, the 6th day of August next.

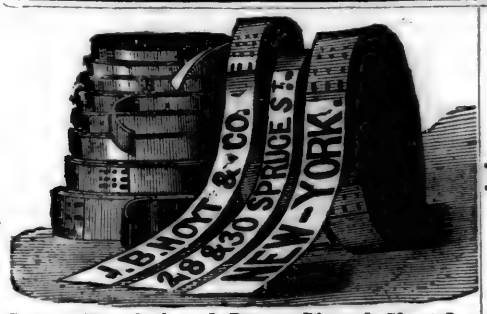
VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.



All know it is easy to make a Varnish that has the single quality of DURABILITY but Varnishes which wear well are generally inferior in color and working quality uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts—shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

Rubber Belting and Hose and Packing at lowest prices.

New York, Friday, August 6, 1880.

The Railroads and the Farmers, East and West.

We continue, in this issue, Mr. Edward Atkinson's instructive article from the English *Fortnightly Review*, illustrating, with a wealth of statistics and a fertility of reasoning, the function of the railway on this Continent, and its effect on various branches of industry, especially farming, in the Western States, in the Eastern, and in Europe. Our readers will turn to the article itself both for pleasure and instruction, for a more comprehensive and masterly survey has nowhere appeared. The gradual, but no less real, elimination of the element of distance from the problems of supply of breadstuffs and commodities, is one of the important factors in modern business, and even in the subsistence of communities.

The anomalous state of things that cargoes of flour were carried at about 22 cents per bbl. from Minnesota to New York, 1,500 miles, by rail, and at half that rate, by sea, to Liverpool could not but precipitate a revolution in the breadstuffs and farming pursuits. That particular shipment may have been carried at a loss, but taking the averages of a year's business on several lines it appears that breadstuffs and provisions are carried, on long hauls, at about $3 20 per ton from Chicago, or at less than 1½ cents per pound. The low cost of growing and moving beef cattle from the Far West is even more appreciable. The effect of this cannot help but be temporarily to raise the prices of Western lands, and correspondingly to depress them in Eastern States. That this is but temporary needs no proof; but it necessitates a change of industries, for the time being, of the Eastern and European farmers.

How this is viewed by the British Government is seen in the report of Messrs. Clare Sewall Read and Albert Pell, who were sent by the Royal Agricultural Commission to the United States and Canada to inquire into the state of agriculture. They state that "while many of the prevailing conditions are favorable in America in the contest for agricultural supremacy, still drawbacks exist which tell in favor of England. The severe winters suspend agricultural employment. Droughts, injurious insects, and in the prairie country a short supply of water, endanger the crops. Western America possesses singular advantages for stock raisers, while the Western States afford them excellent pasturage and the Eastern States good markets. The allotment of land, and the termination of free ranges in the West will increase the cost of cattle raising, but the increased consumption by the growing population will enhance the prices. The success and extension of the growth of blue grass opens fresh prospects for the grazier, and will in time bring the improved turf under the hoof of thoroughbred stock, or at least of highly graded cattle."

There is another aspect of the case which Mr. Atkinson has not touched. Can these grain regions of California and the Northwest maintain their fertility, and keep raising wheat at the present low cost? A Canadian writer touches the core of this subject as follows:

There are some considerations of a very grave character involved in connection with this tremendous, but unrequited, draft upon the productiveness of the soil which sooner or later will force themselves upon the attention of the country. Alluding to the growing tendency in the West to the cultivation of immense tracts of land, the Toronto *Globe* makes the following remarks, which are pregnant with good sense:

Massing of large areas under one crop has always ended in disaster, and it always will. The condition of successful cultivation on a large scale is the employment of a great quantity of expensive machinery. To render this machinery profitable work must be found for it every year; in other words, the same crops must be grown over and over again on the same land. Every farmer knows that this involves an increase in geometrical ratio of insect and funguid pests to an extent that in a very few years renders such farming unprofitable. But it is by actual experience that this "bonanza" farming must be allowed to work its own cure. Dalrymple, the Dakota man, has already made one failure. Glen, the great California farmer, is bankrupt. Another farmer of thousands of acres in Illinois died lately completely destitute. As one point in favor of these large farms, it is urged that the owners of them find work for the neighboring small farmers, whom they pay in cash. This is no doubt a very welcome thing, but it is earned by neglecting important work at home. It may be very much questioned, too, if this small benefit offsets the periodical letting loose upon the adjacent country of the swarms of tramps who make up a large part of the working force at harvest time on the large farms. As to the scientific aspect of farming on such a large scale, it is quite plain that it must end in the ruin of the land. No return whatever is made for the fertility abstracted from the soil, and under the system practiced such return is absolutely impossible. The effect will be that thousands of acres of exhausted lands will be thrown on the country just about the time when, if the lands had been settled on reasonable principles, the owners would have been on the high road to affluence. Dakota and Minnesota will rue the day when "bonanza" farms were introduced.

Making allowance for all this it must be said that Eastern farmers will be obliged to resort to crops that cannot stand such long carriage or such as require special soil and culture, such as hay, butter, milk, fruits, flax, hemp, tobacco, sugar beet, and leave the cereals to the Far West, for a generation. This is not an unmixed misfortune; and Mr. Atkinson has done good service in showing to the public the debt it owes to the much abused railroad compa-

nies, which is prone to look only at the injured side. The article will be concluded in our next issue.

New Railway Enterprises.

The mileage of new railways now under construction or projected in the United States is remarkable. Recently, we published a table showing the length of track reported laid during the first six months of the year, and also gave a list of railways upon which construction is now in progress. A knowledge of the work now going on and also of that likely to be undertaken is not only of interest to the reader who likes to keep informed of the progress of the country in material development, but it is of practical value to manufacturers of railway rails, rolling stock and supplies, contractors and others. While an exact enumeration of all the new enterprises in the field at any one time is impossible, a very good idea of the magnitude of railway growth and the localities in which it is most marked can be obtained by careful compilation of the work reported for a given period. We now supplement our list of railways under construction already printed with a list of projected roads reported during the first six months of the year only, and not including many more noted previous to January 1. This list does not include any lines which are found in our list of roads under construction, although upon quite a number of these work has now also been commenced. The following is a list of railway projects reported in the first half of 1880:

	Miles.
Alabama—	
Montgomery Southern: Montgomery to Troy.	50
Mobile and Alabama Grand Trunk: Extension to Birmingham	150
Arkansas—	
Memphis and Great Southwestern: Hopefield to Pine Bluff, Jefferson, Texas; Shreveport and Texarkana, some	400
Arkansas and Louisiana: Monticello to Monroe, La	90
Arizona—	
Southern Arizona: Tombstone to Southern Pacific	90
California—	
Grangeville and Antioch. On the one rail plan	35
Colorado—	
Denver and Rio Grande (N. G.) Extensions	560
Denver, Middle Park and Pacific: Denver to Boulder	40
Leadville, Roaring Fork and Gunnison: Golden South Platte, (N. G.,) Golden to Plum Creek	20
Red Hill, Fair Play and Leadville, (N G.)	25
Leadville and Eastern: Leadville to Pueblo	160
Connecticut—	
Hartford and Connecticut River: Hartford to Springfield	26
Dakota—	
Minnesota and Dakota Northern: From Fargo north, perhaps	100
Dakota Railroad: Bismarck to Deadwood	250
Fargo, Columbia and Missouri River: Fargo to Columbia	125
Belle Fouche, Deadwood and Rockford, (N.G.)	50
Deadwood and Redwater, (N. G.)	35
Florida:	
Jacksonville and Fernandina	25
Illinois—	
Morris and Eastern: Morris east	25
Danville, Tuscola and Western, (N. G.:) Tuscola to Indiana line	42
Chicago, Hannibal and St. Joseph: Quincy to Chicago	254
Peoria and Northwestern: Peoria to Savannah	100
Polo, Rockford and Northern: Fulton to Wisconsin line	75
Indiana—	
Vincennes and Petersburg	22
Indiana and Chicago: Attica to Chicago	130
Lake Erie and Western: Frankfort to Indianapolis	40
Fort Wayne, Warsaw and Brazil	165
Logansport, Kewana and South Bend: Ekhart to South Bend	75
Indianapolis and Warsaw	65
Evansville, Seymour and Bellefontaine, about	250
Indian Territory—	
Cherokee and Arkansas: Fort Smith, Ark., through Indian Territory to Arkansas City, Kan	200
Iowa—	
Fort Madison and Northwestern, (N. G.:) Proposed extension from West Point	100
Guthrie and Northwestern: Guthrie to Guthrie Centre	15
Dubuque and Muscatine	80
Des Moines and Kansas City	200
Toledo and Northwestern: Proposed extension	100
Burlington, Cedar Rapids and Northern: Pacific division from Holland, about	50
Grinnell and Montezuma: Montezuma to What Cheer	30
Kansas—	
Kansas City, Oskaloosa and Western, (N. G.:) Kansas City to Clay Centre	140
Manhattan, Alma and Burlingame: Burlingame to Manhattan	50
Kentucky—	
Henderson and Southwestern, (N. G.:) Henderson to Eureka	85
Louisiana—	
New Orleans and Northeastern: New Orleans to Meridian, Miss	185
Maine—	
Bridgeton and Portland	30
Limerick and Waterloo, (2 feet)	10
Bethel and Lake Umbagog	35
Maryland—	
Piedmont and Potomac: Bloomington to West Virginia line	30
Michigan—	
Ontonagon and Montreal River	50
Marquette and Montreal River	50
Marquette and Mackinac	150
Cincinnati, Wabash and Michigan: Goshen, Ind., to Benton Harbor	53
Minnesota—	
Lake Superior and Red River Valley: from Wisconsin line to Crookston, about	250
Detroit and Pelican Valley: Detroit to Fergus Falls	40
Dubuque, Minneapolis and St. Paul: St. Paul to Iowa line	100
Minnesota and Dakota Northern: Barnesville to Fargo	20
Austin and Mankato	65
Mankato and St. Cloud	100
Stillwater and Hastings	25
Missouri—	
St. Louis, Iron Mountain and Southern: Two branches	50
Nebraska—	
Chicago, Nebraska and Kansas: From Lincoln south into Kansas	315
New Hampshire—	
Western New Hampshire: Hinsdale to Brattleboro	10
Lake Shore: Meredith Village to Bartlett	35
New York—	
Herkimer and Poland (N. G.)	16
North River: Haverstraw to Middletown	40
Albany and Jersey City: Cornwall to Albany	90
Seaside Elevated: on Coney Island	5
New York, Boston and Albany: New York to Connecticut line and beyond	52
New York, Albany and Buffalo; Jersey City via Albany to Buffalo, some	350
Nevada—	
Nevada Western: Wadsworth to Walker Lake	55
Nevada Northern: Battle Mountain to Oregon line	120
Nevada Southern: Austin south	80
Pioche and Salt Lake: Pioche to Frisco, Utah	90
Carson and Colorado: Carson to Candelaria	150
North Carolina—	
State University: Chapel Hill to University Station	12
Ohio—	
Columbus and Northwestern: Columbus to Grand Haven	280
Steubenville and Cleveland: (N. G.:) Steubenville to Carrollton	35
Bryan and Baltimore: Bryan to Delaware Bend	24
Lake Erie and Chenango Valley: Conneaut to Vernon Centre	57
Twin Valley and Greenville, (N. G.:) Greenville to Cincinnati	75
Cincinnati and Ohio River: New Albany to Aurora	95
Connotton Northern (N. G.:) Canton to Fairport Harbor	70
Baltimore and Chicago: From the Pittsburg and Lake Erie Road to Chicago Junction	150
Ohio Falls and Northwestern: Ohio Falls to Chicago, some	350
Columbus and Maysville: Columbus to Aberdeen	109
Atlantic and Chicago: Marion to Chicago	270
Oregon—	
Albany and Lebanon	25
Oregon Railway, extension	100
Portland and Vancouver	15
Pennsylvania—	
Bradford, Bordell, and Kinzua, (N. G.)	15
Altoona and Cherry Tree	30
Bradford, De Golyer and Smithport, (N. G.)	15
New York, Ridgeway and Pittsburg: Tionesta to Ridgeway	60
York Springs	10
Lehigh Valley: Branch to Bethlehem	50
Tennessee—	
Nashville, Fayetteville and Huntsville: Nashville south	85
Lookout Mountain, (N. G.:) from Chattanooga	10
Knoxville and Paint Rock: Knoxville to Cincinnati Southern	50
Chattanooga Western, (N. G.:) Chattanooga to Alabama line	35
Texas—	
Dallas, Cleburne and Rio Grande: Dallas to Cleburne	49
International and Great Northern: San Antonio to Laredo	150
Vermont—	
Portland and Ogdensburg: Swanton to Rouse's Point	17
Virginia—	
Richmond and Southwestern, (N. G.:) York River to Paducah, Ky. Branches to Maysville, Cincinnati and Louisville, say	800
Valley, Stanton and Salem	90
West Virginia—	
Cumberland, Moorfield and Petersburg: Green Springs Run to Moorfield	30
Buchannon and Western, (N. G.:)	18
Clarksville, Western and Glenville, (N. G.:) Proposed extension to Glenville	28
Proposed extension to Sutton	30
Wisconsin—	
St. Paul and Chicago Short Line: St. Paul via Prescott to Mineral Point	220
Chicago, Milwaukee and St. Paul: Hastings to Chippewa Falls	40
Duluth and Montreal River	90
Chicago and Northwestern: Milwaukee to Madison	85

An examination of this list will show that, with

few exceptions, these enterprises are entirely legitimate and probable of completion. Indeed, it is a characteristic feature of railway projects at present that they are, as a rule, intended to develop new regions in urgent need of transportation facilities, and moreover that a large number of the new lines are being built by strong companies as feeders to their existing systems.

The period of "wild-cat" schemes, when adventurers without either capital or experience undertook to cover the country with paper railways, seems happily to have been ended for a time by the financial panic, and railway building is now in the main carried on upon sober business principles. Whether or not speculation will presently begin to run wild, with the usual disastrous results, is a question that should not be altogether forgotten.

Repeating that the figures given are condensed from the record as we have it, of six months only, and that it does not claim to be complete, we summarize the following figures:

RECORD FOR FIRST SIX MONTHS.

	Number of Roads.	Miles.
Track laid	67	1,790
Roads on which construction is in progress	110	8,000
Projects reported additional to the above	110	10,850
Total	287	20,640

Thus it appears that railway enterprises to the number of 287, and covering a contemplated mileage of over 20,000 miles, have been reported to our notice during six months, as either in process of construction or projected. Certainly these figures are very encouraging to all whose business is in any way connected with railway building or operation as they show that a vast work is yet to be done.—[Railway Age.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending July 24, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1880.	1879.
Reading Railroad	115,461	4,110,162	4,846,712
Schuylkill Canal	9,670	220,150	495,696
Lehigh Valley	78,897	2,645,690	2,625,898
Del.,Lack. & Western.	61,242	1,776,954	1,983,190
Shamokin Valley	19,105	430,678	479,050
Central New Jersey	65,356	1,807,591	2,108,601
United R. R. of New Jersey	24,814	558,919	504,806
Pennsylvania Coal	21,922	534,943	783,819
Delaware and Hudson	58,176	1,582,302	1,781,946
Huntingdon & Broad Top Mt	7,930	255,410	181,482
Penn. and New York.	17,541	686,918	752,441
Clearfield, Pa.	44,248	816,201	840,284

The total tonnage of anthracite coal from all the regions for the week ending July 24, as reported by the several carrying companies, amounted to 405,210 tons, against 557,946 tons in the corresponding week last year, a decrease of 152,736 tons. The total amount of anthracite mined for the year is 11,627,401 tons, against 13,808,346 tons for the same period last year, a decrease of 2,180,945 tons. The quantity of bituminous coal sent to market for the week amounted to 98,115 tons, against 81,828 tons in corresponding week last year, an increase of 11,287 tons. The total amount of bituminous mined for the year is 2,293,198 tons against 1,874,848 tons for the corresponding period last year, an increase of 418,350 tons The total tonnage all kinds of coal for the week is 498,325 tons, against 689,774 tons in corresponding week last year, a decrease of 141,449 tons, and the total tonnage for the coal year is 13,920,599 tons against 15,683,194 tons to same date last year, a decrease of 1,762,595 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the third week of July was 137,896 tons, of which 112,162 tons were coal and 35,734 tons coke. The total tonnage for the year thus far has been 3,763,570 tons of which 2,831,682 tons were coal and 941,888 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended July 24 were 39,768 tons, and for the year to that date 1,144,865 tons —271,303 tons over the corresponding period of 1879. The shipments to the Baltimore and Ohio Railroad for the week were 21,929 tons, and for the year 739,273 tons, an increase of 225,260 tons over 1879. The shipments to the Chesapeake and Ohio Canal for the week aggregate 12,513 tons, and for the year 280,106 tons, an increase of 13,179 tons as compared with last year. Shipments to the Pennsylvania Railroad for the week were 5,325 tons, and for the year 125,486 tons, an increase of 32,868 tons as compared with 1879. —Phil. Ledger, Aug. 2.

"Made of Paper."

We have so long cherished a well-founded prejudice against paper as a flimsy and unsubstantial substance, that we are surprised at its recent utilization in many ways where strength and durability are the important requisites. Many articles, if we learned that they were made entirely or in part from paper, immediately lost favor in our eyes, and we looked at them askance. When the soles of our shoes soon wore out the fact was often attributed to the use, by the unscrupulous maker, of shoddy strips of paper in the place of inside layers of double leather, and this is only a single illustration among many that might be given to show to what miserable, if not despicable, uses paper has been put. The daily tearing of newspapers and light wrapping paper for the purpose of doing up parcels has also done much to impress us with the fragility of the frequently handled material. It was natural that we had come to regard paper as a cheap and unreliable substance.

As a consequence, we cannot readily conceive of the successful application of paper where great strength, tenacity to withstand powerful strains and durability are required of it. But the one process of compression, enormous in its power, gives all these highly desirable constituents to a solid, compact substance, which, although harder than wood and taking, to some extent, the place of iron, is formed of the same material that makes the fragile newspaper sheet.

Paper car wheels are successfully manufactured and used, paper bricks are becoming desirable as a building material. Prof. Green, of the Troy Polytechnic Institution, has erected a great revolving dome whose light framework it covered with hard enduring papier mache only one-sixth of an inch thick. Paper has been successfully employed as an anti-fouling sheathing for iron vessels and in other things almost as unexpected.

It must be observed in connection with paper, however employed, that it possesses two very manifest advantages—lightness and cheapness—and when compressed into a solid substance it is also as hard and durable as several other strong and more costly materials. No one will hesitate to employ paper instead of iron in any construction, provided that the former can be shown to be sufficiently strong, for its lightness and cheapness are most important considerations in its favor. The range and mutability of paper are remarkable. The same material that forms the delicate valentine enters into the stalwart car wheels that sustains the weight of tons and endures a constant friction as it glides along the iron rails. According as paper may be prepared, it ranks among the most fragile or the stoutest substances.

Harder than wood and impervious to water. Just think of it! How people fifty years ago would have been surprised at such accomplishments. But being established facts, they are fraught with great significance. They have enlarged the possibilities of paper wonderfully. They have opened a wide field for experiment and invention. Paper is destined to take the place of many substances that will be found inferior to it, while its application in numerous undeveloped ways wherein nothing else can be used, may be confidently expected.—[Paper World.

Mexican Central Railway.

Advices from Mexico received July 29th, show that the Mexican Central Railway Company is making great progress with its line from the capital toward Leon, having 1300 men at work upon the grading. This company has purchased a large area of land adjoining the grounds of the Vera Cruz Railway for its freight and passenger stations at the City of Mexico, and will begin track laying in a few days. The roadbed is ready for the rails for a distance of 16 kilometres, and a large quantity of rails is on the ground and a steamer with a cargo of 1100 tons was to sail from Newport on the 25th of July, and should arrive at Vera Cruz before August 15.

The charter extends to Leon, a distance of 262 miles, but the company has petitioned for valuable extensions, under a general law giving authority to the President or terms that are nearly identical with the provisions of the Central charter.

Several individuals, claiming to represent Companies which are yet to be formed, have also petitioned for grants under the same general law. They are very jealous of the secure position of the Mexican Central Company in its present grant, and of the assurance which the influence of its solid and reliable character and proved capacity give of its success in obtaining the extensions desired. They know very well that the Central Company is growing in favor in Mexico.

The Guanajuato Railroad and the charter given to the State of Guanajuato, covering the way, 100 miles in length, from Celaya, through the large cities of Salamanaca, Irapuato, Silao, Guanajuato and Leon, the latter a city of 160,000 inhabitants, have been purchased by the Mexican Central Railway Company with the consent of the President and the State of Guanajuato. Full possession has been given, and the company is now operating the constructed part, which is about 37½ miles in length. This gives the company a great advantage over its rivals, since the general law under which the Sullivan-Palmer and other combinations are trying to obtain grants for parallel lines prohibits the President from prejudicing "the rights acquired by the States in virtue of former concessions." (See Article IX of Decree of June 1.)

The grant to Leon gives the company a subsidy of $15,200 a mile, and under the laws of Mexico this prevents any rival company from obtaining any subsidy for the first 262 miles northerly from the City of Mexico.

The Mexican Central is putting its money into materials and work on its authorized line, while its interests with the Government are ably represented by Sebastian Camacho, the principal Government Director of the Mexican mint, and Ramon G. Guzman, one of the leading bankers of Mexico, and the controlling owner of all the horse railways of the federal districts.—[Boston Journal.

☞ The joint track of the Denver and South Park and Denver and Rio Grande Railroads was completed into Leadville on the 31st ult. Their track is also completed and opened for business to Hortense, 12 miles from Buena Vista, on the Gunnison extension.

☞ The Buffalo Valley Railroad (from Garrett to Berlin) and its rolling stock has been sold to the Baltimore and Ohio Railroad Company for $25,000.

☞ The Atlantic and George's Creek Consolidated Coal Company has declared a dividend of 7 cents per share, payable August 5th.

☞ The last rail on the Rapidan and Charlottesville (Va.) railroad was laid on the 28th ult,

☞ A corps of engineers under John B. Smith, Superintendent of the Pennsylvania Coal Company, have been surveying the route for a new railroad across the mountains, connecting Carbondale and Lackawanna and Wyoming Valleys with Hawley, Pa. The new road will be built for the accommodation of the New York, Lake Erie and Western railroad. The present coal route from Carbondale, Pa., to New York is 257 miles, while by the new road it would be but 171 miles, a saving of 86 miles. None of the grades on the new road will be over 40 feet to the mile, while on the road now used they are 80 per cent heavier.

Statement of the Public Debt of the United States, August 1, 1880.

DEBT BEARING INTEREST.

Interest paid by United States, $47,589,861 30; interest repaid by transportation of mails, &c., $13,642,584 54; interest repaid by cash payments: 5 per cent net earnings, $585,196 87; balance of interest paid by United States, $33,291,777 89.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, July 31, 1880.

JOHN SHERMAN,
Secretary of the Treasury.

☞ The Continental Railroad Company, efforts for the resuscitation of which are now being made, was organized some years ago to build a railroad from New York through New Jersey, Pennsylvania, Ohio, and as far west as Iowa. The line was surveyed and some grading at different points done, when the financial revulsion of 1873 brought the operations of the company to a halt.

☞ The Boston and Albany Railroad company has completed its purchase of the Athol Railroad. It will probably be necessary for the new management to lay out from $50,000 to $100,000 to put the road in good shape. They have decided to rebuild all the bridges. It is understood that E. M. Bartlett, who has been the manager of the Athol line for some time, will be retained to look after it.

☞ Bradley Barlow, President of the Southeastern Railway has secured a charter from the Quebec Legislature to construct a railway from Montreal to Potsdam Junction, N. Y. It is stated that the necessary funds are ready, and that work will commence immediately.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, August 5, 1880.

Money on call is 2@2½ per cent; on time 2 to 4 per cent, and on prime mercantile paper 3½@4½ per cent.

The market for foreign exchange continues dull. The posted rates of the leading drawers of sterling are 4.83 and 4.85. The actual rates are 4.81¾@4.82¼ and 4.83¾@4.84¼. Cables are quoted 4.84¼@¾. Prime commercial bills are 4.80@¾.

Tables have been prepared at the Treasury Department showing that the aggregate purchases of Government bonds by the Government between the years 1844 and 1860 amounted to $50,583,300, at an average premium of 11⅛ per cent. The highest premium paid was upon 6 per cent bonds purchased in the year 1854—21 per cent; the amount so purchased being $7,000,000. These bonds had twenty-three years to run. These purchases were made from the balances in the Treasury laid by to meet current expenses. The balance was reduced by this means from $22,000,000 in 1853, to $7,000,000 in 1858. No transactions of large amounts were made later than 1859, but in that year several purchases were made at the rate of 16 per cent premium. It is stated that within fifty days from the date of the last purchase, at 16 per cent premium, of bonds having ten years to mature, the Government was compelled to provide for current expenses by a new issue of interest bearing Treasury notes.

The public debt of the United States, principal

and interest, July 31, 1880, amounted to $2,135,486,647 13; the amount of cash in the Treasury at that date was $198,890,495 20—leaving net $1,936,596,241 93, a decrease during the month of $5,576,053 41. Of the bonded debt ($2,119,596,046 63) $235,221,050 bears 6 per cent interest, $484,129,550 bears 5 per cent, $250,000,000 bears 4½ per cent, $739,347,800 bears 4 per cent, and $14,000,000 bears 3 per cent. Interest has ceased on $6,841,115, and $390,056,531 bears no interest, being in the shape of legal tenders, certificates of deposit, etc. The current liabilities of the Government amount to $47,230,611 44, and the available cash in the Treasury to $151,659,793 76. The payments made from the United States Treasury in July, other than on account of interest or principal of the public debt, were as follows: On account of civil and miscellaneous $7,466,090 39; war, $5,373,691 32; navy, $1,868,215; Indians, $1,282,720 37, and pensions, $1,462,732—total, $20,453,449 08.

Of the $40,000,000 of $10 refunding certificates which were issued under special act of Congress, but $1,367,350 remain. These certificates are convertible into 4 per cent bonds when presented in sums of $50 and upwards; but the department has decided that they are convertible for their face value only, and that the accrued interest is to be paid by check.

On Wednesday offers were made to sell bonds to the Government on account of the sinking fund, to the amount of $6,898,900. The Secretary of the Treasury directed that $2,500,000 be accepted, which were allotted as follows: $2,404,000 6s 1881 at 104.45@104.60, and $96,000 6s 1880 at 102.36.

The following securities have been placed on call at the New York Stock Exchange:

$16,000,000 of the stock and $8,475,000 of the first consolidated mortgage bonds of the Denver and Rio Grande Railway Company. The length of completed road in operation at this date is 337 miles. There are in course of construction (of which 100 miles are completed and in operation commencing May 15, 1880) 565 miles. First consolidated mortgage bonds authorized, $30,000,000; capital stock, in shares of $100 each, amount authorized, $30,000,000; stock issued on account of completed road, $8,500,000; stock issued on road under construction, $7,500,000. Total capital stock issued, $16,000,000. First Mortgage Seven per cent bonds, covering (by a first lien) 291 miles from Denver to Elmoro and Alamosa, $6,382,500; First Mortgage Seven per cent bonds "Arkansas Valley Division," conveying (by a first lien) the Arkansas Valley Division of 43 miles between Pueblo and Canon City, $1,040,000—$7,422,500. First Consolidated Mortgage bonds to be issued to lift the outstanding bonds as above, $7,422,500; and in aid of the construction of the future extensions of the road (of not less than 1,450 miles) $22,577,500—$30,000,000. The amount to be issued upon all new road is limited by mortgage to $15,000 per mile. Application is now made to list these bonds to the amount of $8,475,000: in $1,000 each, numbered 1 to 8,075; $500 each, number 1 to 800. Of this amount there has been issued and are now outstanding $3,500,000. The remaining bonds are to be issued at a rate not exceeding $850,000 per month from and after June 1st, $4,975,000—$8,475,000.

The stock common and preferred of the Brooklyn and Montauk Railroad Company amounting to $2,000,000. The stock was issued to the holders of the Sinking Fund bonds of the Southside Railroad Company (to the amount of $1,500 000) on the proportion of 60 per cent of preferred stock and 40 per cent of common stock, and to the holders of the third mortgage bonds issued by the Southern Railroad of Long Island (to the amount of $500,000) in the proportion of 40 per cent of preferred stock and 60 per cent of common stock. The Brooklyn and Montauk Road extends from Brooklyn to Patchougue, Long Island, with branches to Rockaway and Rockaway Beach; also to Fresh Pond and to the junction of the New York and Flushing Road near Hunters Point, and have the same rights as to franchises and to construct branches that the Southern Railroad Company of Long Island had. The road and branches now built are about seventy miles. The only encumbrance on the road is a mortgage for $750,900 covering the main line, and a mortgage for $60,000 covering a portion of the Rockaway Branch. The Gallatin National Bank acts as a transfer agent, and the stock will be registered with it.

State bonds at the Board were dull and steady; Government bonds were strong throughout; Railroad bonds continue active; and Railroad shares, compared with the quotations of the previous week have, in most instances, advanced in price.

The closing quotations on Thursday were: Atlantic and Pacific Telegraph, 45¾@46; Canada Southern, 62@63; Central of New Jersey, 76@76¼; Central Pacific, 76¼@77; Chicago and Northwestern, 99⅛@99¼; do. pref., 116⅞@117; Chicago, Burlington and Quincy, 129¾@129⅞; Chicago and Alton, 115@116; do. pref., 125@130; Chicago, Milwaukee and St. Paul, 89⅛@89¼; do. pref., 109@109½; Chicago, Rock Island and Pacific, 114⅝@114⅞; Chicago, St. Louis and New Orleans, 32@35; Cleveland and Pittsburg, 119⅞@120⅛; Columbus, Chicago and Indiana Central, 17⅛@17⅜; Delaware and Hudson Canal, 81⅝@81⅞; Delaware, Lackawanna and Western, 86@86½; Hannibal and St. Joseph, 36⅛@36¼; do., pref., 73⅛@73¼; Houston and Texas Central, 66⅜@66⅝; Illinois Central, 112⅛@112¾; Lake Erie and Western, 32½@32⅝; Lake Shore and Michigan Southern, 109¼@109⅜; Louisville and Nashville, 118@120; Manhattan Railway, 26¾@27¾; Morris and Essex, 107¼@108; Metropolitan Elevated, 90⅛@90⅜; Michigan Central, —@96; New York Elevated, 110½@112; New York Central and Hudson River 132@132½; New York, Lake Erie and Western, 43⅛@43⅝; do.pref., 72½@72¾; New York, Ontario and Western, 26⅛@26½; Northern Pacific, 32¼@32⅝; do. pref., 56¾@57; Ohio and Miss., 34@34¼; do. pref., 74½@74¾; Panama, 180@185; Pacific Mail, 42⅛@42⅜; Philadelphia and Reading, 21@21¼; St. Louis and San Francisco, 36⅛@37; do. pref., 49⅛@50; do. 1st pref., 73@75; St. Louis, Iron Mountain and Southern, 57¾@57⅞; Union Pacific, 95@95⅜; Western Union Telegraph, 108⅜@108⅝; Wabash, St. Louis and Pacific, 42⅝@43¾; do. pref., 72⅞@73.

The following quotations of sales of Railway and other securities, for the week, are in addition to those given elsewhere in our columns:

New York.—Am. Dock and Imp. Co. 7s, ass., 110; Albany and Susq. 1st consol., 114; Albemarle and Chesapeake Canal 1st, 100; Buffalo, New York and Erie 1st, 1916, 125; Boston and New York Air Line, 47½; Boston, Hartford and Erie 1st, 43½; Chicago and Milwaukee 1st, 119½; Col., Chi. and Ind. Cent. 1st Trust Co. certif. ass. sup., 86⅜; Chicago, St. Paul, Minn. and Omaha, 47⅛; do. pref., 81¾; do. 1st, 106; Clev., Col., Cin. and Ind. consol., 111⅛; Chesapeake and Ohio 1st pref., 26; do. 2d pref., 20¼; do. 1st, Series B, 67¾; Chicago, St. Louis and New Orleans, 84¼; Cedar Falls and Minnesota, 15; Chicago and Eastern Illinois 1st, 101; Chicago, Milwaukee and St. Paul 1st, Southern Minn. div., 101½; do. I. and D. div., 113⅛; Central Iowa 1st, 102½; Cairo and Fulton 1st, 108¼; Denver and Rio Grande, 73½; do. 1st, 104⅜; do. 1st consol., 95; Delaware and Hudson 1st, Penn. div., 118½; East Tenn., Va. and Ga. 1st, 109; Houston and Gt. Northern 2d, pur. com. rec., 33; Houston and Texas Central 2d M. L., 115¼; do. 1st Western div., 106; Ind., Bloom. and Western, 82⅝; do. 1st, 74⅞; do. 2d, 62; Indianapolis, Decatur and Springfield 1st, 100½; International and Gt. Northern 1st, 102; do. 2d inc., 72⅛; Kansas Pacific 1st consol., 97; Kansas Pacific 6s, Denver Div., ass., with coupon certif., 109½; do. 7s, Leavenworth Branch, do. 118; Kansas Pacific 1st J. & D., with coupon certif., 118; do. Inc. No. 16, 86; Keokuk and Des Moines 1st, 98; Lake Erie and Western, 32; do. inc., 65; do. 1st, 104⅝; Lehigh and Wilkesbarre consol. ass., 95; do. inc., 72; Laf., Bloom. and Muncie 1st, 103; Mobile and Ohio, 23¼; do. 1st deben., 83¼; do. 2d deben., 50; do. 3d deben., 36; do. 4th deben., 35¾; do. 1st, 103⅜; Missouri, Kansas and Texas, 38⅞; do. 1st consol. ass., 105; do. 2d, 66⅛; Marietta and Cincinnati 1st pref., 8½; do. 2d pref., 6½; Michigan Central 8s, S. F., 107⅝; Nashville, Chattanooga and St. Louis, 68; do. 1st, 110; New York, Ontario and Western, 27; New York, Lake Erie and Western income, 75; Ohio Central, 23; do. 1st, 90; do. inc., 47; Oregon Railway and Nav., 116¼; do. 1st, 97⅞; Ohio and Mississippi 1st, Springfield div., 92; Peoria, Decatur and Evansville, 25½; do. 1st, 100; Rome, Watertown and Ogdensburg, 23½; do. 1st consol., 65½; Rensselaer and Saratoga 1st, 128; South Pacific 1st, 104; St. Paul and Duluth, 34⅝; do. pref., 63; St. Louis and Iron Mt. 1st pref. inc., 86¾; do. 2d pref. inc., 80; do. Arkansas Branch 1st, 105½; St. Paul and Sioux City 1st, 105; St. Louis, Jacksonville and Chicago 1st, 115; St. Louis, Kansas City and Northern, St. Charles Bridge 1st, 108½; do. R. Steam Pilot Boat.

The Baltimore Sun says a new steamer is now being built by the Harlan & Hollingsworth Co., of Wilmington, Del., for the Baltimore Pilots' Association, which will be the only real seagoing pilot vessel in service, and then adds:

She is intended to carry sea pilots, with fuel, stores and accommodations for a month's cruise. The hull will be of iron, with close iron bulwarks at each end, and with iron siding, forming a quarter deck for about 68 feet of the middle run of the boat. The quarter deck will stand 3¼ feet above the main deck, which will extend about 30 feet from the stem and 20 feet from the stern. Both the main and quarter decks will have iron deck beams, and will consist of heavy pine deck stuff. The pilot-house and captain's room will be on the quarter deck, where the boarding yawls will be carried. The length will be 113 feet between main posts and 122½ over all; extreme moulded beam 23 feet; depth 12¾ feet; from base line to top of quarter deck 18 feet. There will be one iron athwartship collision bulkhead 8-16 inch iron, braced, and one forward of the boiler. Coal bunkers on either side the boiler hold forty tons each. Below the quarter deck will be the main cabin, with 20 sleeping berths, wash-room, mess-room, kitchen, pantry, chief engineer's room and store-rooms. The forecastle will contain ten bunks, store-rooms, etc. The vessel will be heated throughout by steam. She will have two masts, schooner-rigged, two 17-feet yawls, two 1,000-gallons water tanks, three anchors of 800, 500 and 175 pounds weight, 120 fathoms chain cable, and a pump brake windlass. The machinery will consist of an inverted direct acting compound engine, with 22 and 36 inches cylinders, 26 inches stroke, fitted with tubular surface condenser and air, feed, bilge and circulating pumps, one cylindrical return tubular boiler, to carry a working pressure of 70 pounds of steam to the square inch, an independent feed pump to supply boilers, wash decks, fire service, etc.

☞ The chief engineer of the Oregon Railway and Navigation Company's steamers authorizes the statement that Edison's electric lights used throughout the new steamer Columbia, "worked to the complete satisfaction of the officers of the vessel throughout the entire trip from New York to Portland, in all kinds of weather. The simple opening of a steam valve was sufficient to light the ship, and the ordinary skill of the engine room was sufficient to keep the lights in order."

☞ The Long Island Railroad Company's engineers are making a survey between Locust Valley and Oyster Bay Village, with a view to the extension of the road to the latter point. It is thought that this branch can thus be made an important feeder of the Long Beach business, through the establishment of a ferry connection across the Sound to Norwalk, Conn.

☞ The total shipments of coal and coke over the main line of the Pennsylvania Railroad from the Pittsburg coal and coke regions, in both directions, for the first five months of 1880, foot up in exact figures, 1,129,904 tons. The grand total of all coal and coke carried over the Pennsylvania Railroad and its branches for the first six months is 3,653,942 tons.

☞ Preliminary surveys have been begun in Annapolis, Md., for the proposed short line railroad between Baltimore and Annapolis, 21 miles long, the time to be 35 minutes between the two cities when the road is completed.

☞ An additional rail has been laid on the Long Branch division of the Central Railroad of New Jersey from Long Branch to Shark River. The distance is 11 miles. In future all trains will run through to Point Pleasant.

☞ The Denver and Rio Grande Railway have commenced grading on the Kokomo extension under the original charter to Ten-mile Pass, and expect to have the road finished to Kokomo within sixty days.

☞ The Ontario Silver Mining Company has declared its fifty-eighth dividend of fifty cents per share (for July), payable at Wells, Fargo & Co.'s, on the 16th. Transfers close on the 10th.

☞ The Illinois Central Railroad Company has declared its thirty-sixth semi-annual cash dividend of 3 per cent on the entire capital stock of the Company, payable Sept. 1.

☞ The Kansas City, Fort Scott and Gulf Railroad has declared a dividend of 3½ per cent on the shares represented by contracts to issue preferred stock, payable Aug. 16.

☞ Of the $1,500,000 Rutland second mortgage Fives, interest matures on only $500,000 August 2, the first coupon on the balance of $1,000,000 being by agreement due February 1, 1881.

[From the Fortnightly Review.]

The Railroads of the United States.

THEIR EFFECTS ON FARMING AND PRODUCTION IN THAT COUNTRY AND IN GREAT BRITAIN.

By Edward Atkinson.

[Continued from page 865.]

Upon one-fourteenth part of our whole soil, or upon one-seventh part of that which is fit for agriculture, we produce the hay and roots that we require, and all the grains and cotton that we need ourselves, so that even if we did not produce an ounce of gold or silver within our borders, we could command the treasures of the world. Yet, if we consider the average product per acre in respect to every one of these crops, we find that it does not exceed one-half the quantity that even a reasonably good system of agriculture would bring forth. If we consider the conditions under which each and all of these great crops of grain, hay, and cotton are produced, we find that they represent, in the lesser degree only, the art of agriculture.

We number now nearly or quite fifty million people. A hundred millions could be sustained, without increasing the area of a single farm or adding one to their number, by merely bringing our people up to the average standard of reasonably good agriculture; and then there might remain for export twice the quantity we now need abroad, to feed the hungry in foreign lands. No longer divided by the curse of slavery, this nation is now united by bonds of mutual interest and of common speech, tied by the iron band of eighty-five thousand miles of railway, and is yet only beginning to feel the vital power and grandeur of a truly national existence.

What may be the future of this land few can yet conceive.

Texas alone comprises as much territory as the German Empire, England, and Wales combined. Texas has now about two million people within her boundaries; the Empire of Germany, England and Wales, about sixty-seven millions. The good land in Texas is equal in area to the good land in Germany and Great Britain.

Kansas, Nebraska, and Iowa combined, more than equal France in area, and possess more fertile land. Only twenty five years ago John Brown and his companions redeemed Kansas from slavery; Nebraska was then indicated on our own maps as a part of "the Great American Desert;" and Iowa had scarcely become a State. Their population may now be two million five hundred thousand. France has thirty-seven millions.

The great middle section of Eastern Tennessee, Northern Georgia, Western Carolina, and Southern Virginia, has been hemmed in by the curse of slavery, and is yet almost a terra incognita; but it is replete with wealth in minerals, in timber and fertile valleys of almost unequaled climate for health and vigor. This section is equal to the Austrian Empire in its area, and more than equal in resources. It has a sparse population of only one or two millions. The Austrian Empire has over thirty-seven millions.

The healthy upland country of Georgia, Alabama and the Carolinas, contains vast areas of fertile woodland, which can be bought by the hundred thousand acres at a half a dollar, or 2s. an acre, on which sheep and cotton thrive equally well. These sections are being slowly occupied by white farmers, and wait for immigrants who can bring them to use. In a few short years, sheep, fed mainly upon the kernel of the cotton seed and upon the grasses that follow the cotton, will send to market from the same fields, alternately occupied, as much wool as cotton.

This warm section is more than equal to Italy in area; it has perhaps two million of people. Italy contains twenty-seven millions.

The fertile lands of the Shenandoah Valley in Virginia, and along the Potomac in Maryland, more than equal Belgium. They may contain half a million of people. Belgium has more than five millions.

In the consideration of this problem of production capacity, there are other factors of the greatest importance. What are the burdens to be borne by our people compared to others? What is the mortgage on this land that we possess?

It is but fourteen years since our national debt was over $3,000,000,000. Its full amount never appeared by the books of the treasury, because, before the accounts that were due and unpaid at the end of the war could be audited and entered, $250,000,000 had been paid. Since then it has been reduced, $750,000,000 more, and we now owe but $2,000,000,000.

Our army is but a border police of twenty-five thousand men. Before the end of the century our debt may be all paid; and, if justice is done to the Indian tribes, we shall have less need of an army than now.

Let us, however, return to the main purpose of this paper. It has been proved that cheap transportation has been accomplished to a degree that the wildest advocate of a State or national railway system never dreamed of. In 1869 the average charge on a ton of merchandise, all kinds included, from Chicago to the seaboard, was $24. In 1870 it was a little less than $8, and has been at times much lower. This is the average on all merchandise. Grain and meat are carried at much lower rates; at times as low as $3 and 60 cents per ton to New York, and, I believe, $2 and 50 cents per ton to Baltimore.

Within twenty years a revolution has been effected in construction of ocean steamers by the substitution of the screw for the paddle, and the adoption of the compound engine.

Yet we have but entered upon the age of steel; no one yet knows the exact economy of the steel rail. The present locomotive engine is barbarous in its waste of fuel; not over three or four per cent of the power of the fuel is utilized by being converted into the actual motion of the train, while the dead weight of the clumsy wooden car averages three to one of the load carried. Not over one pound in a hundred of the fuel consumed is actually and absolutely applied to the movement of the load; the rest is absorbed by waste and friction.

The absolute cost of grain and meat in the West and Southwest cannot, as before stated, now be defined with positive accuracy. Suffice it, that the present cost and the present rates of transportation have caused a social revolution in the East, and are causing a social revolution in Great Britain. But the future effect of the unknown factor cannot yet be conceived. The ultimate cost of moving grain and meat must be less, and never can be more. There will be greater competition and greater economy. We are constructing thousands of miles of new railway, and hundreds of inventive brains are at work upon the problem of diminishing the cost of construction and operation.

If one per cent of the absolute power stored up in our coal beds has sufficed to make the changes we are now witnessing what will be the effect when we learn how to utilize two per cent and decrease the other elements of cost in the same proportion? What are the terms of the equation by which we shall convert distance into dollars or pounds sterling a few years hence? In that unknown quantity, is not the margin for the rent of land in England to be sought, if any rent is to be paid? and upon the solution of this problem in social mathematics, does not the duration of the present social order in Great Britain mainly depend?

In conclusion, the extent of our present railway service may be considered; and for this purpose I avail myself of the carefully prepared tables of Mr. Henry V. Poor, editor of The Railway Manual of the United States.

In the year 1879, 3,750 miles were added to our total mileage, making 85,591 miles in operation January 1, 1880. It is estimated that 6,000 miles will be constructed in 1880, if the rails can be obtained, making the prospective mileage of January 1, 1881, 91,591.

The construction of railways from 1869 to 1873, at the high cost imposed upon the country by the combination of an inflated paper currency and an excessive tariff, doubtless had more to do with the panic of 1873 than any other single factor; but it already appears that the panic, so far as it was caused by railway construction, arose from the bad and speculative methods in these undertakings more than from want of justification in the plans of many of them.

It will be observed, however, that while the railway system as a whole may not have exceeded 2 per cent in the dividends paid, the New York Central Railroad and its connections, comprising a system of about one thousand miles, remained very profitable during the whole period of depression, as did many other lines.

It will also be observed that, while thus profitable to its owners, the New York Central Railroad system, or consolidated line, does the largest amount of work at the least cost, probably carrying ten million tons in 1879; and that it is the controlling factor in the movement of meat and grain from West to East.

It follows that the great cheapness that has been attained is not temporary, but permanent; and that increase of traffic, within certain limits not yet found, is marked by decrease of cost.

From the statistics of 1879, just compiled, it appears that the average charge on all merchandise over the New York Central Railroad and its connections, was only 0.81 cents per ton per mile.

There is much contention in this country in regard to the railroad corporation as a factor in our own politics, and much complaint is made in respect to alleged monopolies; but it will be observed that the great lines against which this charge is made—to wit, the systems consolidated and designated as the New York Central, the Erie, the Pennsylvania, and the Baltimore and Ohio—may also be named and designated as comprising the specific miles of railroad on which the largest service is done for the community at the least relative cost.

It would matter not if all these lines were consolidated, even under one man's guidance. The same rule would control him that now controls them all, and compels a constant abatement in the charge, constant improvement in method, and constant reduction in cost of operation. The rule is that it is not the competition of rail with rail that controls or limits the charge that may be made for their use, but the competition of product with product in the great markets of the country and of the world. No man, and no combination of men, can permanently prevent this competition working its just and beneficent results in the wider distribution of the elements of subsistence, in the abundant consumption of which material prosperity consists.

Prior to the discovery of gold in California and Australia, in 1849 and 1850, there was no mine of either gold or silver of any importance under the control of an English speaking State, or within reach of a railroad.

In the first few years after these discoveries came the enormous supply of gold from placer-mining or washing under a rude system, and controlled by "Lynch law."

In 1866 the opening of the Pacific Railroads altered all the conditions of the cost of production. The gold and silver bearing states and territories of the United States are now permeated by more than five thousand miles of railways, reaching the very mouths of the mines. Their branches are being constantly extended; and now Arizona and New Mexico, the region from which the Spaniards derived the greatest supply of these metals, are being penetrated by the railroad in several directions. Hydraulic mining has been perfected, and is conducted in the most complete and scientific manner.

Within one or two years after each mining-camp is established, if the work is profitable a town or city grows up, law is enforced, and science is applied under safe conditions.

On the flanks of the ridges in which the mines are opened lie the great plains stocked with cattle, and on which, by irrigation, the largest crops

of wheat are now produced. Laborers are to be had at moderate wages, and all the conditions of low cost of production have been brought in force, such as never existed before in the history of the world in respect to the precious metals. What the effect of these vast changes may yet be is a question of geology.

First came the surface washings, next the immense yield of the Comstock lode, and now the wonders of Leadville; while the rumors from Arizona whispers of chances that may eclipse all these. Yet behind all these, attracting far less attention, hydraulic mining is working steadily and surely over areas not yet measured.

In this again the railroad has been the most potent factor. What is to be the result of this new force, applied to unknown quantities of gold and silver, is a problem that the future only can solve.

What is called the "silver question," now agitating many nations, is but one phase of the effect of this new force applied to silver mining. The effect of the enormous production, especially of gold, since 1850, is yet a question at issue among economists.

It must be remarked here that since 1852 there has been a singular uniformity in the production of gold and silver combined, and this has been used as an argument for bi-metalism. In Cernuschi's last pamphlet a table is given of "Money issued by Mines, Mountains, and Rivers," from 1849 to 1878 inclusive. The great annual production was reached in 1852, £26,550,000 of gold, £8,120,000 of silver; total, £34,670,000. The variation since then has been, £4,500,000 over in 1853, £3,000,000 less in 1862; the average of twenty-seven years having been £33,677,000. The total product of gold and silver for twenty-seven years, according to this statement, has been as follows:

Gold	£617,905,000	$2,990,660,200
Silver	291,390,000	1,410,327,600
	£909,295,000	$4,400,987 800

This is rather a large sum; but it may be remarked that the value of the American cotton crop of the last ten years has been $2,500,000,000 to $3,000,000,000 in gold. We need more cotton than we do gold or silver. But who can tell when the second Comstock lode may be discovered?

It may well be asked, "Has this railroad scaled down the national debts of the world?" If it is to become dangerous to lend money to nations for purposes of war, and pay as you fight becomes the rule, the monument about to be erected to the great men by whose efforts the Union Pacific Railroad was constructed, may perhaps bear a tribute to them as among the peacemakers of the world. But this carries us into the region of visionary politics. The Pacific Railroad is but one line completed since the war.

Since April, 1865, we have added fifty thousand miles to our railway service, and the addition in 1880 will be six thousand more. In the same period an industrial revolution has occurred in the States that were made free by the war, such as has never before occurred. On the surface there has appeared to be misgovernment, fraud, political disturbance, and want of stability—sometimes violence.

But, underlying this surface apparently so deeply agitated, great industrial forces have been quietly and surely working to the end indicated by the great crops of cotton; the ten last crops marketed exceeded the ten ante-war crops of slavery by nearly six and a half million bales, while the crops now being marketed will be far the largest ever grown.

(To be continued.)

☞ The track of the Southern Pacific Railroad is laid 17 miles east of Benson. The grading is completed beyond Dragoon Summit. An average of eighty-five carloads of railroad material goes to the front daily. It is estimated that tracklaying will go on at the rate of two miles per day after reaching Dragoon Summit

Imports of Dry Goods at New York.

The imports of foreign dry goods at New York for the month of July, were:

☞ To meet the State loan of $307,000 maturing August 15, 1880, the Legislature of Maine has authorized a new 4 per cent loan, of which the State has taken $182,000. The balance of $125,000 is offered at not less than par by proposals to August 10. The bonds will be dated August 15, 1880, and $25,000 are to be redeemed each year running to 1886.

☞ The proposed lease of the Buffalo and Southwestern Railway for a term of ninety-nine years to the New York, Lake Erie and Western Company has been consummated. The latter company is to pay the Buffalo and Southwestern, semi-annually, 35 per cent of the gross earnings of the line, and in all cases to pay the interest on the bonds of that company, which amount to $1,500,000, said interest to be deposited in the First National Bank of New York on the 25th of December and June of each year, said deposits to continue for the full term of ninety-nine years; the difference between the amount paid for interest and the 35 per cent of gross earnings to be paid to the Buffalo and Southwestern Company for division among the stockholders.

☞ The Harlan & Hollingsworth Company, of Wilmington, Del., has closed a contract for the construction of an iron steamer for the New York and Norwich line. The boat is intended to be the handsomest and swift-est sound steamer now afloat. The dimensions are to be: length, on 7 feet water line, 325 feet; beam, molded at widest place, 46 feet; extreme width, 79.6 feet; depth, from base line to top of beam, 16.3 feet.

☞ The Texas and Pacific Railway has been completed 22 miles beyond Weatherford. This puts the road 85 miles west of Dallas and across the Palo Plinto county line. The road is being pushed forward to El Paso.

OFFICE OF THE AMERICAN RAILWAY IMPROVEMENT CO., 80 BROADWAY, NEW YORK.

PROPOSALS WILL BE RECEIVED AT THIS office until August 20 for the clearing, grading, bridging structures, water stations, shops, track laying and ties for the first division of the New Orleans Pacific Railway, extending from Shreveport to Lecompte, La., about 140 miles; also for the bridging of the Atchafalaya River on the second division. For terms of payment, plans, specifications and all information apply at this office. G. M. DODGE, President.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD COMPANY, NEW YORK, Aug. 3, 1880.

THIS COMPANY WILL PAY SEPT. 1, 1880, the THIRTY-SIXTH SEMI-ANNUAL CASH DIVIDEND on its entire share capital, being a dividend of THREE (3) PER CENT., to all shareholders registered as such at 2 P. M. on the 13th inst., after which and until the 4th September the transfer-books will be closed.

L. V. F. RANDOLPH, Treasurer.

OFFICE OF THE ONTARIO SILVER MINING CO., No. 18 WALL ST., NEW YORK, Aug. 5, 1880.

DIVIDEND NO. 88.

THE REGULAR MONTHLY DIVIDEND OF FIFTY CENTS per share has been declared for July, payable at the office of Wells, Fargo & Co., No. 65 Broadway, on the 16th inst. Transfer books close on the 10th inst.

H. B. PARSONS, Assistant Secretary.

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY, TREASURER'S OFFICE, GRAND CENTRAL DEPOT, NEW YORK, June 26, 1880.

THE DIRECTORS OF THIS COMPANY HAVE this day declared a DIVIDEND of 4 PER CENT upon its capital stock, payable on the SECOND DAY of AUGUST next at this office. The Transfer Books will be closed at 3 o'clock p. m. on SATURDAY, the 3d day of July next, and will be reopened on the morning of FRIDAY, the 6th day of August next

E. D. WORCESTER, Treasurer

Business on the Canal.

The following statement shows the canal business at Buffalo for the month of July, with comparison for the same month last year:

Amount of tolls for July, 1880	$105,541 26
Amount of tolls for July, 1879	74,526 29
Increase 1880	$31,014 97
Number of boats cleared during July, 1880	1,546
Number of boats cleared during July, 1879	1,105
Increase 1880	441
Amount of tolls from opening to July 31, 1880	$348,963 83
Amount of tolls from opening to July 31, 1879	179,133 54
Increase 1880	$169,830 29
Number of boats cleared since opening to July 31, 1880	4,957
Number of boats cleared since opening to July 31, 1879	2,809
Increase for 1880	2,148

Its location, in the PORT of NEW YORK, is most favorable for shipments, and its CARS, CONSTRUCTED in SECTIONS, may be ENTIRELY COMPLETED before being packed for transportation.

VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.

All know it is easy to make a Varnish that has the single quality of DURABILITY, but Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined, and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts — shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

Rubber Belting and Hose and Packing at lowest prices.

STEPHEN BALLARD & CO.,
16 & 18 Chambers St,

The Railroad Complications in the Southwest.

At an early stage in the history of the steam-road it became apparent in France that there would be a struggle between the several growing railroad corporations for the privilege of constructing and operating railroads in that country; so under the Napoleonic regime the territory of France was divided into six portions, and allotted to as many of the companies. This put a stop to much of the ruinous duplication of railroad lines and branches within a territory accessible to either, and may have saved to that nation some useless expenditures in that direction. Some of the lines were aided by Government endorsement, on military grounds, and we believe the Government fixes a maximum rate of charges also, but the result has not been favorable to either cheap transportation, or efficiency of railroad management. Americans would not exchange our system for that of France, however the shareholders in the latter may have the advantage of regular dividends. Such an exhibition of paternal Government would not be possible among us, nor is it at all certain that it is desirable. Real and grave as are the evils of unrestrained competition of capital they are not half as mischievous as would be the interference of the political power. The freedom of rivalry must be allowed to go on even to the complete exemplification in railroads of Darwin's great law of the "struggle for existence," wherein the weaker perish and the fittest survive.

A number of such collisions are now going on in our country, the big fish swallowing the little ones, until the struggle is perpetuated among the biggest. Not many years ago it was regarded as something quite superhuman for one man to take the charge of over 3,000 miles of railroad lines with a vast and complicated traffic, but we have already lived to see it done by half a dozen. Free competition was the rule also in England, in a similar process of consolidation and amalgamation, but it is in America we may look for its grandest developments. The inhabited territory has already been parceled out among the railroad companies, and east of the Missouri, at least, there is very little room for new lines unless it be in the face of resistance from one or more now in operation. West and south of the Missouri, even, the territory, although sparsely settled, is being cut up by duplicating roads apparently far in advance of the needs of internal commerce. Across, or rather lengthwise of, Kansas and Nebraska there are already four roads connecting the Colorado settlements with the East, and still another is projected. The light cost of grading seems to act as a temptation to capitalists, as it will continue to do, until every company reaching the Mississippi or Missouri rivers will not be content without its own line to the Rocky Mountains.

A struggle of colossal proportions looms up in the Territory south and west of Kansas. The Atchison, Topeka and Santa Fe Co., encouraged by the easy construction, has pushed a line over into the Upper Rio Grande Valley in New Mexico, thereby distancing its narrow gauge rival, the Denver and Rio Grande Co., which is affiliated with the Union Pacific. The immediate destination of this Kansas road is southward along the bank of the Rio Grande to the Mexican boundary at El Paso, whatever plans it may have beyond that. As the name implies, this locality commands a favorable crossing of the back-bone ridge of the Continent—the most favorable for 1,500 miles on either hand. But it is not to be allowed to seize this advantage without a tussle. With equal celerity and apparently more capital and experience in railroad construction, the Southern Pacific of California has been aiming for the same strategic point, and at last accounts was within 250 miles of the intersecting point, or just about the same distance to the West as the other road to the North. Let these two corporations race and strain themselves as they will, the public will rejoice, for their coming together will inaugurate another, the second, overland railroad.

This is discerned by the companies crossing Texas—the Texas Pacific and Texas Central and the San Antonio roads—who see with dismay a prospect of the through traffic being snatched away from them and carried northward through Kansas. It happens as if to further complicate matters, that the capitalists of the Texas Pacific are, in part, the same who control the Missouri Pacific, its feeder, the Missouri, Kansas and Texas, and the road between Shreveport and New Orleans, now half-built, so that the completion of the line across Texas would give a St. Louis and a New Orleans terminus to this overland line. Inasmuch as the Wabash and Pacific held by the same interest has opened its own line to Chicago, this lower line would have a manifest advantage over the Atchison Co., whose natural terminus is Chicago alone.

Each of these contending forces naturally relies on the equal use of the Southern Pacific westward from the Rio Grande to the Pacific, which company is understood to be independent and neutral to all comers. This is the happy privilege, and its manifest right, of the California corporation; it should give and take with all who connect with it at its eastern terminus. The fact that the Texas and Pacific has 500 miles of road to build to reach El Paso, as against the 250 of the Atchison road matters but little, as the ground westward of El Paso will be covered by the other inde-

pendent company. Across the sterile New Mexico, Arizona and Southern California there is but one route, as there is traffic for but one line.

Seeing this opposition the Atchison people, whose seat of financial power is Boston, are threatening on the one hand to build a road across Arizona to some point not named on the Pacific—probably San Diego—with a diverging fork to Guaymas on the West Coast of Mexico, 1,500 miles in all; and are also, on the other hand, proposing to construct another 1,500 miles of roads through Old Mexico to its capital with a branch to New Laredo in Texas. All this may be done, in time, but not in season to decide the present contest for position. No doubt the Mexican authorities would be glad to have American, or any foreign, capital come in and buiid railroads for her, since they have all to gain and nothing to lose by it. Whether foreign capital will be equally ready to create property in such a distracted country is a different matter. At any rate, whether the Mexican lines are built or not, it is evident that the next two years will see our Southwest territory divided up amongst a few strong corporations, and we are enabled to designate in advance which they are, though we cannot so easily foresee which one or two shall survive the rest. That is a matter of management and foresight.

Texas and Pacific Railway.

At the annual meeting of the Texas and Pacific Railway Company, held in Philadelphia on the 10th inst., the following board of directors was elected: Thomas A. Scott, John C. Brown, Jay Gould, Russell Sage, Frederick L. Ames, R. D. Barclay, H. H. Houston, William Thaw, James P. Scott, William M. Harrison, W. C. Hall, Frank S. Bond, William T: Walters, E. H. Perkins, Jr., and B. K. Jamison. The officers are: Thomas A. Scott President, G. D. Krumbbarr Treasurer, and C. E. Satterlee Secretary.

From the report which was presented we learn that the number of miles of road operated during the fiscal year ending May 31, 1880, was the same as at the preceding year, viz: from Shreveport to Fort Worth, 219.69; from Texarkana to Sherman, 155.12; from Marshall to Texarkana Junction, 69.05—making the total length of main track, 443.86 miles. During the year side tracks equal to 1.98 mile were constructed, making a total length of 42.68 miles of sidings.

The transportation receipts during the year ending May 31, 1880, were $2,589,221 61, and the transportation expenses $1,543,517 75, making the net receipts for the year $1,045,703 86; against which there is charged for interest on mortgage and consolidated bonds and sinking fund $732,740, leaving a surplus of $312,963 86; to which add balance of income account and taxes on land, etc., $30,213 01, making a total surplus for the year of $343,176 87. The betterment expenditures, amounting to $136,329 22, were charged to operating expenses.

Compared with the previous year the receipts show an increase of $153,077 96, or 21.21 per cent, with a decrease in expenses of $47,709 67, or 3.08 per cent, making the increase in net earnings $500.787 63, or 91.90 per cent.

The receipts per mile of road operated show a gain of $1,020 45, the expenses a decrease of $107 46, and the net earnings an increase of $1,-127 91.

The percentage of operating expenses was 59.61 per cent, a decrease of 14.78 per cent.

The tota number of passengers carried one mile during the year was 11,438,607, a decrease of 212 437. The revenue from passenger traffic was $556,054 82, a decrease of $521 49.

The number of tons of freight hauled one mile was 66,446,382, a gain of 15,722,564. The revenue from freight traffic was $2,053,018 85, a gain of $470,092 45. The total tonnage moved was 525,093 tons, of which 415,875 was from local and 109 218 from through or competitive business. There was an increase in the number of tons moved of 145,968.

The company's assets outside of its railway property and lands are $890,916 05; total liabilities, $170,408 21; showing an excess of assets over liabilities of $120,507 84.

Mobile and Ohio Railroad.

The directors of the Mobile and Ohio Railroad Co., at a regular meeting held in this city on the 4th inst., directed the payment of interest at the rate of 7 per cent on its First Preferred Income and Sinking Fund Debentures, payable 3½ per cent on the first day of September, 1880, the transfer books to close on the 21st day of August inst., and 3½ per cent on the first day of February, 1881, the transfer books to close on the 21st day of January, 1881; also the payment of interest at the rate of 1 per cent on its Second Preferred Income and Sinking Fund Debentures, payable on the first day of December, 1880, the transfer books to close on the first day of November prox.

The foregoing interest is ordered to be paid in conformity with the provisions of the Deed of Trust dated May 1, 1879, which in effect requires that after the termination of each fiscal year (June 30th), the "company shall and will ascertain as closely as practicable the net earnings of such company, remaining after paying the expenses of the administration of its affairs, the cost of maintenance, operation and proper repairs to the property, all taxes and assessments and interest on the new First Mortgage bonds of the said railroad company," * * * * "and such additions and improvements as may be deemed by the said railroad company necessary for the maintenance of its business; and in case there shall remain in cash any of such net earnings for the year ending on the first day of July, then next preceding" * * * * * "then such net earnings shall be applied to the payment of interest on said first series of debentures, not exceeding seven per cent, in lawful money of the United States, and such application and payment shall be made on or before the first day of February in the next succeeding year, and after payment of interest at the rate of seven per cent per annum, on such debentures of the first series, what remains of said net earnings shall be applied to the payment of interest," in like manner on the second, third and fourth series in the order of their priority; and it also provides, that in case the net earnings do not thus provide for full payment of interest upon any or all of said series of debentures, then and in that event, "the deficiency shall not be a claim upon any earnings of any succeeding year, but shall be absolutely waived and relinquished, and the net earnings shall only be applicable to the payment of interest on either series of debentures, in case such earnings shall amount to one per cent or a multiple of one per cent on the total amount of debentures belonging to such series, so that fractions of earnings exceeding such one per cent or multiple of one per cent need not be included in the payment of interest for that year, but shall be carried to the credit of the earnings for the succeeding year."

The following is the statement which was presented, showing the receipts and expenses for the year ending June 30th, 1880, and the appropriation of the net earnings:

Gross receipts for the year ending June 30th, 1880		$2,284,615 69
Gross expenses for the year ending June 30th, 1880, (64 per cent)		1,459,649 88
Net earnings		$824,966 81
Interest on ($7,000,000) 1st Mortgage 6 per cent bonds, due and paid Dec. 1, 1879, and June 1, 1880		420,000 00
Balance		$404,966 81
Appropriated as follows:		
3½ per cent on ($5,300,000) 1st Preferred Income and Sinking Fund Debentures, payable Sept. 1, 1880	$185,500	
3½ per cent on ($5,300,000) 1st Preferred Income and Sinking Fund Debentures, payable Feb. 1, 1881	185,500	
1 per cent on ($1,850,000) 2d Preferred Income and Sinking Fund Debentures, payable Dec. 1, 1880	18,500	
		389,500 00
Surplus to credit of the earnings for 1880–81		$15,466 81

In addition to thorough maintenance and repairs, there have been made during the year 1879–80 important additions to the permanent property and structures of the road, including fire-proof additions to the company's shops at Whistler, Ala., and Jackson, Tenn., a new and commodious wharf at Mobile and a new hotel at Rives Station, the substitution of 4,000 tons steel rails for iron (=45 miles); the equipment has been improved and added to by the purchase of 2 new engines and the construction of 75 freight cars; the cost of all of which is included in "gross expenses."

☞ The masters, have filed in the office of the Circuit Court of the United States for the eastern district of Pennsylvania their report on the second audit of the accounts of the receivers of the Philadelphia and Reading Railroad Company and the Philadelphia and Reading Coal and Iron Company. At the first audit the railroad company's balance on hand was $151,803 47, and between that date (June 23) and July 31, inclusive, the receipts have been $2,298,888 73, making a total of $2,450,692 10, and the expenditures $2,-349,453 52, leaving a cash balance on hand of $101,238 68. The coal and iron company's account begins with a balance of $10,848 65 on the

28d of June, and shows receipts of $724,486 68, making a total of $735,335 33, and the expenditure of $711,720 90. The cash balance on hand August 1 was $22,614 43.

Philadelphia and Reading Companies.

The report of the masters in the suit of Taylor vs. The Philadelphia and Reading Railroad and Coal and Iron Companies upon the proposition of the receivers of those two companies to issue certificates in payment for wages and supplies furnished previously to the failure, was filed in the United States Circuit Court, Philadelphia, on the 7th inst. This document has special reference to the issuance of certificates for the payment of claims for materials and supplies, the amounts due and maturing by the railroad company, under this head, amounting to about $1,265,000 to May 24, 1880, and those of the coal and iron company to the same date to about $550,000. Under the decree of the United States Court of May 24 the masters were directed to give special attention to the payment of accruing rents, the wages of employes and for materials and supplies as they matured. Commenting on this order the masters say:

Such being the decree of your honorable Court, it does not appear to be necessary that we should inquire whether the authority which it has conferred should have been granted; but in view of the large amount involved, and of the fact that mortgage creditors who might be supposed to be prejudiced by allowing a preference to these claims are not actually before the Court, the receivers and their counsel have requested us to make such a report upon the whole matter as we might deem to be due to its importance. We have accordingly made a careful examination of the authorities, and have found that the decree is, in the particular now under consideration, fully supported by previous similar orders and adjudications in other cases.

After citing several cases bearing on and sustaining this point, the report continues:

The doctrine of which we have been speaking is not in conflict with the priority secured by the mortgage of the bondholders, nor will it defeat their lien. When foreclosure takes place no one can compete with the mortgage creditors in the distribution of the proceeds of the mortgaged property; but the fund which is the subject of administration is that merely which arises from carrying on the business of the corporations defendant under the orders and direction of the Court, and it therefore may justly be applied as the Chancellor shall find to be equitable.

This fund, being produced by the administration of the Court itself, is, it should also be stated, to be distributed according to the well-regulated discretion of the Court, and it follows that material men, as well as others who participate in that distribution, must submit to such terms as the Court may impose, and no order will be made requiring payment at such times and in such manner as will embarrass the receivers in the conduct of their business. In the present case we fully concur with the counsel for the receivers that it will not be possible to fix a definite time for payment of the claims now under consideration.

The receivers are virtually in the position of trustees charged with the duty of protecting the properties in their hands for the benefit of all parties in interest, so far as it may be possible for them to do so. Many of the properties are subjected to liens or rentals, but are of much greater value than the amount of incumbrances or charges upon them. Where the income from a particular property will more than pay the charges upon it, it is plain that the revenues should be first applied to such payments; and even in cases where no income is received, it is still the obvious duty of the receivers to preserve those assets which have undoubted margin of value. It may be necessary, therefore, for the benefit of the estate as a whole, to apply earnings of either company to protect valuable investments, and, for this reason, to postpone somewhat the creditors holding these claims for materials and supplies.

The document concludes with a decree empowering the receivers to issue to the treasurers of the two companies for materials and supplies certificates substantially in the same form as those authorized under the million dollar loan.

Judge McKennan, sitting at Pittsburg, approved the report, and directed that an order be made in the form recommended by the masters.

Ohio and Mississippi Railroad.

The following is the full text of the order recently entered in the U. S. Circuit Court at Indianapolis, Ind., in the suit of Wm. King et al., v. The Ohio and Mississippi Railroad Company:

An application having been made for the appointment of a separate Receiver for the Springfield Division of the Ohio and Mississippi Railroad Company, the Court overrules the application and declines to appoint a separate Receiver, being of the opinion that it is to the interest of all parties concerned that the main line and the Springfield Division should be operated by one Receiver. But in view of the report which has been made to the Court by the Hon. James H. Howe, the Special Commissioner appointed to examine the line of the road of the Springfield Division, the Court orders and directs that the Receiver, out of any funds in his hands which may remain after paying the necessary expenses for operating and the repairs of that road of which he has charge, shall use enough of the same to place the Springfield Division absolutely and as speedily as possible in a safe condition for the transit and safety of passengers, and make such repairs as may be necessary to accomplish that object of the Receiver. And the Receiver, by his council, having applied for an order to pay the July interest due on the first mortgage of the main line, he is hereby directed, subject to this order in relation to the Springfield Division, as soon as the same can be done, to pay the coupons which fall due on the first mortgage of the main line; and the Receiver is hereby directed to pay on the first of November of the present year the interest which may hereafter fall due during this year upon the coupons of the bonds of the second mortgage of the main line and on the bonds of the mortgage of the Springfield Division; and thereafter, as fast as funds shall accumulate in his hands to enable him so to do, he is directed to pay first the coupons and bonds of the Springfield Division which heretofore have fallen due, and then the coupons which have heretofore first fallen due, and are unpaid, of the bonds of the second mortgage on the main line, and so on from time to time as funds may accumulate in his hands, and which may enable him to make payments on past due coupons after paying all current coupons when due, and which may hereafter mature, on any of the bonds of the main line and the Springfield Division, and which payment he is hereby directed to make on the said coupons as they mature.

☞ Work is progressing rapidly on the Lexington and Big Sandy railroad, and by the 1st of May—earlier than anticipated—it is expected that trains can be running from Richmond, Va., to Lexington, Ky., where the road will strike both Louisville and Cincinnati connections. The Lexington and Big Sandy has leased the John Means road running out from Ashland, known as the Lexington and Big Sandy Eastern Division. This road is completed to a point called Rush, twenty miles from Ashland, and, to comply with its charter, it is being extended eight miles to a point called Steuart's.

New York Central and Hudson River R. R.

The earnings of the New York Central and Hudson River Railroad for the month of July, 1879 and 1880, were as follows:

	1879.	1880.
Passengers	$523,267 97	$600,900 12
Freight	1,357,640 19	1,895,984 17
Miscellaneous	313,514 55	366,432 12
Total	$2,194,422 71	$2,863,316 41
Increase		668,893 70

The earnings of this company, monthly from October 1, 1879, to July 31, 1880, compared with those for the corresponding period of the previous year, were as follows:

	1878-9.	1879-80.
October	$2,771,203 61	$2,898,586 19
November	2,567,318 47	2,801,845 04
December	2,237,265 30	2,846,216 37
January	2,024,811 99	2,593,612 75
February	2,210,304 17	2,317,280 80
March	2,474,392 22	2,854,831 73
April	2,214,626 15	2,782,824 58
May	2,211,010 69	2,510,997 52
June	2,022,823 28	2,653,477 42
July	2,194,422 81	2,863,316 41
Totals	$22,928,178 59	$27,152,531 81

Showing an increase for the ten months of $4,224,253 22. The net earnings for the year ended September 30, 1879, according to the report made to the State Engineer and Surveyor, were $12,273,510, based on operating expenses of a trifle over 56¾ per cent. Assuming that the operating expenses are 56¾ per cent this year, the net earnings for the ten months ended July 31, 1880, would be $11,743,427, or within $530,083 of the total net earnings for the whole year ended with September 30, 1879.

New York, Lake Erie and Western R. R.

The gross earnings, working expenses and net earnings of the New York, Lake Erie and Western Railroad for the month of June, 1879 and 1880, were:

	1879.	1880.
Gross earnings	$1,230,419	$1,661,812
Working expenses	939,895	945,704
Net earnings	$290,524	$716,108

—showing an increase for the month in gross earnings of $431,393, in working expenses of $5,809, and net earnings of $425,584.

From October 1 to June 30, inclusive, the earnings, expenses, etc., were:

	1878-'79.	1879-'80.
Gross earnings	$11,725,771	$13,718,841
Working expenses	8,427,634	8,643,282
Net earnings	$3,298,137	$5,075,559

—showing an increase for the nine months in gross earnings of $1,993,070, in working expenses of $215,648, and in net earnings of $1,777,422.

☞ The earnings of the Central Pacific Railroad for July were $1,760,000, against $1,458,833 last year, a gain of $301,167. The earnings during the past seven months were $10,244,256, compared with $9,314,242 in 1879—an increase of $930,014.

☞ The Pennsylvania Railroad Company is constructing a branch from Keating, on the Philadelphia and Erie Railroad, to Phillipsburg, on the Tyrone and Clearfield Railroad.
